> SEEDS, SMALL FRUITS.

BRATTLEBORD VT.

Lawn Grass Seed of best mixture. Qt., 20c.; mail, 30c.; peck, \$1.00.; bu., \$3.75.

REMARKS.

In presenting my price list, it is pleasing to know that the public taste for rural improvement is develop ing rapid progress; which adds more value to the necessary, as well as beautiful things for the convenience, comfort and luxury of gardening, which yearly grows more in favor, expressing care, design, and refinement of nature. To form a garden, planning must first be carried out, for convenience, and arranging of kinds according to its class in a practical way. There is no better employment or recreation, affording the mind more satisfaction, than tilling the soil to improve our property, which increases taste, beautifies nature with attractive lawns, flower beds, climbing vines, gardens, fields, forest, with peculiar and rural effects in picturesque, geometrical, or gardenesque forms.

The vast commetition of the seed, plant, flower and vegetable trade, develops itself extensively, requir-

The vast competition of the seed, plant, flower and vegetable trade, develops itself extensively, requiring thought and careful management, to meet demands at paying profits. In our business, skilled labor is required to more easily perfect ideas in improvements in planting, growing, cultivating and harvesting. The farmer, gardener, manufacturer, merchant, in fact, almost every one, use our goods to more or less extent, which supply necessaries and pleasures of life. The increase of growing wealth and prosperity becomes apparent in the increase of grand and costly dwellings and cottages, where nature invites in combining permanence and beauty in a marked degree. In the following list will be found the most suitable kinds, described for its purpose. Beauty of form, with gracefulness of outline and coloring contrast, add

much to effective bedding, when selections are well carried out.

To supply the increasing demand for bedding plants and cut flowers, two new glass houses were necessary to be added last fall, 100 by 2) feet, making now 12 greenhouses, an addition of some 3000 square feet of glass. My seed trade has also largely increased, and soon more room must be had for that branch.

In the list many of the best new, approved, and standard varieties will be found. I do not claim to have the best in all departments, but equally as good as other leading houses, and prices in many cases less. Being grown at the North, naturally have a more hardy constitution, giving better results than if grown in a more Southern locality. I offer special inducements on large orders, and will be pleased to give special rates to parties wishing to purchase in quantities.

Small Fruits will be found on pages 89 to 95. Where will be found some new and valuable varie-

Packing. On page 96, will be found testimonials from distant States, to show that my system of packing is done in the very best manner. I guarantee the safe arrival of all plants, seeds and bulbs when sent by mail or express, if complaints are made at once on receipt of goods. My plants and seeds are sent out not only with the intention of pleasing purchasers this year, but with the aim that I may secure

sent out not only with the intention of pleasing purchasers this year, but with the aim that I may secure their confidence and be favored with their orders for years to come.

PLANTS BY MAIL. Special attention is given to plants by mail. If ordered by express, much larger plants will be sent, the express to be paid by the purchaser. Special rates given to parties wanting plants in quantities for bedding purposes. Orders from unknown parties sent C. O. D., unless accompanied with cash or good references. No charge for boxing or packing on orders to the amount of \$1.00 and upwards. A liberal discount to dealers. Improvement societies wishing plants in quantities, will be furnished at liberal rates.

nished at liberal rates.

SEED. I give special attention to this important business. For several years a market gardener, and about sixteen years as florist, and ten years in the seed business, my experience allows practical judgment as to purity and freshness, while my greenhouses allow means of testing germinating qualities. All seeds are fairly tested before put up, and none sold unless they germinate the highest per cent; all unsatisfactory seed are either buried or burned. I sell nothing I do not believe sure to grow and true to name, and give best result under favorable circumstances. Many seed I grow; those I do not are obtained direct from the most reliable growers, and will stand test beside any of the most reliable seedsmen; in all cases using the greatest care in selecting. If seed prove not as represented: after allowance of soil being too wet, cold or dry, or deep planting, mixing with too powerful a fertilizer, there

remains a doubt of bad seed, the party will be supplied with other seed, equal in value to that purchased;

remains a doubt of dad seed, the party will be supplied with other seed, equal in value to that purchased, and I request all parties to report to me all seed not proving pure or germinating well.

FLOWER SEEDS. Some which cannot as yet be grown in this country, I obtain from the most reliable growers in Europe. My strain of Florist's Flower Seeds is the best that can be obtained; in fact, all can be relied upon, and tested before sold. Flower Seed. Direction s for sowing and club orders, see ages 17 and 18 to 30. by weight 37 and 38. Vegetable Seed. Directions for sowing, see page 38

see ages 17 and 18 to 30. by weight 37 and 38. Vegetable Seed. Directions for sowing, see page 38 to 55.

Every School who wish to select flower seeds for exclusive use of school, to be planted only on the school grounds, may select \$1.00 worth of flower seeds for 50 cents; or \$2.00 worth for \$1.00, in packets only. The order can be sent by the committee or the teacher, with proof they will be used only for the purpose stated at these rates.

CASH DISCOUNT ON SEED. All flower and vegetable seed in packets, oz., ib., qt., or peck, to the amount of \$5, 5 per cent discount; \$8, 8 per cent discount; \$10 to \$20, 12 per cent discount. Not allowed on bushel or barrel rates unless by special agreement.

TELEPHONE CONNECTIONS. Direct from office and greenhouses.

ORDERS. If not received in due time, I request purchasers to notify me to that effect, as often the parties address has been omitted, either state, town, or name, and sometimes the whole, or misdirected.

SEED DY MAIL. All seed will be forwarded by mail at rates given, unless otherwise noted. Peas, Beans, add 30 cents per quart; corn, 20 cents per quart for postage; all other seed at pound rates, add 16 cents per pound to pay postage; no charge for packing or boxing.

Be particular to always write the order plainly, and giving Post Office, County and State. All money to the amount of \$1 and upwards, if sent by Post Office Order. Registered Letter, Cashier Check on New York and Boston, will be at my risk, and I will guarantee the safe arrival of all packages to any part of the United States. Discount on Seed, see above, also page 18. Crub orders on Roses, see page 76.

Catalogues. No 1, Illustrated, of Seed, Plants, Bulbs. Shrubs, Small Fruits, Trees, etc., issued in February. No. 2, Special List, to the trade only, ready in February. No. 3, Special List of Surplus Stock and Mailing List, ready in April. No. 4, Special List of Potted Strawberry Plants, ready in July. No. 5, Fall Catalogue of Dutch Bulbs and Winter Flowering Plants, ready last of September. No. 6 plication.

NOVELTIES IN FLOWER SEEDS.

AND OTHERS OF SPECIAL MERIT.

NEW ASTER, Triumph, Deep Scarlet.

This novelty is among the most beautiful and perfect of dwarf Asters, on account of the habit of plants and beauty of flowers. Forming a new plants and beauty of flowers. Forming a new class, resembling the Dwarf Chrysanthemum Aster in habit; but in developing, the flowers bend a little on account of their weight, but not to impair their beauty, each plant forming a bouquet of itself about 7 to 8 inches high. The flowers measure from 2½ to 3 inches across; of faultless measure from 2½ to 3 inches across; of faultless pæony form, the petals being incurved. The color is rich and brilliant; when beginning to bloom, is scarlet, but when in full bloom, changes to deep satiny scarlet. It produces its flowers in abundance, bearing at least 30 to 40 handsome flowers. Pkt., 25c.

Aster Comet. New. Resembles a Japanese Chrysanthemum; long twisted, wavy petals; pink, bordered white; 15 inches high. Pkt., 15c.

Aster, Boston Florist White. For cut flowers or bedding, an excellent and useful variety:

ers or bedding, an excellent and useful variety; largely used around Boston; flowers pure white; medium size, with long stem branching well from

medium size, with long stem branching well from
the ground, producing an abundant crop of flowers; pyramid habit; about 15 inches high. Pkt.,
12c,; 3 pkts, 30c.; 6 pkts, 50c.; 12 pkts, \$1.

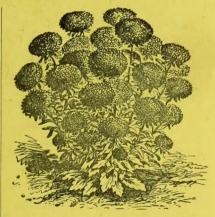

Aster, Perfection Light Yellow. (New.)
This is a new shade of the Perfection class; early
and very useful for cut flower work. Pkt., 25c.
Aster, Prolific White,

15

Lavender,

One pkt., each above 5 colors, 60c.

A new, very dwarf Aster; variety of French origin; excellent for massing or borders; in eight colors mixed. Pkt., 15c.; 6 pkts, 75c.

NEW ASTER TRIUMPH, DEEP SCARLET.

Aster, Pearl. Pure white. Pkt., 15
Aster, Pearl. Pure rose. Pkt., 15
Aster, Pearl. White and rose mixed. 15
The crop of Pearl Aster nearly a failure last season on account of too much rain at harvest time.
Aster, Lilliput, Pure White. The character of this race is the small size of its flowers and the abundance with which they are produced. Use.

abundance with which they are produced. Useful for cut flowers. This novelty proved very fine during the past summer. Pkt., 15c.; 6 pkts,

IMPROVED TRIMARDEAU GIANT PRIZE PANSIES.

PANSY, New Improved Fancy Large Flowering.

Pansies have been one of my leading specialties for several years; improvements in size, form, brilliant and rich coloring are continually being added, and the Pansy is yearly becoming more and more noted among florists and all who admire what may be rightly named the Spring Queen of bedding flowers, as the Chrysanthemum has been recently named Queen of Autumn. The illustrations are not highly colored, however the strain of seed I offer is the finest the country can produce at present, and much in advance of nine tenths of the kinds offered with highly colored illustrations. None are selected with more care in

regard to size, form and brilliant rich contrasts in colors than mine. I yearly add to my collections all the improved strains from France, England and Germany direct, that my customers may receive the benefit, and the best pansy specialists acknowledge them to be excelled by few if any, and it is doubtful if colored plates could do them justice. The cuts above will give an idea of size and form, but their rich colors and markings must be seen to be appreciated, as long descriptions cannot do them justice.

Pansy, Giant Black King. Intensely dark; almost coal black. Pkt., 25c.

Pansy, Yellow Giant. New; very beautiful; large; pure yellow. Pkt., 25c.

Pansy, Giant Purple King. Very large; intense, deep purple. Pkt., 25c.

Pansy Giant Emperor. Fine ultramarine blue

violet; purple eye; distinct from any other. Pkt.,

Pansy, Giant Lord Beaconsfield. Deen violet, shading in the top petals to white. Pkt.,

Pansy, Giant Belgian, Striped. The enormous size of flower, robust habit of plants, make this the perfection of striped pansies, being different in form and habit from other striped varieties.

This new distinct race are all of vigorous and compact growth, the flowers of good form, and the size before un-known in the Pansy. Of this class the strain I offer is the choicest that can be obtained, and often flowers will measure 3 to 3 I-2 inches in diameter. I will send 3 packets, one each, viz.: Yellow, Purple, Striped, for 50c., or the 6 yarleties above named, one each for \$1.20.

Pansy, New Improved Giant Trimardeau. A new strain much in demand; distinct, rare, exceedingly beautiful; flowers of immense size; vigorous and compact habit. The seed I offer of this strain is from the best improved kinds in superior mixtures of colors; flowers over three inches in diameter; three blotched, and represent a notable difference from those well known races. Packet of 50 seed, 10c.; 200 seed, 25c., or 6 packets, \$1.; 1-6 oz., 75c.

Pansy, New Prize Victoria This is entirely new, and the first really red flowering variety merit obtained. Quite different from other flowers; of good size and form; described as a brilliant blood red; this should be in all rare collections. Pkt., 25c.

Pansy, Bugnots. A new, very large, improved of French introduction; this year extra large flower, stained. Pkt. 35c.

Roemer's Glant Prize. A new attractive addition to this popular class of Pansies, being of robust and free flowering habit; flower measuring upwards of 4 inches across; being circular in form, of good substance, as well as unsurpassable beauty and variety of coloring. See illustration. Pkt., of 100 seed, 25c.

Prize Blotched. This Pansy is an improvement on the well known Odier Fine Blotched and Spotted. Visitors examining this strain when in bloom, were surprised by such brilliant shades and enormous size. This is the latest improved strain of high and rare quality. First offered last season. Pkt. of 50 seed, 25c.; 5 packets, \$1. Cassiers. This is a large, well formed variety of Pansy, of the finest colors in the Odier type. Pkt., 20c.

English Choice. The best English strain; of English Choice. The best English strain, of finest quality; saved from named varieties; mixed colors. Pkt., 25c.; 6 pkts, \$1

French Mixture. This is a choice strain of the best French varieties mixed. Pkt., 25c.; 6 pkts,

Belgian. A selection of the best Belgian varieties, in finest mixtures. Pkt., 15c.; 6 pkts, 75c.

Butterfly Pansy. Six varieties mixed. Pkt., 20c.

IMPROVED FANCY LARGE FLOWERING.

For bedding, freeness to bloom, great variety of colors and markings, large flowers, rich coloring combined, no strain of Pansy offered is superior. So say the parties who have used the thousands of packages sent out during the last three years throughout the States. See following testimonials. I offer them in 12 distinct shades, separate named, at 20c. per packet, also in superior mix-tures which include the choicest known varieties Their colors range from pure white to black, in all shades and markings.

> Coronata. Dark purplish maroon.

> Marginata. Purplish maroon, white margin.

Nero. Very large; pure velvety black.

White Elephant. Delicat. satiny white; the best white in cultivation; large flower.

Beacon. Center, purple violet, shaded to almost white; very delicate.

Jamesy. Lower petals purple on a yellowish white ground; upper ones violet, with a blue margin, spotted and marbled with blue, rose and violet.

Bismarck. Deep carmine bronze, bordered yellow.

Oriole. Bright deep golden yellow. Ultramarine. Delicate porcelain; large, white center.

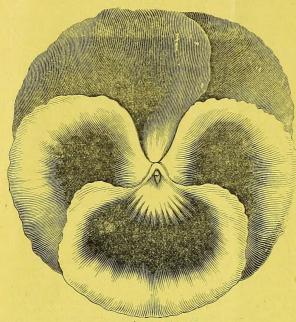

Splendens. Brilliant claret red. Jumbo. Large flowers, striped and mottled in various shades.

Flora. White; carmine spots; yellow eye.

The above named varieties are put up in packets of about 200 seed

BUGNOT'S PRIZE PANSY.

each, for 20c. per packet; 3 packets, 60c., or the 12 varieties in 12 separate packets, \$1.50. The above all mixed including other choice and rare large flowering strains in the very finest mixtures, per packet of about 300 seed, 25c.

BOEMER'S GIANT PRIZE.

This strain is always awarded first prize when on exhibition. Plants from this strain, 6 cents each; 60c. per doz.; \$3.00 per

Hundreds of testimonials could be given if space allowed, but print only the following:

ROCKLAND, MASS.

MR. ALLEN: Dear Sir:-Will you please send me a copy of your Catalogue? The pansy seed I bought of you last summer was far ahead of any I had of a fancy specialist. Yours,

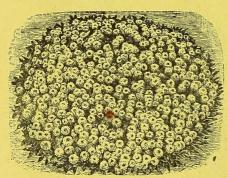

E. WHEELER.

SALISBURY, MASS.

Dear Sir :- It gives me much pleasure to write to you that I not only consider the Pansies raised from your seed the finest I ever had, but the finest I ever saw. I know we are all apt to think our own the best, but even allowing this, I think I have the best bed in town, and there are quite a number of florists here who cultivate them. I have plants of nearly all the varieties bought of you.

me know. I shall want the same as before, and new varieties if you have any. I have recommended your seed to as many as I could. Hoping you may be favored with orders from some of them, I remain, Yours truly,

SETH BARTLETT.

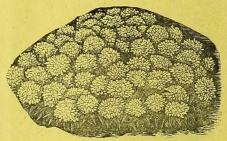

ALYSSUM, SWEET, LITTLE GEM.

Sweet Alyssum, New Dwarf Little Gem. Very dwarf, compact, three to five inches in height; blooms when quite small, and so profusely that the plants are a solid mass of white from spring till late, in autumn. For small beds and edgings it is very effective, and valuable for pots and baskets. Pkt., 10c.; 6 pkts, 50c.

BALSAM.

Perfection. The finest strain of double white Balsam grown; as round, perfect, double and white as a camellia, and recommended for florist work. Pkt., 20c.

CANDYTUFT, EMPRESS.

CANDYTUFT

Candytuft, Empress. Very long spikes of pure white flowers; distinct and new. A much improved variety of white for cut flower use. Pkt., 10c.; 6 pkts, 50c.

CHRYSANTHEMUM.

See page 61 and 25.

Double Chinese. per packet, 15 Japanese,

" Pompon, " " 15 Choice Hybrids. This comprises all classes and varieties of Japanese, Incurved, Pompon, Chinese, Reflezed; sown in the spring, will produce flowering plants by fall. The seed offered has been carefully hybridized, and saved from a choice collection of over 150 varieties, which will produce some very excellent new varieties. Pkt., 25c.

DAISY.

Double Quilled English. This new variety is composed of round, tube-like petals, very double and exceedingly pretty; the seed sown in the winter or spring will give blooming plants the first year; are hardy; three inches high; used for borders.

Double Quilled, Mixed. Pkt.,

HIBISCUS HYBRIDUS.

A valuable perennial plant recently brought to notice. Plants average 6 feet in height, presenting a mass of bloom from July till autumn; the first year from seed; from white to deep rose; 6 inches or more in diameter. Pkt., 15c.

BIRD'S MAMMOTH MIGNONETTE.

MIGNONETTE.

Bird's Mammoth. This Mignonette is said to have the largest spike and longest and most pow erful fragrance of all varieties, the originators demanding as high as \$1. per 100 s ed at one time. It now commands the highest price for flowers in New York market. Pkt., 15c.

NEW DOUBLE GERANIUM, or ZONALE DOUBLE PELARGONIUM.

I offer a strain of seed of Double Zonale Geranium that has been fertilized and saved by one of the most skilled and careful growers known, and will produce a good per cent of new and very choice double flowers. I have originated some very excellent new varieties from this strain of seed, Pkt., 35c.; 3 pkts, \$1.

Pelargoniums. This is offered as the finest Improved Fancy, Large Flowering, French Blotched Show, from the best mixtures of all classes, and should produce some very fine new varieties. Pkt., 25c.

NEW JAPANESE HOP.

Humulus Japoni-New annual cus. Hop from Japan. The foliage resembling in shape that of the common Hop. The principle feature of this new climbing plant is that it can be sown in the open ground in spring and attains large proportions in a short time. One of the best climbers for covering verandas, trellis, etc., never suffering from the heat, or destroyed by insects, retaining its fresh, green color late in autumn. Pkt..

CAPANESE HOP.

STOCK, (Perpetual Branching.)

New White. Fine for cutting; early, blooming from May to November profusely; 2 feet high; branching; the flowers appear on each shoot. Received several first class prizes. Pkt., 25c.

MINA LOBATA.

Half hardy Mexican climbing annual, resembling the Ipomœas in growth and foliage, though its flowers are distinct and singular as they are attractive; the buds are at first vivid red, but turn to yellow before they open; when expanded, are a creamy white; produce from the base to the summit of the plant, which attains a height of from 18 to 20 feet, and constitutes a beautiful object. Like the Cypress Vine, with which it has much in common, this rapid-growing species cannot fail to become popular in the United States, the climate is so favorable for its development. It requires the same treatment as other half hardy annuals. Pkt., 10c.

MOON-FLOWER, or EVEN-ING GLORY.

The flowers of this climber are from four to five inches in diameter, pure white and very numerous. If started early, the plants can be set out early in June, and will continue to bloom from mid - sum-mer until frost, growing 20 or more feet long, branching five or more feet wide; fihe for any pur-pose which re-quires rapid covering. Packet. 10c.

MOON-FLOWER OR EVENING GLORY.

PETUNIA, LARGE FLOWERING, YELLOW THROATED.

PETUNIA, (Large-Flowering, Yellow Throated.

Intus Aurea. This new introduction has proved. a remarkably large, beautiful and attractive flower, with fine frilled, wavy petals; of good form, with yellow throat; of great depth and breadth, beautifully veined. It is very distinct in appearance, and comes true from seed, in colors of white, pink, crimson, carmine veiued, striped, blotched, in good variety. Pkt., of about 200 seed, 50c.

For other varieties, see page 32.

SWEET PEA.

Invincible Carmine. New, large flowering carmine; said to surpass other varieties in brightness and beauty. Pkt., 15c.

Cardinal. Robust growing and bright crimson

scarlet flowers. Pkt., 15c.

Prince of Wales. Shaded and striped mauve on white ground. Awarded a first class certifi-

on white ground. Awarded a first class ceroficate. Pkt. 15c.

Indigo King. Deep violet blue. Pkt., 10c.

The Queen. Scarlet, mottled white and purple; distinct and beautiful. Pkt., 15c.

White Beauty. For cut flower work one of the most useful; free and abundant bloomer; pure white. Pkt., 10c.

Vesuvius. Light crimson, flamed scarlet. Pkt., 15c.

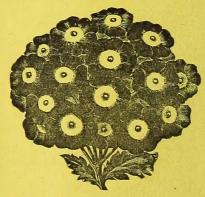

One packet each above seven varieties, 75c.

SWEET PEA.

STATICE SUPERBA.

It forms feathered plume flower spikes similar to feathered Coxcomb, growing 18 inches high, each plant producing a number of spikes; each are composed of 65 or more smaller ones, varying from the lower to the upper part, from 6 inches to link lower reception. 1 inch long, resembling Heath; varying in color from white to rose. Pkt., 25c.

VERBENA, NEW MAMMOTH.

VERBENA.

New Mammoth. The improvement in size of flower is above the average Verbena, each individual flower measuring one inch across, while the truss will measure over three inches across; a

large per cent of this seed will produce flowers of the above dimensions, which vary in all the colors which the Verbena combines. Pkt. 25c.

Verbena Hybrida Compacta.

A new dwarf class of Verbenas, growing more compact than the ordinary varieties, producing flow-ers in an erect form, so that each plant, with its large truss of flowers, represents a neat globular pyramid form well adapted for massing in flow-

Compacta Candidissima. White; coming true

from seed. Pkt., 25c.

Compacta, Best Varieties Mixed. Consist of some new tints. Pkt., 25c.

Verbena, New Yellow.

This new! Verbena is said to produce a large per cent of light yellow flowers; the only yellow shade found among Verbenas. Pkt., 20c.; 3 pkts,

PALM.

Washingtonia Filifera. This has large, dark, fan-shaped, green leaves, on which hang thread like filaments several inches long, giving it a gracelike filaments several inches long, giving it a graceful and beautiful appearance on good sized plants.
They grow compact and are adapted to pot culture, succeeding in any situation or almost any
treatment of ordinary plants. They are very useful as specimen plants, center of baskets, vases,
grouped on lawns, thriving with little care, always ornamental. Plants are easily grown from
seed, and are an attractive addition to any collec-

tion of plants. Price per packet of 10 seed, 25c.; plants, 50c. each.
Palm plants of ordinary varieties, 30c., 40c., and 50c.

ZINNIA, (New Double.)

Zebra. Many of the flowers of this variety appear striped, which is uncommon in this class of flowers; varying in all shades and colors of the Zinnia; habit of plant dwarf and compact. Pkt., 20c.; 6 pkts, \$1.

VEGETABLE SEEDS,

New and of Special Merit.

EARLY CORY SWEET CORN.

Early Cory Sweet Corn. Few vegetables are used in the green state to the extent of Sweet corn. The demand for early varieties exceed the later nearly two-thirds, and the call for early varieties. later nearly two-thirds, and the call for early varieties is so great, that since the introduction of the Cory I have given special care in selections for seed to keep pure, selecting the earliest and most productive hills for seed purpose, of which I grow largely of this variety to supply the trade of market gardeners, and other who use largely of this variety. Planting from the best formed and largest ears, smallest cob and largest kernel, and have now the most carefully selected seed at the for market gardens offered in selected seed stock for market gardens offered in selected seed stock for market gardens ouered in the seed trade, yielding two and three good ears from one stalk. By planting the Cory you have a better opportunity of engaging later varieties, giving a complete monopoly of the market with the retailers and consumers. The Cory is certhe retailers and consumers. The Cory is certainly the best eurly sweet corn for market or family use, ten days earlier than E. Marblehead, being grown in a northern climate will likely give much earlier results. This seed has been tested, and is known to germinate to the highest per cent. Pkt., 10c.; pt., 15c.; qt., 25c.; pk., \$1.25; bu., \$4.00. Price on page 43 should read the

Shaker's Early Sweet Corn. On my grounds haker's Early Sweet torn. On my grounds last year, beside the Cory, Marblehead, Minnesota and Crosby, this was fit for the table three to five days before E. Marblehead, closely following the Cory. It resembles the Crosby Early, but ears one-third larger, 12 rowed, ten days earlier, white and very sweet. To follow the Cory it will become an established variety as second early market. No variety on my list is so valuable for second early. Large, long and attractive ears, when husks are removed. Very valuable for market men. Packet, 10c.; pint, 15c.; qt., 25c.; peck, \$1.25.

CABBAGE.

All Seasons. This new variety is equal to Henderson's summer in earliness, producing heads one third larger. Very solid, thick, and when sown late, makes an excellent winter cabbage; adapted to early fall, winter or spring marketing. Its quality is equal to any Drumhead variety. Price per packet, 10c; per oz., 35c.; ½ lb., \$1.25; 1 lb., \$4.00. My stock is direct from the introducer. Good judges of this vegetable speak of this fine variety as follows:

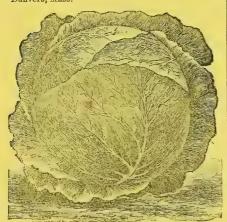

Without hesitation a variety that has not been equalled for surety of heading, whether planted early or late. It is surprising to notice the quickness it will come into head when late planted. It will make heads fit for market, when planted in August, in six weeks. C. L. ALLEN & Co. in six weeks. C. L. ALLEN & Co. Jamesport, L. I. was struck with the vigorous and

healthy appearance of a piece of cabbages in my garden, called All Seasons—very early, with large, firm heads, and almost certain to head. I regard it as the best variety of cabbage I have ever raised.

BEN: PERLEY POORE.

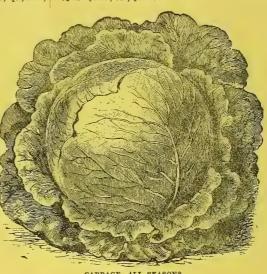

West Newbury, Mass.
Comparing the All-Seasons with other varieties, I was surprised at its earliness. Every one headed as hard as a rock, though they have not an average chance. It is a splendid cabbage.

C. C. PRATT, Gardener, Insane Asylum.

WARREN STONE MASON.

Warren Stone Mason. This makes a deep, round, very solid head, wrapping its outer leaves very handsomely for protection; very reliable for heading; few, if any varieties, surpass it for field use. Maturing just after Early Brunswick; well adapted to carry through the winter; size and weight about right for a cabbage to be in general use. This variety is largely grown around Boston for a main market variety. Distinct and different from common Stone Mason; excellent for shipping. My stock comes direct from the originator's best strain. Price per packet, 10c.; oz., 30c.; 16. \$1.00; lb., \$3.50.

CABBAGE, ALL SEASONS.

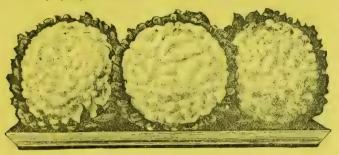

Cabbage, Early Red Erfurt. This is the earliest of the red varieties, very dark red and for pickling it is considered the best of all. Per packet, 10c.; oz., 30c.

Kidney Wax Bush Bean. An improvement of the Golden Wax, which it exceeds in yield; equally as early; erect, [hardy, productive; long

pods, broad and flat, of a delicate wax yellow, stringless and very brittle. Beans, kidney shape, white with reddish purple spots, fine rich flavor.

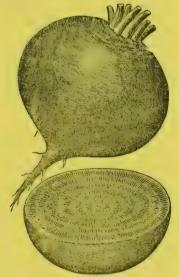

This will become a leading snap bean, and equally as useful as a winter shell bean. Packet, 15c.; 2 for 25c.; pint, 20c.; qt., 35c.

EARLY SNOWBALL CAULIFLOWER.

CAULIFLOWER.

Henderson's Early Snow Ball. (True.) The earliest of all cauliflowers; more sure of heading than any other variety; being ready for market one week in advance; seed sown about first week in March, the heads are fit to cut June 12th to 15th, measuring six to nine inches in diameter; of dwarf habit, allowing to be planted twenty by twenty-four inches apart; seed sown late make fine heads for fall use. Pkt., 20c.; oz., \$3.50.

BEET, ECLIPSE.

BEET.

Carly Eclipse. The earliest standard variety for family or market. Superior to Egyptian on account of being more round, solid; equally as early; color, deep red; fine grained and sweet. This strain has, by selections, acquired a fixed distinction from the ordinary strain of Eclipse Beet, and superior for the market men where fine form, color, and earliness is an object, and the growing demand for this variety requires thousands of pounds to supply marketmen. Price, grown from select stock, oz., 15c.; ½ lb., 25c.; lb., 80c. Early Eclipse.

Edmand's Blood

Turnip. the most thoroughly fixed and uniform in type of any turnip beet grown; deep red in color, sweet, tender, crisp; flavor and quality the best; smooth, globular quanty the best; smooth, globular in shape, of good market size; small top, single tap-root, and is thus adapted for bunching, it is being grown large-ly for that purpose, not quite as early as Eclipse, but for main crop the

ever it has been once raised and sold. Price per pkt., 5c.; per oz., 15c.; per ½ lb., 25c.; per lb.,

The Lintz Beet. This variety originated in The Lintz Beet. This variety originated in Philadelphia by a prominent market gardener, which was selected by them and had a local reputation. It is as early as the Egyptian, larger and better quality, of fine perfect turnip shape, with smooth roots, dark red flesh, grows small top, very productive and good keeper. Price per pkt., 10c.; oz., 20c.; ¼ lb., 40c.

GOLDEN SELF-BLANCH-ING DWARF CELERY.

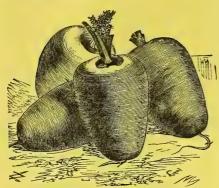

A fitting companion for the White Plume. It re-Anting companion for the white Flume. It requires no more labor than that sort and makes a pretty contrast. The heart is a rich gold yellow, while the outer leaves are a yellowish white. It is of compact, dwarf habit, very stocky, an excellent keeper, and of rich, nutty flavor. Pkt., 15c.; 2 for 25c.; oz., 75c.

Henderson's White

Plume Celery. The inner stalks and leaves are naturally white and do not require earthing up like other varieties; tie the stalks together and draw a little earth about the plant is sufficient. However, in my experience, the earthing up like other varieties, adds much to its flavor and tenderness. It is a good keeper, tender, good flavor, and quite ornamental; a good grower; very white and free from rust. Pkt., 5c.; oz., 30c.; ½ lb., \$1.

WHITE PLUME CELERY.

GUERANDE OR OX-HEART CARROT.

CARROT, (Ox-heart.)

It is intermediate between Danvers and Short Horn varieties, growing to the diameter of 3 to 4 inches. At the New York experimental station this yielded one-third more than any other variety tested, beside 25 leading varieties. It can be pulled by hand without digging, and has yielded in Massachusetts at the rate of 35 tons per acre. Pkt., 5c.; oz., 20c.; ½ 1b., 40c.

oz., 20c., 24 10, 40c.

Carrot Chautenay. This new carrot originated in France. An improvement on Danvers, but averaging more perfect in form, of rich dark orange color, maturing just after the Danvers, yielding much heavier crops. Pkt., 10c.; oz., 15c.; ½ lb., 30c.; lb., \$1, by mail, \$1.30.

PEERLESS WHITE SPINE CUCUMBER.

CUCUMBER.

Peerless White Spine. This I think is the finest strain of White Spine cucumber grown

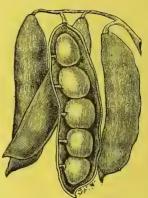

either for market, family, or forcing. Perfect in shape, of a dark green color, but white when fully ripe; very prolific, crisp, fine flavor; the best early cucumber for all purposes. Pkt., 5c.; oz., 10c.; ½ lb., 25c.; lb., 75c.

DANDELION.

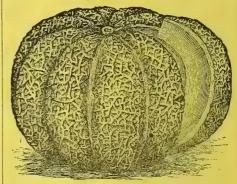

Improved Broad Leaf. This is the finest strain grown. The seed of this variety has been saved from selected specimen plants producing the largest and greatest amount of leaves to the single plant. Single specimens prepared for market weighing over four pounds each. Nothing is more wholesome for greens than the dandelion. Thousands of tons are now sold in the markets where a few years ago few were to be found. See illustration, page 46. Pkt., 10c.; oz., 40c.; ½ lb., § 1.25.

LIMA BEANS, GARDEN KING.

This excellent variety furnish enormous pods in profusion, specimens measuring 5 to 8 inches long and 5 to 7 beans in a pod, perfectly formed, possess-ing qualities unequalled in the bean family. Is a vigorous grower, requiring but two vines to the hill, and when not too closely planted, set pods early at the bottom, giving continuous bloom and pods to the end of the

season. Packet, 10c.; pint, 25c.; quart, 40c.; by mail 30c. per quart extra.

MONTREAL MUSK.

MELON.

Montreal Musk. This is an excellent melon, one that will succeed in any part of this State or Canada, as far north as Montreal, where it is largely grown for market. Maturing here about the middle of August. Large size, round, netted,

thick green flesh, and fine flavor, grows to 15 lbs. each or more. Packet 5c.; oz., 15c.; 1-4 lb., 25c.

Emerald Gem Musk Melon. This is a most distinct and deliciously flavored Melon; very early and prolific, with a skin which is ribbed but smooth; of a deep emerald green flesh; thick; of a

smooth; of a deep emerald green flesh; thick; of a suffused salmon color; sweet and delicious; the variety is so thick meated that it yields but little seed. Those seeking a melon for quality will find it in the Emerald Gem. Pkt., 10c.; oz., 25c.

Miller's Cream. Mr. Gregory says of it: "The best recommend I can give it is that marketmen last season bought up all the seed they could procure at \$5. per pound. A cross between those two delicious melons, Sill's Hybrid and Cassaba, growing rather larger than the former. The flesh is of a rich salmon color, very sweet and melting in quality, and is so very thick that the melon is almost solid, the seed cavity being exceedingly small. The rind is thin, and but little netted. The vine is a strong grower, and very productive, covering the ground with fruit. Tested side by side, it was not excelled in productiveness by any side, it was not excelled in productiveness by any of the varieties in my experimental grounds."

I will advise all my customers who want a first elass melon, by all means to try the Miller. Pkt., 10c.; oz., 25c.

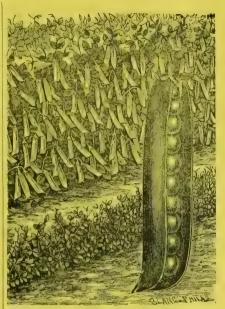

WATERMELON, STOKES' EXTRA EARLY. 11;

Watermelon, Stokes' Extra Early. This new melon is the earliest of all. The illustration shows their shape which is nearly round, dark green skin, slightly mottled. The flesh is scarlet, remarkably solid, of delicious sugary flavor. The average weight is about 15 pounds. The seed is small, about ½ the size of other melon seeds. more productive than the larger sorts, and for family use, quite unequaled. Pkt., 10c.; oz., 25c.; ½ lb., 50c.; lb., \$1.50.

PEAS.

Excelsior. Again I place this at the head of all early prolific varieties, as in testing many others I can find nothing better for general use for market. It grows about 24 inches high, producing large, well filled pods, from five to eight peas in a pod; very sweet and fine flavored. For market gardens this is as early, if not the earliest and most productive, large podded variety of smooth pea grown. Has yielded at the rate of 250 bushels of green nods per acre. Sown on the 25th of April. grown. Has yielded at the rate of 250 bushels of green pods per acre. Sown on the 25th of April, usually are ready for market from the 9th to the 13th of June, from 6 to 10 days earlier than the American Wonder. This seed I grown myself largely for market gardener's trade. For family gardens it is also extensively planted. Being grown at the north on our Vermont hills, it should produce better results than seed grown farther south. To market gardeners I make special rates on this pea in larger quantities. Price per pkt., 10c.; pt., 15c.; qt., 30c.; pk., \$1.40; bu., \$5.

EXCELSIOR PEA.

WORCESTER, Mass. WORCESTER, Mass.

C. E. ALLEN: Dear Sir:—I planted one bushel of your Excelsior Peas, April 5th. I commenced to market them June 5th. I seeded liberally, planting them on ½ acre of ground, which was in excellent condition, manuring with stable manure and guano. They grew about 30 inches high, and such a sight of pods you never say. In one accuracy and of several plants. They grew about 30 inches high, and such a sight or pods you never saw. In one square rod of ground, by actual measure, I picked in two pickings two bushels of green pods. This the largest yield I ever witnessed for early peas. The pods are very large, long and well filled, with 6 to 9 peas in each pod. Be sure and save me two bushels for next year. I was one of the first to get early native peas in the market, which of course always brings the highest price.

P. G. R.

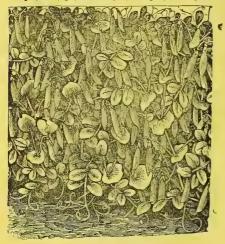

PR OVIDENCE, R. I. C. E. Allen:—Please book my order for there bushels Excelsior peas; they beat anything we have ever had in this section for early peas.
S. T. C., Market Gardener.

Early Vermont. A new first early pea, originating from careful selections of Improved Dan O'Rourke and First and Beet, of much promise for early market and family use, growing about 20 inches high; very prolific and good sized pods. It matures its crop in one or two pickings. Pkt., 10c.; qt., 30c.; pk., \$1.75.

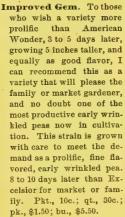

Alaska. Sent out as one of the first early. In growth earliness, height color of peas and gener-

growth, earliness, height, color of peas and general appearance, it resembles the Express, which I imported from France in 1884, and was first introduced in 1885 in this country. It so proved tested side by side last year; a first early market or family pea; 24 to 30 inches high; matures about with Excelsior, but not as prolific or good flavor; of a dark green when dry. Pkt., 10c.; pk, \$1.75; bu.,

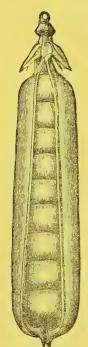

Dwarf Champion. Out of 25 varieties of Peas which I tested last year, this gave the most satisfaction as to yield and quality, and were I to plant but one late variety, I should confine myself to this. It will produce more than double the amount of pods of any other variety; peas nearly as large again as any other variety, and continue to bear for a long time; seed is wrinkled; green; of unusually fine flavor. It matures before the Marrowfat; grows about 3 feet high. Pkt., 10c.; pt., 15c.; qt., 30c.; ½ pk., \$1.: pk., \$1.50.;

DWARF CHAMPION.

Pride of the Market. A green pea, earlier than Stratugem; about 15 inches high; producing, fine large long pods, 10 to 12 peas in each pod; maturing with the Telephone, and a good variety to take its place; prolific and fine flavor; follows closely after the Improved Gem; excellent for family use. Pkt., 10c.; qt., 35c.; pk., 2.25.

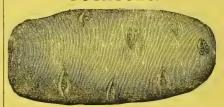

IMPROVED GEM.

For a succession crop of Peas, sow Excelsior,

Improved Gem,

Dwarf Champion.

POTATOES.

EARLY DURHAM.

Early Durham. This is a seedling of the Early Rose, originating in Northern New York. Tested at the Ohio Experimental Station in 1885, it yielded 426 bushels potatoes from an acre; ripening July 25th, and was tested beside 22 other leading varieties, like early Hebron, Boston Market, Chas. Downing, Early Ohio, Pearl of Savoy, Thourborn, Vanguard, etc., yielding per acre as follows:

Early Durham,	
Boston Market,	
Early Ohio,	
Thourborn,	
Early Hebron,	
Chas. Downing,	
Pearl of Savoy, Vanguard.	

This potato I introduced two years ago, and is proving such a general favorite, and its cooking qualities so excellent through all sections, I am induced to give the opinions of some of my customers of last year below. It is attractive, smooth skin of a light rose color; boiled or baked, it has almost the texture of flour.

texture of flour.

This seed being grown on our northern hills, should give the planter excellent results. Price per lb., 20c.; by mail, 45c.; pk., 50c.; bu., \$1.75. A limited supply by the bbl., at \$4.50, net.

The Rural New Yorker spoke of it last year

The Rural New Yorker spoke of it last year as one of the best varieties on their experimental grounds; very early; great yielder; of best cooking qualities.

WABASH, MINN.

C. E. Allen: Dear Sir:—Relating to Early Durham potatoes, I will say, the peck which you sent me yielded eight bushels. The peck you sent J. B. Mullins yielded 9 bushels. Compared with other varieties, same soil and culture, the result was better than Early Rose, Beauty of Hebron, and Clark's No. I, in uniformity of size, earliness, quality and yield.

Respectfully.

G. A. PERKINS.

Creev's Firm's Conn

GREEN'S FARM'S, Conn.
C. E. ALLEN: My Dear Sir:—The Early Durhams I purchased of you last spring, gave highly satisfactory results. From the bushel, I harvested over 40 bushels of fine, smooth, large tubers. The quality I pronounce No. I, and they are certainly among the very earliest to ripen. Planted along side of Burbank and Beauty of Hebron, they (the Durham) are easily the winners. I shall plant largely of them next spring. Yours truly, WM. JENNINGS.

I have an excellent stock of Early Hebron, Early Vermont, Burbanks, Em-pire State. Queen, Lee's Favorite and Belle; for prices, see page 51.

Potato Seed. I offer seed carefully hybridized from leading varieties. Pkt., 15c.; 2 pkts, 25c.

RHUBARB, (New Monarch.)

This is a new variety from Scotland , which I have grown for two years. For size or quality, none equal it; many of the stems will measure over 6 inches in circumference, and the leaves the largest of which measure 2 feet by 2½ feet. This has been awarded first prizes over all other varieties, 12 stalks were shown to weigh 28 pounds without leaves. Seed of my own saving, pkt., 15c.; 2 pkts. 25c.; roots, 50c. each.

BEAUTY TOMATO.

TOMATOES.

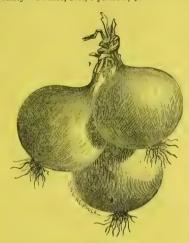

ew Beauty. Of all tomatoes in the market, I have tried this beside about all those claimed to be good for the last two years, and were I to choose New Beauty. be good for the last two years, and were I to choose but one variety for my own use, or to grow for market, this would be my first selection. A party from Australia sent to Brattleboro last year, and wanted a real Yankee Tomato, and this was chosen as a variety that would give the best satisfaction. It comes the nearest to perfection of any tomato I have ever seen, entirely solid, smooth, and perfect as an apple, with seldom an imperfect one, fine, bright red, and the most free from crack or rot of all ten varieties tried last year, size just right, ripens with the very earliest, continuing until cut by frost, and always plenty of green ones when destroyed in October. I picked the first ripe tomatoes July 14th, last year, while others did not show signs of ripening till July 25, or August 1st. This seed I grow, which is saved from the best, earliest, and most perfect specimens. Packet, 10c.; oz., 35c.; 141b., \$1.00. From choice selections.

Fomato Mikado. This variety I have tried and

Tomato Mikado. This variety I have tried and Tomato Mikado. This variety I have tried and seen growing at several places. Its quality is good and of large size, but is inclined to grow very irregular, which is very much against tt; nothing could induce me to plant very largely of it. Packet, 10c.; 0z., 30c.; 14 lb., \$1.00.

Dwarf Champion. The originator claims this will produce double the quantity of early fruit of any other variety; grows compact, short jointed,

keeping fruit well up from the ground. Of medium size smooth, deep, dark red in color, solid, good quality. Packet, 25c., 5 packets, \$1.00.

GLOBE DANVERS ONION.

ONION.

Improved Yellow Globe Danvers. This seed was grown especially for my trade, in the great onion district of Massachusetts, from welected hand picked onions, by one of the best, most careful and noted onion growers in the state. See pages 48 and 96. Pkt., 5c.; oz., 20c.; 14lb., 55c.; lb., \$2.00. 5lb., \$9.00.

MAMMOTH SILVER KING.

The largest of the White Italian Onions. It attains an enormous size in one season from seed, is of mild flavor, very attractive in appearance, and one of the best keeping white varieties. It requires a rich soil to bring it to perfection. Pkt., 10c.; oz., 40c.

HENDERSON'S NEW YORK LETTUCE.

Is a variety that is unusual for size and solidity of head, and it shows but little tendency to run to head, and it shows but little tendency to run to seed. Plants of this variety grow eighteen inches in diameter, and weigh nearly four pounds, with heads almost as solid as an Early Summer cabbage, which in general form it somewhat re-sembles. Is crisp, tender, and of excellent flavor, and always free from bitterness. Is not a forcing variety, but it is one of the best for summer use. Price, 15 cents per pkt.; 30 cents per oz.

Lettuce, Early Crimson. This is a very early lettuce, Early Crimson. This is a very early lettuce, forming a large mass of leaves more than 12 inches across; very early; light green in the center, and reddish crimson and green mottled on the outer leaves; one of the best and most tender lettuces for family use I am acquainted with. Pkt, 10c.; 3 pkts., 25c.; oz., 40c.

Squash, New Early Prolific Marrow. This has proved, on trial in different sections, a valuable variety for fall and winter, and it is doubtful if any equal it in productiveness; ten days earlier than ordinary marrow, and to those who have

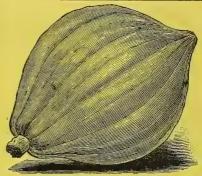

been troubled in obtaining seed that produced a large, overgrown marrow, you will find in this a squash of about the right size for market; 8 to 12 pounds each. For market or family use it will be a popular summer variety. Color, orange, shaded red; its cooking and keeping qualities are the best. Pkt., 10c.: oz., 20c.; 1-4 lb., 40c. lb., \$1-25.

SQUASH, (New Bay State.

An improved type of the Essex Hybrid; more solid, heavier, earlier, and its flavor more dry and sweeter; differing in color, being light green, and flesh of a bright golden yellow; equally as productive, averaging in weight 10 to 12 lbs. Pkt., 10c.; oz., 20c.; 1-4 lb., 40c.; lb., \$1.25.

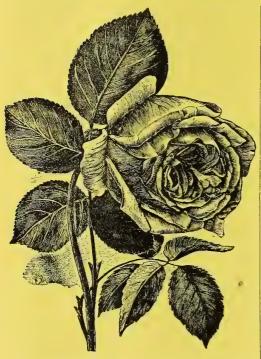

New Squash, White Chestnut. Per pkt.,

New Squash, Sibley. Pkt., 25c.

NEW EARLY PROLIFIC MARROW SQUASH.

New Choice and Rare Plants.

Princess Beatrice. This new Tea Rose comes before the public as the best of the well known seedlings of Mr. Bennett of England, who has originated more valuable new roses during the last few years than any other one person. It is one of the strongest growers of the Tea Roses yet raised by him. Very clean and healthy fol-

Its buds are of splendid form and under the same treatment it will

iage. Its buds are of splendid form and finish; under the same treatment it will equal the Mermet in size and texture. Its coloris rich, golden yellow; flowers carried well above the foliage on long stiff stems; large, full; of the most perfect form; petals round, broad, very thick, with excellent keeping qualities, and very free blooming with tea fragrance. Received a first class certificate at the Royal Horticultural Society, London. Price, 50 cents each; \$5.00 per dozen. dozen.

few Tea Rose, Luciole. Large, full, strongly scented; of good shape, with long buds; carmine rose tinted, and shaded yellow. A good forcing rose, equaling the Mermet in size. Price, 40 cents each.

New Tea Rose, Comptesse de Frigneuse.

A promising rose, with beautiful red tinted foliage; blooms freely, and will be useful for forcing and out-door bedding. The buds are large and pointed; of a bright canary yellow color. Sweet tea fragrance.

The set of above three varieties, \$1.

New Choice Ever-Blooming Roses.

Lady Stanley. Deep crimson robust grower; free bloomer with long pointed buds; flowers very large; of good substance; a new French Tea.

Price, 35c.

Maria Lambert. Beautiful flesh color, shaded to white; full, well formed buds. 35c.

Sou Victor Hugo. A remarkably handsome rose of a distinct shade of bright deep carmine the beautiful flowers, that are well formed. rose, with large full flowers, that are well formed. 35c. each.

The above set of three, 85c.

New Hybrid Tea Rose.

Puritan. Pure white color, perfect form and de lightful fragrance. In size and shape resembles its parent, "Mabel Morrison," carrying its foliage close up to the flower. The fragrance is deliciously sweet, similar to the magnolia; of robust habit. 60c aceh. habit. 60c. each.

Mrs. John Laing. Hybrid perpetual. This Rose is recommended for early winter forcing. It is an exquisite pink hybrid, a seedling from Francois Michelon. A remarkably strong grower, deliciously fragrant, a very free bloomer, and bears fine long stems, surmounted by well-shaped buds of large size. The Mrs. John Laing recommends itself to all growers of cut flowers for many reasons. Where hybrids are required for very early cutting, this variety will supply that particular demand, as it forces readily. 75c. each.

each.

A rich, dark velvety crimson Hybrid Tea; a free bloomer and vigorous grower, showing no tendency to mildew. Does not run single during summer, and as a market flower may prove of value. 50c. each. the above set of three roses, \$1.50.

New Hardy Ever - Blooming Rose, Dinsmore.

The introducer says "For years we have been looking for a variety which had the desirable qualities of a bedding rose, which was of good color, form, profuse bloomer, and would stand our northern winters without protection; and we can conscien-tiously say, that until the "Dinsmore" was produced, there was none, to our knowledge, which combined all these qualities. It is a vigorous, healthy rose of dwarf branching habit, loaded neathy rose of dwarf branching habit, loaded with flowers all summer, more profuse than many tender ever-blooming roses. The flowers are large, perfectly double, and of a dazzling crimson, and having fragrance peculiar to Hybrid roses. We have proved the "Dinsmore" to be entirely hardy, and can recommend it as being the finest garden rose ever offered." 50c. each; \$4.50 ner dazen \$4.50 per dozen.

AMERICAN BEAUTY.

American Beauty. Is a rose of large size, merican Beauty. Is a rose of large size, having the ever-blooming qualities of the Tea Rose with the delicious edor of the Damask or Moss Rose; equally valuable for winter or summer blooming. In color it is a deep brilliant pink, shaded toward the center with rich carmine; the choicest and most valuable new rose offered for some time; very double, fine grower, and unusually free for a hardy rose, every shoot producing a ly free for a hardy rose, every shoot producing a flower. 20c. each; large plants, 35c. each.

The Bride. A sport from Catherine Mermet; pure white, large size, long and fine form. The

blooms are of a fine texture, lasting longer in a fresh state after being cut than other known varieties, and has the recommendation of producing more flowers than its parent. The fact of its being like Catherine Mermet, its parent, in habit will make a large demand; excellent for winter or summer blooming. During the last year this has proved itself a valuable rose for cut flowers. 20c., each; large plants, 30c.

Papa Gontler. This might be called an improved Bon Siline, equally as good grower and bloomer, buds similar in color but nearly as large again; of deeper and more beautiful in color, and longer. An excellent rose for foreing or out of door bed ding. 20c. each; large size, 39c.

I will furnish the above four varieties, one of each, small size, 85c.; large size, \$1.40.

6 Hardy Roses.

4 Distinct Colors, New Ever-Blooming Roses.

I will send four small plants by mail or express, one of each, for 65c.; 2 each, for \$1.25; or 5 each for \$2.50.

C. Frigneuse. Yellow. Gontier. Large pink. Bride. White. Beauty. Carmine.

NEW CARNATION, **OUEEN'S SCARLET.**

In this new Carnation I think will be found the most o this new Carnation I think will be found the noise desirable and profitable variety of scarlet yet in-troduced. Everything required in habit, form of flower, vigor and health of plant, productiveness, fragrance and long stem, for present market, has been obtained in stem, for present market, has been obtained in this variety. It is a clean, erect, healthy grower, about 15 to 18 inches high, but one flower generally on a stem, 9 to 12 inches long, which is uncommon in other varieties of perpetual scarlet carnations. Its color is the brightest scarlet of any variety I have ever tested, holding its color well to the last; of good size, form, and substance, never bursting, beautifully and deeply fringed petals, very double, and as early and prolific as any white variety grown. I have tested Queen's Scarlet three years under all treatment with other varieties, and none contain the desired qualities for cut flower growing we have in the Queen's other varieties, and none contain the desired quanities for cut flower growing we have in the Queen's Scarlet. In this we have found an early, profitable, forcing, bright searlet carnation, with long stems, good form, fine growth, erect and good habit, earliness, bright color, good size, clove fragrance, fringed petals, doubleness, n-ver bursting, health and productiveness are not combined in any one colored carnation I know of.

a fine. erect habit. requiring no staking, free and its fire.** erect habit. Tequiring no staking, free and its fire.** erect habit.

Its fine, erect habit, requiring no staking, free and early blooming qualities, will alone make it a popular variety. 30c. each; \$3. per dozen.

NEW CARNATION, QUEEN'S SCARLET.

WHITE GEM.

The introducer's description will best describe this new and valuable variety.

This New White Carnation, we find, having tested it, to be one possessing rare merit, just what we have been seeking for more than twenty years. The plant is of strong, compact growth, perfectly

NEW CARNATION, WHITE GEM.

healthy; its flowers are very large, symmetrical and full, both fringed and fragrant, of the purest white and never bursts its calyx. Something may be gathered of its merits from the fact, that, when planting out in the spring, we set one separate from the others and allowed it to grow without cutting back, which commenced flowering early in September, and after being placed in the green-house, continued flowering; and November 18, there were just-eighty buds and blossoms on it. It is a variety which has come to stay, and one which no florist in America can afford to be without. In

order to bring it within the reach of all, we have put the price as follows;

This is highly endorsed by leading commission florists of Boston, and all large growers who have seen

A first class certificate was awarded "White Gem," by the Boston Hort. Society.

Price 30c. each, \$3.00 per dozen.

Every florist or carnation grower should have these two carnations. I will send three of each for \$1.50.

Longfellow. From the 50 new carnations I have tested during the past 5 years, I consider this one of the very best. I have grown it for 3 years, and out the very use. That growth to start a counted at one time on a single plant, over 200 buds and blooms; such clean, large and thrifty foliage; never has shown any sign of disease or weakness. Its color is a soft rosy salmon pink, immense in size, as large as two flowers of ordinary kinds, always sells well in market, and profitable as any to force. Price, 20c. each; \$1.50 per doz.

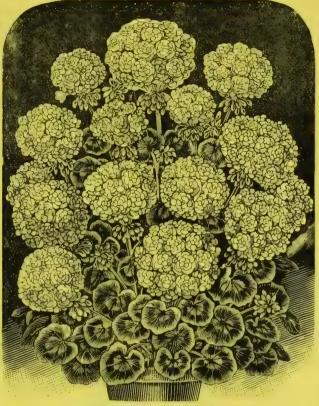

Buttercup. Its color is deep, canary yellow. The first and best yellow Carnation, at times it occasionally is dotted with a faint stripe of light red, but usually true. Its flowers are of good size, full, double, from two to three inches in diameter, never bursting; a fine and early bloomer; plant hardy and robust, and very popular; in large de-mand for cut flowers. I have a large stock in a very healthy condition. 20c. each; \$1.50 per doz.

NEW RARE AND CHOICE DOUBLE GERANI-UMS.

Mikado. This variety originated with me from a large collection of seedlings, and I think is one of the finest double varieties now grown. Color of a soft, delicate, pearly rose. Plant, strong and robust; exceedingly free bloomer; truss and flowers very large. See illustration. Price, 30c. each; 6 for \$1.50.

New Double Gerani-um, Old Gold. Of rare colors, this is the most distinct variety of its shade, being of a double chrome yellow, a strong, erect grower, with beautiful large with beautiful large truss, rendering it very attractive when in bloom. When in bloom, attracts unusual attention and sells the most rapid of all geraniums on account of its pecul ar rich and new shade among double geraniums which is rare in this class. 30c. each; 6 this class. for \$1.50.

Jeannette. This is the best double white gerani-um I am acquainted with; very large truss, on long stalks, and each individ-ual flower is above the average size.

NEW DOUBLE GERANIUM, MIKADO.

It retains its pure white color in summer or winter, as a nouse plant or when bedded out. 25c. each; 6 for \$1.25

One each above three varieties, 75c.

Gloire de France. A new French variety. The individual flowers are large, round, and perfect in form, and of a waxy, salmon white color, with a dark, citron red centre. The trusses are large, finely formed, and are borne on bold, handsome flower stalks. The appearance of a well grown flower is sure to create a surprise. 25c. each.

S. A. Nutt. The best of all dark rich crimson varieties. The flowers are of perfect shape, and large size; the trusses massive and produced in great number; the habit is close, compact and branching, plants in five inch pots frequently carrying from six to sight trusses. It is an available rying from six to eight trusses. It is an excellent bedder, and a perfect pot plant—one that must find its way into every collection. Awarded Certificate of Merit by the New York Horticultural Society. 25c. each. 6 for \$1.25.

Bay Ridge. This handsome double flowering variety will be found a valuable addittion for bedding purpose, as it is a new color from any of the numerous sorts previously introduced. Flower trusses large and perfect in form, standing well above the foliage. Color, dark, velvety maroon. 30c. each.

DOUBLE GERANIUM. WHITE SWAN.

A perfectly double pure white variety, which has received a first-class certificate from the Royal Horticultural Society of London, as being the best of its class. It is remarkably free blooming, and is in season a perfect ball of snow white. As a pot-plant for house or greenhouse decoration, it will fill a long felt want, as many of the white sorts become semi-double, or run into rose or blush shades during the spring and winter months. 25 cents each.

New Double Geraniums of recent introduction.

Fuchsia, Storm King. The markable for its fine growth and lustration represents a plant from nearly two hundred buds and ing, represent carmine balls droop-

ing among tinted rose, large, double white flowers, lightly tinted rose, measuring two to three inches across, and its carmine tubes and sepals, render it the most attractive house plant to be obthree inches across, and its carmine tubes and sepals, render it the most attractive house plant to be obtained. No plant has ever attracted more attention inso short a time among plant growers, or demand everso large for a fuchsia. It is a weeping, perpetual bloomer, of remarkably free and healthy growth, holding its flowers from two to three weeks before dropping. Our stock was first obtained from the introducer and is therefore true. No lover of plants should be without this beautiful fuchsia. Price, 20c. each; 6 for \$1.25 for \$1.50. Large plants, 30c. each; 6 for \$1.25; 12 for \$2.25. Those who wish to form clubs, I will send 50 for \$5., or 100 for \$8. by express; if by mail, add 2c. each for postage and packing in 50 or 100 lots; single [and dozen] rates postage, free, in orders of not less than \$1. For other new varieties, see page [6]

CHOICE and RARE SINGLE GERANIUMS.

King Olga. The finest single pink Geranium yet offered; flowers double the size of Master Chris-tine, and every way a first class variety in growth and bloom, and should have a large sale. 20c. each.

Ferdinand. Intense purplish crimson; the finest dark Geranium yet offered, approaching the near-est to purple of any other variety; excellent in habit, form of flower and growth; creates a large demand where its flowers are seen. 25c. each; 6 for \$1.25.

Cygnet. Immense truss of flowers of the purest white, coming in bloom very early and very free. The finest of all single varieties. 20 for \$1.

Mrs. John Thorpe. A variety of neat habit, having flowers of a chaste pearl blush color, with pure white markings on top petals; the trusses are of fair size, globular in outline; an effective pot plant. 25c. each.

Sam. Sloan. A very fine deep crimson variety of the nosegay section, having very large trusses which are freely produced. It has proved an ex-cellent bedder of very pronounced effect, and will be a variety much sought. 25c. each.

The above set of 5, for \$1.; 6 for \$1.25.

New Single Geraniums. Of recent introduction. Mlle. Lang. Pure white. Palais de L'Industrie. Dark flesh.

Chancellior Commander. Dark crimson. Arc-en-Ciel. Reddish lake, red tint, orange shade. Jules Ferry. Dark red. Candeur. Salmon.

Miss Louise Voith. Single pink; the best of single pinks. 30c.

Mdm. J. Chretien. Delicate rose. Gloire de Loraine. Rich orange. Price, 25 cents each.

NEW VERBENA, (Large Flowering.

Henderson's New Mammoth Strain, in 16 varieties. Price, 25c. each. These represent flowers as large as a silver quarter,

or over one inch aeross.

NEW DOUBLE VERBENA. VICTORIA.

This is the first step towards double Verbenas. The flowers are a rich scarlet, and show clearly a double form. The trusses are a medium size, but owing to the rich color appear larger than they really are. Its rich color will render it a favorite. The plants are of good habit, and bear their attractive flowers in profusion. Introducer's description.

CHRYSANTHEMUM.

The following varieties are selected from, a large grower of Chrysanthemums in Pennsylvania, who has won several first class prizes, which he considers his 12 best, selected from about 200 varieties.

Roriosum. Yellow, blooms early. Gloriosum.

James Y. Markland. Late white.
Grandiflora. Incurved yellow.
Cullingford. Fine red.
Moonlight. Late white, incurved.
La Neige. Early white.

Kira Kana. Bronze.

Miss Mary Morgan. Pink.

Duchess. Bronze Red.

Manhattan. Lavender rose.

Christmas Eve. Late white.

Price, 15c, each, the set of 12 for \$1.50.

NEW WHITE BEGONIA.

Sutton's White Perfection. This is a seed-ling of the Semperflorens class. In this Begonia we have the finest white both for market and cut flower purposes we have seen. It is a continuous bloomer both summer and winter, and is beautiful in cut flower work. Plant of strong, robust growth; foliage dark green; flowers large and of a beautiful pearly white, borne on long stems. 25c.

DOUBLE FRINGED PETU-NIA.

Mrs. Coleman. This is the finest double [white fringed Petuna ever offered. It grows about ten inches high, of dwarf, compact habit, producing flowers more freely than any variety! ever saw, growing almost in pyramid form. The flowers are so double as to represent a half ball, and very deanly fringed, without exception the best brown. deeply fringed; without exception the best known variety in habit, form of plant and flower, in the whole class of double Petunias; valuable for cut flowers when white flowers are needed. Price, 25c. each; \$2.50 per doz. For other varieties, see page 72.

CLUB ORDERS.

Which must amount to \$2, will entitle the getter up of same to select roses, plants, bulbs, at single and Which must amount to \$2, will entitle the getter up of same to select roses, plants, bulbs, at single and dozen rates only, not at 100 rates; or seeds, in packets only, not by the oz., lb., qt., or bu., in catalogue to the amount of 20 cents for every one dollar's worth ordered, viz.: For a club of \$2 you can select 40 cents worth as a premium. A club of \$4 you may select 80 cents worth. A club of \$5 you may select \$1 worth, and 25 cents worth extra as premium. (See page 18 also.)

But remember, this premium is allowed only when plants are ordered at retail rates; for instance, when \$2 worth of Roses are ordered, I will send three \$1 packages, and you can select from the catalogue plants or seeds to the amount of 40 cents as your premium. See mailing and \$1.00 collections.

Discount on Vegetable Seed. The same will be allowed as on flower seed, see page 18. The discount is very liberal for the quantity and quality of seed.

\$1.00 Collections.

Those unacquainted with varieties, these collections enable the purchaser to select 12 Plants at very low rates. They are not culled plants, but good, healthy and well rooted, many of them of the best new varieties. The plants are labeled, printed

BRATLEBORO VI directions sent with each package for their treatment, and guaranteed to reach the purchaser in good ormal with their orders, but cannot forward at these low rates for less than \$1., the choice of varieties always left with me. Those who prefer less than \$1., and wish to make their own selection, can choose from the Catalogue, where price and description of single plants are I forward free of postage to every State and Canada, and offer liberal inducements to clubs of \$5 or \$10.

SAN FRANCISCO, Cal., Oct. 1886. MR. ALLEN:—The Storm King Fuchsia you sent me last spring, has been in bloom since last July. It has grown remarkably well, and bloomed almost to represent perfectly your illustration. I always have beautiful success with fuchsias, and shall want more of your plants and seed in the spring.

R. M. BATES.

MR. C. E. ALLEN: Dear Sir:—The plants arrived early in December in spendid order, and are looking finely. "Storm King" looks as fresh as though it had never been disturbed. Shall try to send another order soon. I wish to get some of my friends to send for some plants. With many thanks, P. S. The seeds came all right on the previous steamer. WRS. CHAS. HUSTACE.

RIBBON BED OF PHLOX DRUMMONDII. Arranged in colors, White, Scarlet,
Purple, Etc. For seed, see page 33.

FLOWER SEED DEPARTMENT.

SOWING SEED.

It is necessary to exercise special care and attention to the important part of growing plants from seed, in most cases.

The time of sowing to germinate well, is regulated by the condition of the season and soil. In this section, hower seed are sown in open ground from the tenth to twentieth of May, as the weather is then warm and the soil mellow and settled in the best condition to receive seed to germinate quickly. If much earlier, the ground is too cold and wet to receive them, causing more frequent complaints. Many seed of a hardy nature, like Pansies, Sweet Peas, Candytaft, Alyssum, Dianthus, Sweet William, and Hollyhock, can often be sown by the 15th of April, as they delight in a cool soil and air. Should they appear above ground and be overtaken by a slight frost, it will not injure them. In order not to mislead those unacquainted with the subject, the tenth to twentieth of May is the most successful part of the season for planting seed of all kinds in this section in open ground; too early, it is often cold and unfavorable, too late is often too hot and dry. All seed of a fine, delicate and tender nature, should be sown in shallow boxes, where special care can be given in regulating heat, moisture and partial shading from too hot exposure to the sun. Careless sowing, either too deep or too shallow, unfavorable weather, and inattention after the plants are out of the ground, are causes of the most general complaints. Whoever sows them is not always in fault, however. In many cases it is often placed in full, however.

Some varieties germinate freely in a cool atmosphere, while Asters, Balsam, Cobœa, and Cyclamen, require a higher temperature. Among those of a delicate nature requiring special care in sowing, and the seedlings, when young, are Begonia, Gloxinia, Calceolaria, and Coleus, and will not grow only under favorable treatment. Cypress Vine Canna, Thunbergia, and a few others, grow more freely if soaked in water. It is sometimes the case that Clematis, Smilax and Lantanas, will lie dormant

man is then blamed by those who do not understand

the nature of the various kinds of seeds.

of careless and inexperienced help: the seeds-

for six months in the seed box, then being exposed to a favorable temperature, germinate freely. It is often the case too much water is given to tender seed kept in too low a temperature, and often not enough in a high heat; possibly the seeds have sprouted, but not appeared above ground; upon examination it is found they have decayed or dried out.

For nearly all kinds of flower seeds it is the safest to start in the house in shallow boxes; when of sufficient size transplant to the open ground, if weather is favorable and all signs of frost bave disappeared. A safe rule is to cover no deeper than the thickness of the seed. In sowing all fine seed, like Petunia, Begonia, Calceolaria, Coleus, Cyclamen, Carnation, Geranium, Primrose, prepare shallow boxes 2 inches deep, fill with fine pulverized soil, sow the seeds in rows two inches apart, which is preferred rather than broadcast; cover seed one-sixteenth of an inch with the finest of soil, then moisten well and cover with paper; if you have panes of glass to cover the box, it will keep the temperature more even and gather moisture, requiring little if any water until the seeds are up. Care should be taken to leave the glass open a little for the circulation of air. As soon as the seedlings appear, remove the paper and glass, give air and all the sun they can have, causing them to grow strong and stocky; when they have shown second or third leaf, transplant into pots or cold frame. When weather is warm, plant in the open ground. Seeds of a hardy nature, to germinate, require a temperature of 45° to 70°, those of a tender nature, not less than 60° at night, or above 80° in the sun.

In order to secure safety from uncontrollable weather, of most kinds of flower seeds, I would advise starting in boxes in the house, cold frame or hot-bed, especially all the choice kinds, where the moisture, air and better care can be given them, as nearly all kinds are transplanted with safety.

Re As to freshness, furity and quality, all seeds offered in this catalogue will stand test beside the most reliable growers in this country. All who have not time to start seeds in boxes or otherwise early, can follow

GENERAL DIRECTIONS FOR THEIR CULTURE.

HARDY ANNUALS may be sown in the month of May or June. For garden culture use a light, fine compost, composed of garden soil and well-rotted manure in equal parts, spreading a few shovelfuls where the seed is to be sown, to strengthen and increase the growth of the voung plants, sowing the seed where the plants are intended to bloom, and regulate the depth of the sowing by the size of the seeds. As soon as the young plants are an inch or two high, thin out, and keep the earth loose and free from weeds by frequent hoeing.

HARDY BIENNIALS AND PERENNIALS require the same treatment as Hardy Annuals. In addition to the above, they may be sown in the open border in September, and, as soon as the frost appears, cover slightly with straw or dry litter, so as to protect them from the severity of the winter. As soon as the weather will permit in the spring, the covering

should be removed and the earth loosened.

HALF HARDY AND TENDER ANNUALS should be sown in a light, sandy compost, in pots or shallow boxes, in March or April, placed in a warm room or in a moderate hot-bed. The finer seeds should be but slightly covered, and the soil pressed closely over them, and if the house or frame is very warm, they should be frequently watered. As soon as the seed leaf is fully developed, transplant into shallow boxes, two or three inches apart, and when they have acquired sufficient strength, which will be about the latter part of May, transplant into flower beds

Seed should not be sown in the open ground in this vicinity, before the middle of May. More failures are caused by too early sowing than any other cause. As soon as the ground becomes warm, all seeds can be sown.

Annuals bloom the first year and die.

Biennials bloom the second year and die; some,
where sown early, bloom the first and second

where sown early, bloom the first and second years.

Perennials generally bloom the second year, growing and blooming for many years.

brown: 3 feet

Coronata. Rich yellow die son spots; 1 ½ feet, Finest Mixed Varieties, Rich yellow disc, encircled with crim-

CAMPANULA, (Bell Flower.)

This is one of the most useful and beautiful tribes of perennials. Many of the varieties, if sown early in the spring, will bloom the first year.

Mixed Colors Campanula Media. (See Canterbury Bells,) 5

CANDYTUFT.

This is one of the oldest and best known hardy annuals. It can be sown in the fall or spring with equally as good results, where the plants are to bloom. It is a plant that will easily take care of itself, but is much improved by good care and high culture.

White, oz., 25, Candytuft.

White Rocket, White, sweet scented,

Carmine, Purple,

Dark crimson purple Dunnetts, Rose

Mixed colors, oz., 20.

CANNA, (Indian Shot.)

Stately plants, remarkable for their large and hand-some foliage; invaluable for groups in the flower garden, producing a tropical appearance. Sow seed in early spring and they will make strong plants the second year. Half hardy perennial.

Canna, Finest Mixed,

CATCHFLY.

A hardy annual, about one foot high; produces brilliant flowers in great profusion in early summer.

Mixed,

CARNATION.

Few equal the Carnation in form and color, exquisite fragrance and freeness to bloom. The seed has been saved from the most superior collection, only the best results should be obtained. Seed can be sown in open ground or under glass in the

GROUP OF THE DIFFERENT SPECIES OF CARNA-TIONS BELOW NAMED.

spring. The plants will flower the second year, and those which prove single and inferior can be pulled out. Young plants being hardy, will live through the winter, while old ones are killed, It is best to sow seed or increase by layers, in order to keep a succession of flowers. Give them a good rich soil.

Carnation. From extra fine, double, very choicest, from open ground seed, mixed colors,

Perpetual Flowering or Tree. The seed saved from the celebrated collection of ALEGA-TIERRE. Extra fine mixed colors, saved from pot grown plants,

Picotee. Have white or yellow ground, spotted at the edges with scarlet, red, purple, or other colors. I offer seed saved from 25 amed varieties, mixed.

Bizarre, Flakes and Selfs, Bizarres are variegated in irregular spots and stripes, not less than three colors, Flakes are striped, two colors only. Seed saved exclusively from pot grown plants in great variety; mixed,

Good Mixed German. Perpetual

Scoticus. Double Florist or Scotch pinks, saved from the very best varieties of show pinks; selected; extra choice, double,

20

Double White,

Grenadin. Highly valuable to florists and bouquet makers; blooming three weeks earlier than other varieties, in a great profusion of double, scarlet

One packet of each above 6 choicest kinds, in 6 separate packets,

One large packet of the above varieties all mixed in one, (Pinks, also see Dianthus.)

CELOSIA, (Coxcomb.)

Showy plants, producing in the greatest profusion spikes of the most beautiful feathery looking flowers in summer and autumn. Sow seed early and transplant in the open ground in May. Half hardy annuals.

Japonica. A variety of great beauty. The branches are scarlet or crimson; often in pyramidal masses, while the colors are the brightest imaginable,

Cristata Nana. The finest dwarf varieties

Cristata Nana. The finest dwarf varieties mixed, comprising carmine, yellow, crimson and

variegated; 1 foot,

Glasco Prize. New, improved dwarf, with dark leaves and crimson combs; quite distinct, and among the finest, 10

Pyramidalis Plumosa. Pyramid form, representing plumes; 3 feet high; finest mixed colors, 5

CANTERBURY BELLS. (Campanula Medium.)

Very attractive and well known border plants; hardy biennials; 2 feet, 5

Finest Mixed. Single, 5

Double. 5

COBÆA.

A beautiful, rapid growing, climbing plant, with large, handsome, bell-shaped flowers. Sow early in March or April, and plant out about June first. In sowing, plant the seed edgewise and cover lightly; half hardy perennial.

Cobea Scandens. Purple; 20 feet, 10

COBAEA.

CENTAURIA.

These are extensively used for ribbon beds or bor

ders; arranged with Callas and other dark leaf plants, are among the finest for that purpose; sometimes known as "Dusty Miller," and largely used for vases and baskets. Lesow seed in the house in December to March?

Centauria Americans. A strong growing annual variety,

Candidisima. Splendid silvery leaved plant; 1 foot, 25

Clementii. A robust and free growing variety, producing crowns of silvery leaves, deeply fringed and cut; 6 inches, 25

Gymnocarpa. A very graceful, silver-foliaged variety; 1½ feet; most used for ribbon lines, 15 Caynus. Known as "Bachelor's Button." Mixed colors.

CLARKIA.

Often used for massing in the same manner as Phlox Drummondii, with good effect. Seed sown in September bloom in May or June. Improved varieties have been introduced of late, both single and double, size and form of flower. When planted in cool, partly shaded places, are highly recommended. When sown in April they will bloom most of the summer; transplant or thin out to I foot apart.

CLARKIA.

Finest Double Varieties Mixed. Comprising white, pink, purple, red, 5
Best Single Mixed, 5

Mrs. Langtry. Snow-white, with a crimson center; plant dwarf and compact; blooms very freely. (See cut.)

CENTRANTHUS.

Free flowering plants, borne in clusters; used for borders, massing, bouquets, or other floral designs. Seed can be sown in open ground in May; hardy annual.

Mixed Colors. Red and white,

CHRYSANTHEMUM.

The demand has recently largely increased among the large flowering Chinese and Pompon, or small flowering varieties; and is well, they being of so easy culture, and producing such brilliant colors and quantity of blooms at a time when other flowers in autumn are not plenty. Seed can be sown from September to June in boxes, and transplanted to the open ground in May.

Indicum. Large flowering; seed saved from large collections of the best named double varieties; in fine mixtures of CHINESS and JAPANESE or CHINESE and JAPANESE separately,

Namum. Double dwarf pompon; seed saved from the best and most double varieties, in finest mixtures; half hardy perennial.

Mixed Annual Varieties. In mixtures of single and double white, yellow, rose; hardy annual, 5

CLIANTHUS DAMPIERI.

(Glory Pea.)

shrubby climber, with neat foliage and drooping clusters of large rich scarlet, pea-shaped flowers 4 inches in length. It requires a dry, warm soil, and should be watered but sparingly. Remove to the house when cold weather comes. Annual.

CLIANTHUS,

CLEMATIS.

A hardy climbing vine, much used for covering arbors, verandas, fences, or rocks; adapted to all soils. Sow the seed in the fall or winter in shallow boxes; they will often lie dormant and germ. inate in the spring; transplant to the open ground when two luches high; are hardy, but a lit le protection in winter will benefit them.

Flammula. White; very fragrant; 15 ft., Coccinea. A new scarlet, of rapid growth, and profuse bloomer, of much value,

Jackman's Hybrids. Seed saved from Jack-

man's celebrated collection; mixed varieties of purple, lavender, white. Sow seed any time from September to May, in boxes.

Virginiana. The well known Virgin's bower: greenish white; 15 feet, 10
Viticella. A strong, hardy grower, with blue or

purple bell- shaped flowers in profusion,

CONVOLVULUS.

The climbing varieties, C. Major, or Morning Glory, produce a fine effect when grown on rock-work, stumps of trees, or banks, and when trained over trellises, rustic work or rough fences, the beauty and delicacy of their color are unsur-passed. C. Minor and its varieties are admirably adapted for beds and mixed bor-ders; half hardy annuals.

Aureus Superbus. Golden yellow; 6

5

Major. (Morning Glory.) Fine mixed varieties, 12 sorts mixed. Per oz., 20 cents, White. Striped, violet,

Rose, Dark Red, Violet,

C. Mauritanicus. Blue flowers; beautiful for hanging baskets, 10 inor Tricolor. Dwarf; violet, purple and Minor white; 1 foot. Per oz., 25 cents,

COLEUS.

The Colcus for ornamental purposes is well known, whether for bedding or other decorations, where colored leaved plants are desired. They are grown so easily and make such fine specimens in so short a time that their merit can scarcely be over estimated. Sow seed in a warm room of 70°,

from January to April; tender annual.

New Hybrids. These seeds may be expected to produce very beautiful and distinct sorts,

CINERARIA HYBRIDA.

CINERARIA HYBRIDA.

For winter and spring blooming, for the house or conservatory, few can equal them in brilliant dis-play; their brightness and beautiful colors and freeness to bloom, render them among our best winter and spring blooming plants. Their colors range from pure white, brilliant velvety crimson, purple, blue, rose and carmine, plain and with large white centers.

Cineraria Hybrida Grandiflora. Large

flowered, prize varieties, in finest mixtures. This

strain is unsurpassed, 30
Choice Mixed, 20
Dwarf Mixed. Large flowering, 25
Double Mixed. Saved from the finest double

flowers only,
fl Maritima. called "Dusty Miller,"

CUPHEA.

This forms a pyramidal-shaped plant growing about 3 feet high, and studded during the winter months with countless red blossoms.

Cuphea Platycentra,

OYCLAMEN.

CYCLAMEN.

Bulbous plants, and one of the most beautiful and highly valued for greenhouse and dwelling, blooming from January to May in profusion; flowers much used in bouquets, wreaths and baskets. Sow seed in July or August, weather and taskets. Sow seed in July or August, or in the greenhouse in February to April, in a warm place, plants will bloom the following year; half hardy perenial. (See cut.) My strain is equal to the finest extant.

Persicum. Finest mixed. 30 Extra Choice. Mixed, Extra Choice.

Scarlet. Very brilliant; 15 feet; tender annuals, 5
White. A beautiful contrast; 15 feet,

5

Mixed Colors, oz., 30 cents,

DIANTHUS CHINENSIS.

DIANTHUS.

The species of Dianthus are among the most brilliant of our garden flowers. Plants of the tall sorts are from 12 to 15 inches in height, while the sorts are from 12 to 15 inches in height, while the dwarf kinds make low, compact bushes. Seed may be sown in the spring, under glass or in a seed bed. When sown early, will bloom the first year, flowering more freely the second year. Their rich and varied colors are highly valued, which are represented in but few o her flowers, and the ease of culture wins them a place in all dower gardens; they are perfectly hardy, but generally bloom but two summers; hardy biennials.

Chinensis. Finest selected, excellent strain, double varieties, mixed, oz., 35, 5

GLADIOLUS.

The seed I offer has been carefully saved from the finest named hybrids. Half hardy bulbs. See special list of summer bulbs. Gladiolus. From the finest named varieties,

French hybrids; mixed,

Small Bulbs. Saved from the finest named varieties. Most of them will produce flowering bulbs for next season. Twenty small bulbs from good mixtures,

Gladiolus Lemoinei. This new strain is dis-tinct, having flowers almost round, of very strik-ing colors and markings; being hardy, will be largely grown. The variety of flowers is wonlargely grown. The variety of flowers is won-ground derful; are easily obtained from seed, and when sown early, bloom the first year. Packet,

FUCHSIA.

My seed of this well known and popular plant has been saved from a spleudid selection consisting of the finest named varieties; half hardy perennial.

Fuchsia. Double and single, extra choice mixed, from mixed varieties.

FRENCH HONEYSUCKLE.

(See Aquilegia.)

GILIA.

Very pretty dwarf plants; will bloom in almost any situation; hardy annuals. All Colors Mixed,

FRENCH ODIER PELARGONIUM.

GERANIUM, Pelargonium.

Except Verbena, the geranium is now cultivated more than any other plant. Its freeness from insects and disease, easy culture, bright and varied tolors, free blooming qualities, render it one of the most popular plants for house, bedding or garden culture. The seed offered below has been saved from the choicest foreign and American collections, comprising all shades and colors.

Zonale. Good mixed,

Seed saved from my collection of over 150 varieties of double and single mixed

Double. Selected from the most superior varieties, giving wide range of colors, artificially fertilized by one of the most skilled growfers in the world, and is believed to produce a large percentage of double flowers, 40

Fancy Pelargonium French Blotched or

Odler. Sometimes known as Lady Washington. Seed saved from the very choicest first class flowers selected. (See cut.)

New Golden Bronze. Saved from celebrated strains; has gained many first class prizes,

Golden Tricolor. Hybridized with great care, and saved from the best varieties only, 25 Ivy Leafed, From best named varieties, 25

One pkt each of above 7 varieties, \$1.30 by mail, prepaid. Retail price, \$1.70. No other discount.

GRASSES, (Ornamental.)

Many of the varieties are very curious and beautiful, and when dried and tastefully arranged in connection with the Everlasting Flowers, make exceedingly attractive winter bouquets. They are mostingly attractive winter bouquets. They are most-ly annuals, and those which are not—with the ex-ception of Pampas Grass—flower the first year. The plants should be transplanted or thinned out sufficiently to afford space for the growth of *each, as soon as they can be handled. This will allow them to develop their true character.

Purple Violet,

NOLANA.

An extremely beautiful, free-flowering genus of trailing plants, the flowers resembling the Convolvulus Tricolor, but softer in color, while some are beautifully penciled; fine for rock work, hanging baskets, old stumps, etc.; hardy annuals.

Nolana. Fine mixed.

NIGELLA, (Love-in-a-Mist.)

Interesting, free flowering plants, of the easiest culture, growing in any garden soil; hardy annu-

Nigella. Fine mixed; 3-4 foot,

ŒNOTHERA, (Evening Primrose.)

A very beautiful, free-flowering and useful class of ! plants, flowering generally in long spikes. Fine Mixed Varieties.

OXALIS.

Very attractive and beautiful plant, with richly colored flowers, suitable for greenhouse decoration, or for rock work, rustic baskets, and out of doors; half hardy perennial.

Finest Mixed. All colors,

DOUBLE PETUNIA.

PETUNIA.

The Double Petunia is much prized as a house plant, and as market plants for the florist they are highly valued. The improvements in this class during the past few years are perfectly wonder-ful, forming, as they now do, such doubleness and deeply cut or fringed petals as render them highly effective and beautiful decoration plants; half hardy perennials

New Double Fringed Grandiflora Fimber-

ata. This strain always yields 25 to 30 per cent. of double flowers, fringed; rich and delicate tints, and variegated in great variety; seldom fails to receive the highest praise,

New Double Dwarf Robusta Flora Plena. Its growth is compact and symmetrical, ranging in many colors, producing flowers so freely as to often represent an arranged bouquet, 50

New Double Flora Plena. This strain is

saved from carefully fertilized flowers, and will produce a large percentage of double flowers, blotched and striped,

SINGLE PETUNIA.

The Single Petunia is beautiful and effective for massing in beds, and much cultivated as house plants. Being delicate seed, it is best to start them under glass in February, March or April. They will commence to bloom in June and continue for the season, if planted in the open ground in May Many superior strains of Single Petunias have recently been introduced of great merit.

Hybrida Grandiflora. From the best German collections, large flowers, blotched, fringed, mottled, variegated and green edge, of unsurpassed quality; finest colors mixed,

Grandiflora Marginata. Large, bordered and

veined with green, 25
Fimberata Maculata. Large flowers of the finest colors; fringed, blotched and striped, 25
Dwarf, Nina Compacta. Dwarf, compact habit, a most profuse bloomer, with mottled, habit, a most profuse bloomer, with mottled, and striped flowers.

blotched and striped flowers, Allen's Selected Fringed. This seed is saved

from the very best single varieties, comprising all shades and colors of fringed, blotched, striped, and plain colors, green edge, etc.,

Belle Etoile. A remarkably oeau
flowering strain, blotched and striped, oeautiful, large

Common. Mixed.

Grandiflo a Intus Aurea. A new large flow-ering, yellow throated variety of large size and faultless form, with yellow extending deeply into the throat, and one to two inches across the flower, beautifully veined, coming true from seed in white, crimson, purple, varieg ted. Pkt., 50

PORTULACAS.

These brilliant hardy annuals produce in summer variously colored showy and attractive flowers in greatest profusion. The double Portulaca is one of the most showy and desirable, and has proved quite constant from seed.

Grandiflora Fl. Pl. Double. Seed offered has been saved with the greatest care from the most double flowers, and of the brightest colors,

Single. Mixed colors,

PYRETHRUM, (Feverfew.)

Very handsome and interesting herbaceous plants, succeeding in any garden soil; hardy perennials.

Hybridus Fl. Pl. New varieties of this beautiful, hardy plant, saved from double flowers

only, Lanciniatis (Golden Feather.) Aureum. Bright, golden foliage; one of the best bedding plants; deeply cut leaves, 10
Golden Gem. One of the best varieties for mass

ing in lines or otherwise; flowers double,

PANSY.

Sow the seed any time from September to March. For summer flowering, sow any time in February, March or April, in shallow boxes in the house or March of April, in shallow boxes in the nouse or in hot heds in light soil, cover the seed lightly and press the s il firmly; water and keep the soil moist until the seedling plants appear. The Pansy seed germinate best in a temperature of fifty to sixty degrees. As soon as two or three of the leaves appear, transplant in shallow boxes. A cool room is the best to keep them in until the round heaves appear appear, the proper water appears in the sample water. ground becomes warm enough in the spring, when they may be planted out at once. To those who have a hot bed or cold frame, it would be best to let them remain a few weeks before planting out. The great improvement made in the Pansy has rendered them extremely popular. For massing in flower beds, their bright and lively faces, together with their rich and beautiful colors, render them indispensable to the flower garden. New sorts, see Novelties.

PINK, (See Carnation.)

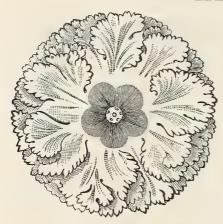

CHINESE PRIMULA PLANT. (PRIMROSE.)

PRIMULA, (Chinese Primrose.)

For the house or conservatory in winter, the Primrose ranks first as a continual bloomer, requiring the least care and sun, and most free from insects, of any plant in cultivation, producing flowers in the greatest profusion. The seed is saved by one of the largest European growers, who is noted for his superior strain of Fringed Primulas; many are so deeply fringed with overlaping petals as to appear almost double. I used the best of care in selecting seed from the latest improved and most highly prized varieties. Sow seed in March or April, and you will have fine plants for winter blooming. Great improvement has been made with these flowers within a few years.

Plant dwarf, half globe shape and very compact; flowers deeply fringed; rose, white, crimson and striped, mixed, 50 Magnifica. Flowers of immense size and fine substance, almost double, pure white, and deeply fringed, 50

DOUBLE PRIMULA.

PHLOX DRUMMONDII.

The Phlox Drummondii is one of the most useful annuals cultivated. For massing in groups, orarranging in ribbon lines, I think there are no flowers obtained with so little care and expense, that give such an abundance of rich flowers from July to November, being the most desirable of the whole class of annuals, the colors ranging as given below. The seed sown in cold frame, hot bed, dwelling house, or in seed box, gives them an early start, ready to be planted in the open ground four to six weeks later. They will soon show bloom and continue until killed by hard frosts. They can be sown in open ground, but it is more safe to start in boxes, the seed generally comes better and more plants will be obtained. Set the plants 8 to 12 inches apart. For ribbon lines, white, scarlet, rose, blue and purple, should be set, to give a good contrast in color.

Auricula-flowered. Flowered in trusses of immense size and of exceedingly beautiful colors, 10

Double Flowering. Finest mixed, from a splendid collection of double flowers, Double White, Single

Hunt's Perfection. Distinct eyes and beautiful margin; splendid strain.

SUNFLOWER.

(See Helianthus)

SOLANUM.

Covered all winter with a profusion of scarlet fruit; handsome plant for a green house or sitting room. Solanum Capsicastrum. 1½ ft.,

STOCK, (Ten Weeks.)

The stock is one of the most important flowers for summer and fall blooming, and nearly equal to the Carnation in size and doubleness of flower. They are much used by florists for arranging bou-'quets and floral designs. The seed can be sown at any season; for summer flower, sow in March, transplant when two inches high, and will commence to give flower in July, continuing till hard frost, and if lifted carefully, will bloom in the house all winter, but is better to sow seed in Aug-ust or September for young plants to bloom in the winter, as they will give larger and better flowers; hardy annual.

Pyramidal Large-flowering. A plant of pyramidal habit, with long spikes of large flowers; growing 12 inches high; blooming early; one of the best for florists' use; many choice colors mixed,

Boston Florists' Double White. Largest-flowering Pyramidal Dwarf.
White, rose, carmine, blue, violet, red, chamois, yellow; each color very double; fine for plants, 15 argest-flowering Pyramidal Dwarf, Largest-flowering Pyramidal Dwarf, Blood Red. The richest, deepest colored stock grown.

Early Autumn-flowering. Commences flow-ering in the autumn, and if removed to the house, will bloom during the winter; mixed colors, Dwarf, Ten Weeks, Mixed. Not over 30 per

cent of these come double from open ground seed,

New Perpetual. This produces flowers continually when once in bloom, during the whole year; very double form, growing 12 inches high, and will grow three feet through if given room, and produce quantities of flowers; mixed colors, 20

Large-flowering Dwarf Pyramidal,
Snow Flake. New; pure white, 20

10

VEGETABLE SEEDS.

SOWING SEED.

In sowing seed, never cover too deep. It should be regulated by the size, covering only a little deeper than the size of the seed. In hot, dry weather, the soil should be rolled after covering, that the seed may germinate quickly.

It is of great importance in sowing seeds, either in hot bed or open ground, that the temperature should be right. Cabbage, Cauliflower, Lettuce, Radish, Beets, etc., will germinate freely in a temperature of about 50°, while Tomato, Pepper, Egg Plant, etc., require a temperature about 15° higher. A little care on this point would save a great deal of injury to the grower, as well as to the seedsman, who is often blamed for selling worthless seeds, when the fault lies wholly with the one that sows them.

In offering the following list of Vegetable seeds, I would say that my stock has been selected with the greatest care in regard to purity and freshness. and can be relied on as being the very best in quality. I invariably test all seeds offered for sale by me. Great care is used to supply every article true to name and of good quality.

ASPARAGUS.

ASPARAGUS.

Sow early in spring, as soon as the ground will admit of working, in rows a foot apart; the plants will be in a condition to set out the succeeding spring. Previous to sowing the seed, soak in tepid water for 24 hours.

Add 16 cents per pound if sent by mail.

Conover's Colossal. A variety of large size, tender, productive, and of excellent quality. Pkt. 5c.; oz., 10.; 1-4 lb., 20c.; lb., 60c.

3.00

40

Moore's New Giant. Superior to Conover's Colossal in every respect, and has been awarded many first class prizes. Pkt., 5c.; oz., 15c.; 14 lb., 35c.; lb., \$1.25.

ASPARAGUS ROOTS.

ARTICHOKE, (Jerusalem.)

Grown for tubers, which resemble potatoes, cultiva-ted in a similar manner when planted for field culture; make hills about four feet apart. Tubers, price per quart, 25c.; pk., \$1.50; 3 lb. package by mail, \$1.00. Seed, Large Globe, packet 10c.; oz., 35c.

BEETS.

Soak the seed for 24 hours in warm water, and sow immediately in drills 15 inches apart, one inch deep. The best soil is a light, rich, sandy loam, well manured with decomposed compost, carefully worked in. For an early supply, sow as soon as the ground can be worked in the spring, and about the middle or end of May for a general crop. Successive sowings are recommended during the season till the end of June. Thin the plants to a distance of about 6 inches, and keep the ground well stirred. Harvest before severe frost, and cover in the cellar with sand or dried earth. Per

Add 16 cents per pound if sent by mail.

Egyptian Turnip. The earliest variety; deep blood red; small and upright leaves, whereby it can be grown nearly twice as close as any other variety. Pkt., 5c.; oz., 10c.; 1-4 lb., 15c.; lb., 60c. **Eclipse**. This is becoming one of the most popu-

lar varieties for market gardens, and a much bet-

lar varieties for market gardens, and a much better table beet than the Egyptian. (See Novelties.) Pkt., 5c.; oz., 10c.; 1.4 lo., 25c.; lb., 80c.

Bastain's Blood Turnip. One of the best early blood red varieties; very uniform, smooth, round, small top, excellent for market, early or late. Pkt., 5c.; oz., 10c.; 1.4 lb., 15c.; lb., 50c.

Early Bassano. Very early; not blood red. Pkt., 5c.; oz., 10c.; 1.4 lb., 15c.; lb., 50c.

Early Blood Turnip. The standard early sort; an excellent variety for summer and winter. Pkt., 5c.; oz., 10c.; 1.4 lb., 15c.; lb., 50c.

Dewing's Improved Blood Turnip. Roots blood red; of fine form and flavor; very desirable

blood red; of fine form and flavor; very desirable variety. Pkt., 5c.; oz., 10c.; 1-4 lb, 15c.; lb.,

SUGAR BEET AND MAN-GEL WURZEL, (For Feeding Stock.)

Sow from the 15th of April until June, at the rate of 4 to 6 pounds per acre. Sugar beet and Mangel Wurzel stand unrivalled as an indispensable root for cattle, and largely increase the flow of milk, without imparting an unpleasant flavor. Packet, 5c.; oz., 10c., except where noted.

Add 16 cents per lb. if sent by mail.

Lane's Improved Sugar. An improved large white sugar beet. 1-4 lb., 15c.; lb., 45c.; 5 lbs., F \$2.00.

White Silesian Sugar. Rapidly growing in favor for stock feeding, producing from fifteen to twenty tons per acre. Used in Germany and this country extensively for the manufacture of sugar. Oz., 10c.; 1.4 lb., 15c.; lb., 40c. (See cut.)

Vilmorin's Improved French White Sug-

This is the variety grown by the French for the manufacture of sugar. Oz., 10c.; 1-4 lb., 15.;

Norbitan's Giant. The finest variety of the Long Red Mangel Wurzel for feeding stock. Oz., 10c.; 1-4 lb., 15c.; lb., 40c.

Yellow Globe Mangel Wurzel. Roots of large size and globular form; very productive; keeps better than the Long Red, and is better adapted for grow ing in shallow soil. Oz., 10c.; 1.4 lb., 15c.; lb., 40c.

Kinver Yellow Globe. A new and very productiv. variety; one of the best. Oz., 10c.; 1-4 lb., 15c.; lb.,

Yellow Ovoid. An intermediate variety between the Globe and Long Red: quite free of roots and a heavy cropper. Oz., 10c.; 1-4 lb., 15c.; lb., 50c.

WHITE SILESIAN SUGAR.

Golden Tankard.

This variety admits of close culture, and will be found the best producing variety of the intermediate class. It is very solid, small top, smooth and broad. Oz., 10c.; 1-4 lb., 15c.; lb., 50c.

Long Red Mangel Wurzel. This variety is more generally grown for agricultural purposes than any other, producing roots of large size and of excellent quality. 1-4 lb., 15c.; lb., 40c.

GOLDEN TANKARD

MANGEL.

BEANS, (Dwarf or Bush.)

A succession of sowings may be made from the first of May until September. Plant in drills about two inches deep, and from 18 inches to two feet apart. Per pkt.,

Add 30 cents per quart if sent by mail.

Black Wax. The pods, when ripe, are of a waxy yellow; transparent; very tender and delicious. Qt., 20c.; pk., \$1.25.

Crystal White Wax. Small pods, and beans very rich and tender in the green state, and very prolific; color, waxy white, transparent pods, and stringless. Its pods are quickly developed, and slow to harden, retaining their tenderness a long

time. Pkt., 10c.; qt., 30c.

White Wax. One of the most useful of the White Wax string beans. Yellow pods. Pkt., 10c.; qt., 30c.; pk., \$1.50.

GOLDEN WAY.

Early Golden Wax. This sort is one of the most valuable early string bush beans. A distinct variety, one week or ten days earlier than the Dwarf Black Wax; pods large, long and brittle, and entirely stringless. As a Snap bean it excells all others in tenderness, richness of flavor, and has the further merit of being one of the best shell beans grown for winter use. Pint, 15c.; qt.,

25c.; pk., \$1.75. (See cut.)

Longwood. (New.) This is considered the carliest variety grown; very prolific, bearing three dozen pods on one plant. Packets only,

(New French.) It is said to be the largest podded variety in cultivation, pods measuring 12 to 16 inches in length. The most attractive variety for exhibition. Pkt., 10c.

Canadian Wonder. Large abundant pods; very tender. Pkt., 10c.; pt., 20c. Flageolet Chevrier. (New.) This is remarkable for keeping its pods and beans in the green

wonder of France. A new French variety, very early and productive. The leaves drop just before maturity of pods, which then ripen very quickly, leaving the beans of a beautiful color. Pkt., 10c.

Cleveland's Improved Valentine, [True,] An improved variety of the Valentine, so much grown for a market string bean. Two weeks carlier than the common Red Valentine. Pkt., 10c.;

qt., 25c.; pk., \$1.50

Horticultural, or Cranberry Bush. Owing to the great amount of labor in poling beaus, this variety is much used in place of Horticultural Pole, which is much earlier and a great producer It is in great demand by market men, and as a dry bean is far richer than the pole variety for family

use. Pkt., 10c.; qt., 25c.; pk., \$1.50.

Refugee, or Thousand to One. A very prolific bush sort. Pkt., 10c.; qt., 30c.

Early China. Very early; string or shell; popu-

lar and productive. Pkt., 10c.; qt., 20c.; pk., \$1.25.
Early Mohawk. Suitable for northern latitudes; is less susceptible to injury from cold than most of the others; productive; good quality. Pkt, 10c.; qt., 20.; pk., \$1.40.
White Valentine. The habit of growth of this

variety is similar to the well known Red Valentine. It is a very prolific bearer. Pkt., 10c.; qt.,

Pea Bean. Very productive, small, nearly round; grown for field culture. Qt., 15c.; pk., 85c.; bu., \$3.00.

White Marrowfat. Extensively grown for sale in the dry state. Qt., 15c.; pk., \$1.00.

White Kidney. A much esteemed field bean. Pkt., 5c.; qt., 15c.; pk., \$1.00; bu., \$3.50.

Ref. Kidney. A standard red sort. Pkt., 5c.; qt., 15c.; pk., \$1.00; bu., \$3.25.

Improved Yellow Eye. Very strong and prolifts: one of the best for believe.

lific; one of the best for baking. h Pkt., 5c.; qt., 15c.; pk, \$1.00; bu., \$3.00.

BEANS, Pole or Running.

These succeed best in sandy loam, which should be liberally enriched.

Improved Large Lima. mproved Large Lima. Its noted improve-ment is its remarkable earliness; its great productiveness and delicious flavor are unequalled. Pkt.,

10c.; qt., 30c.

Early Lima or Sieva. Earlier and more hardy than Large Lima. Pkt., 10c; qt., 30c.

King of Limas. Larger and more productive than other Lima varieties. Pkt., 15c.

Dutch Case Knife. A very productive variety, and one of the earliest. Qt., 25c.; pk., \$1.75. Horticultural or Speckled Cranberry. A

popular variety for private use, or market gardener, equally serviceable in green state or when shelled. Pkt., 10c.: qt., 25c,; pk., \$1.75. German Wax. One of the best either for snap or shell in the green state Pkt., 10c.; pt., 15c.

Scarlet Runner. An ornamental plant and a useful vegetable. It grows to the height of ten feet, producing scarlet flowers. Pkt., 10c.; pt.,

Dreer's Improved Large Lima. Produces a larger yield than Large Lima. Pkt., 10c.; qt.,

White Runner or Dutch. Similar to Scarlet Runner, except in color of seed and flower. Pkt., 10c.; qt., 30c. Ward Long. Pods grow two to three feet long.

Pkt., 15c.

Painted Lady. For use or ornamental. Pkt.,

Add 30 cents per quart if sent by mail, or 15 cents per pint.

BROCCOLI.

Nearly allied to the Cauliflower, but more hardy and sure to head It succeeds best in moist and rather cool atmosphere. Per pkt.,

White Cape. Heads medium size, close, compact, and of a creamy white color; one of the most certain to head. Oz., 50c.

Purple Cape. Differing from the preceeding in color which is of a greenish purple. Oz., 50c.

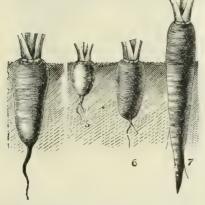

BRUSSELS SPROUTS.

This is one of the best vegetables for winter use, producing from the axils of the leaves an abundance of sprouts, resembling small cabbages.

Tall French. Pkt., 5c.; oz., 15c. Dwarf Improved. Pkt., 10c.; oz., 35c.

CARROTS.

Rather light loam is the most suitable for the Carrot. The ground should be well enriched with fine rotted manure, six or eight cords to the acre. Plant in rows 15 inches apart, and then plant 3 to 5 inches in the rows, according to the variety. Plant from 1st to 15th of May to ensure a crop, and often good crops are harvested when sown as late as June 10th. The dry weather which prevails at that season is apt to prevent the germination of the seed. In such cases it is better to increase the quantity of seed, being more certain to yield a good crop Seed is sometimes soaked to hasten germination. Hoe often, and keep very clear from weeds.

Early Scarlet Horn. For forcing; color, deep orange, excellent for table. Pkt., 5c.; oz., 12c.;

1.4 lb., 30c.; lb., \$1.00. [Fig. 5.] Short Horn The standard carly variety. Sweeter than Long Orange, and more solid; good to color butter. Pkt., 5c.; oz., 12c.; 1-4 lb., 30c.; lb., \$1.00.

Long Orange. Good for stock; a standard field carrot. Pkt., 5c.; oz., 10c.; 1-4 lb., 20c.; lb., 75c. Improved Long Orange. Of a darker and richer color than Long Orange. Pkt., 5c,; oz., 10c.; 1-4 lb., 25c.; lb., 75c.

INTERMEDIATE.

Danvers. Between Long Orange and Early Horn; smooth, of a rich orange color; is considered more profitable to raise than Long Orange; 20 to 30 tons to the acre under the best cultivation. Oz., 10c.; 1-4 lb., 25c.; lb., 80c. [Fig. 8.] Large White Belgian. Largest of all,

most productive. Good for horses; the whole can be pulled by hand. Pkt., 5c.; oz., 10c.; 14 Ib., 20c.; Ib., 50c. [Fig. 7.]
Intermediate. In many respects this is a supe-

Thermediate. In many respects this is a superior variety to the Danvers, growing more bulk to the acre. A very handsome smooth variety. [See cut above.] Farmers who give it a trial will, I think, be pleased with it. Pkt., 5c.; oz., 10c.; 1.4 lb., 25c.; lb., 80c.

Guerande. Pkt., 5c.; oz., 15c.; 1.4 lb., 30c.; lb.,

\$1.15.

Add 16c. per found if sent by mail.

Market Cardeners and all in want of good Cabbage seed, will, I think, be pleased with my stock which is grown and selected with special care.

EARLY DEEP HEAD BRUNSWICK.

CABBAGE.

They produce the best results on strong soil, previously cultivated one year with corn or potatoes; seldom succeeding where followed by cabbage or turnips. The stronger the land, the better they will head. Plough deep without turning up much poor subsoil, and manure liberally with well rotted manure, applying broadcast, lightly turning un der or working well into the soil with a disk or acme harrow. A light dressing of guano, superphosphate, or bone and ashes raked into the soil around the plant, assist greatly in increasing its growth.

Sow the seed for the carly varieties in February, March, or April in hot bed, greenhouse or other suitable place, in boxes. When the second leaf appears, transplant from one to two inches apart, giving plenty of air and light to avoid growing slim and tall. When the ground becomes warm When the ground becomes warm and settled in April or May, transplant in the field in rows two to three feet apart according to variety, setting plants 18 to 30 inches apart in the row, hoeing often till the leaves nearly cover the

For late varieties, sow seed in open ground from 1st. to 25th. of May in this section, and transplant where they are to grow, dropping 3 to 5 seed in each hill, the last of May, or early in June, being careful not to let the insects or weeds overtake them. When of sufficient size, thin out all but one plant, keeping the ground well cultivated.

Early Deep Head Brunswick. An improve ment on Fottlers Early Drumhead, being equally as early, of deeper, thicker heads, making it of more value for market to both dealer and grower, as it weighs more and is very solid; being of more value for winter keeping. Pkt., 10c.; oz., 25c.; 1-4 lb., 85c.; lb., \$3.00.

Fottler's Early Drumhead. A week to ten days later than Winningstad, with large flat heads; select stock. Pkt., 5c.; oz., 20c.; 1-4 lb.,

65c.: 1b., \$2.35.

Early Winningstadt. One of the best for general use; very solid, of medium size, cone shape, maturing a few days later than the Wake A remarkable cabbage for all kinds of soil. Pkt., 5c.; oz., 20c.; 1-4 lb., 55c.; lb., \$2.00.

Filderkraut. A new German cabbage introduced from Germany; the most solid variety grown; almost as hard as marble, and sure to head; short stump; good size. Pkt., 5c.; oz., 25c.; 1.4 lb., 75c.

IMPROVED JERSEY WAKEFIELD.

Improved Jersey Wakefield. True American grown seed. This is a favorite with gardencan grown seed. This is a favorite with gardeners in all parts of the country; early, good size and quality, very reliable for heading. This seed can be relied upon as equal to any offered; grown from tine specimens only. Pkt., 5c.; oz., 25c.; 1 4

b., 75c.; lb., \$2.75.
Warren's Stone Mason. An improvement on the ordinary Stone Mason. In every respect far superior, and very popular with market men. A little later than Deep Head; forms a round, very solid head, keeping excellent in winter. One of the most profitable for winter use and planted in preference to Flat Dutch. Pkt., 10c.; oz., 30c.; 14 lb., \$1.; lb., \$3.50.

Premium Flat Dutch. This is grown from select stock. Large, late, excellent for winter and a standard in some sections. Pkt., 5c.; oz., 20c.;

1.4 lb., 65c.; lb., \$2.00. Henderson's Early Summer. A very pop-

ular early, large, flat head variety, to follow Wakefield. Pkt., 5c.; oz., 25c.; 1-4 lb., 85c.; lb., \$3.00.

Marblehead Mammoth. The largest of all cabbages. Heads have been grown weighing 60 pounds. Pkt., 10c.; oz., 30c; 4 lb., 75c.; lb.,

PERFECTION DRUMBEAD SAVOY.

Perfection Drumhead Savoy. The best Savoy variety, large, thick, solid heads, compact and finely curved; a superior strain of the most tender and finest flavored of all cabbages. Pkt., 10c.; oz., 25c.; ½ lb., 65c.; lb., \$2.50.

Low's Peerless. (New.) A cross between Fottler's Brunswick and Wakefield. Is claimed to be earlier and larger than Henderson's Summer, and gives better satisfaction than any other early drumhead. Pkt., 10c.; oz., 30c.; 1-4 lb., \$1.00; lb., \$3.50.

S1.00; 10., \$5.30. Early Etampes. An extra early cone-shaped variety. Pkt., 10c.; oz., 30c. Blood Red Berlin. A new variety of much promise: very deep red, good size and short stump; earlier than the preceding, and solid. Pkt., 10c.; oz., 35c.

Red Drumhead. Larger than Red Dutch; very solid and reliable for heading. Pkt., 5c.; oz.,

solid and reliable for heading. Fac., oc., oz., 50c.; 14 lb., 75c; lb., \$2.80.

Red Pickler. An early, pointed, red variety, resembling Winningstadt in shape; heads very solid; of intense dark reddish color. Pkt., 10c.; oz., 30c.

Blood Red Erfurt. A new early variety of recent introduction. Pkt., 10c.; oz.. 30c. Any new varieties, I will furnish 6 packets of 6 varieties for 50c.; or 6 packets of any 5c. packets for 25c.

CUCUMBER.

Plant in warm, rich, sandy soil, in hills 4 feet each way. Place two shovel-fulls of well rotted manure in each hill; cover with soil lightly, planting 8 to 12 seed in each hill, covering ½ an inch deep. When well advanced, pull out, leaving 4 plants. Guano, phosphate, ashes, bone, are also good fertilizers when applied lightly in each hill. Dust with lime plaster or slug shot to protect from in sects.

WHITE SPINE.

Peerless. Best strain of white spine cucumber in cultivation; fine; perfect form; crisp; very productive. For early market or family use it is much valued. Pkt., 5c.; oz., 10c.; 1-4 lb., 25c.; lb., 80c

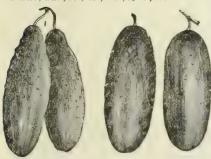

Early White Spine. A favorite market variety, of medium size; deep green; flesh crisp and of fine flavor. [Fig. 2.] Pkt., 5c.; oz., 10c.; 14 lb., 25c.; lb., 75c.

Boston Pickling. Used about Boston by market gardeners for pickles more than any other variety. Pkt., 5c.; oz., 10c.; 1.4 lb., 25c.; lb., 80c. Early Cluster. A much esteemed early sort,

growing in clusters; extremely productive. (Fig. 1.) Pkt., 5c.; oz., 10c; ¼ lb., 25c.; lb., 75c. ong Green. A fine, large fruit, of finest quality; excellent for pickles. Pkt., 5c.; oz., 10c,; ¼ lb., 20c.; lb., 75c. Long Green.

Early Frame. An old and popular variety, of medium size. Pkt., 5c.; oz., 10c.; 1/4 lb., 25c; lb., 75c.

Short Green, or Gerkin. Similar to Early Frame; Pkt., 5c.; oz., 10c; ½ 10., 75c.

Green Prolifie. One of the best varieties for pickling, and the most prolific. Uniform in size. Pkt., 5c.; oz., 10c.; ½ lb., 25c.; lb., 80c. nake. Grows 5 to 6 feet long, coiled up like a

Snake. snake. Pkt., 10c.

Add 16 cents per pound if sent by mail.

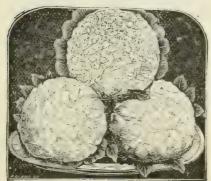

CRESS, OR PEPPERGRASS.

A well known pungent salad. Requires to be sown thickly and covered very slightly, at frequent intervals, to keep up a succession, as it soon runs to seed.

Extra Curled. Very fine; may be cut two or three times. Pkt., 5c., oz., 10c.; ¼ lb., 20c.; lb.,

Water Cress. English. Plant along streams of water. Pkt., 10c.; oz., 50c.

CAULIFLOWER.

· EARLY SNOWBALL.

One ounce of seed will produce about 3000 plants. They require about the same treatment as Cabbage. A good supply of manure is necessary to give a quick, healthy growth. In a dry season a liberal supply of water and liquid manure is very beneficial applied two or three times a week. plants in rows 2 1/2 feet apart by 2 feet in the row. In blanching, gather the leades and tie loosely, or turn the leaves over the head and place a small stone thereon to keep them in place.

Early Dwarf, White Erfurt. An excellent variety, producing heads of large size; white, compact and tender. Pkt., 1. c.; oz., \$1.50.

Early Paris. A well known, excellent variety; very early and tender, is more inclined to give good results where other varieties fail. Pkt., 15c.; oz., 75c.

Henderson's Early Snow-Ball. Very early: dwarf; producing heads fine and white; good size and tender. True. Pkt., 20c.; oz., \$3.50.

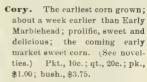

Lenormand's Short Stemmed. Large, fine

heads. Pkt., 15c.; oz., \$1.50. Early Giant Italian. Very fine for northern

climate; large white head; early and productive. Pkt., 15c.; oz., \$1.50.

CORN.

Early varieties can be planted in rows three feet by two, or in drills two and one half feet apart, thin-ning out to ten or twelve inches. The late variety rows should be three or three and one half feet apart; the hills three feet apart, or thinning out in drills to twelve inches apart. Is not best to plant till the ground becomes warm; here loth to 20th of May, and follow in succession every two weeks till July; or a succession of early medium and late varieties can be planted all at the same time for a supply for the season. Cory, Shaker's Early, Black Mexican, Evergreen, are four excel-lent sorts. Owing to cold and short seasons, sweet corn will not always ripen to germinate as well as the yellow varieties. For this reason it is better the yellow varieties. For this reason it is better to plant two or three more kernels in each hill than is wanted to grow. In some seasons it is difficult to dry sufficiently for seed before cold weather approaches, and if frosted before thoroughly dry, is liable to kill the germ; and to be safe I would always recommend seeding one-third more than is required to grow, particularly with late varieties. Sweet corn seems more sensitive to cold weather than yellow varieties. Good seed planted in cold, wet weather, will often fail, when if planted later in warm, dry soil, all will

Shaker's Early. To follow Corv is an excellent variety, ripening with E. Minnesota, while the ears are much larger; white and very sweet. Pkt., 10c.; qt., 25c.; pk., \$1.25.

Black Mexican. The sweetest and most tender of all varieties. Its color is not black till fully ripe; white when in the green state; eight rowed of medium size; medium to ripen; two and three ears on a stalk; very profitable for family or market. Packet, 10c.; qt., 20c.; pk., \$1.00.

CORY SWEET CORN.

It requires 1 qt. to 200 hills; 1 peck to plant an acre ½ in hills, or 1 ½ bushels in drills for fodder.

If by mail, add 10 cts. per pint or 20 cts. per quart.

Golden Sweet. Early; good sized ears; color yellow; considered very rich in flavor. Pkt., IOc.;

Early Marblehead, One of the earliest varieties. A week earlier than Minnesota. Is of good market size and very sweet. Pkt., 10c.; qt., 20c.; pk., \$1; bush., \$3.50.

Early Minnesota. One of the standard second

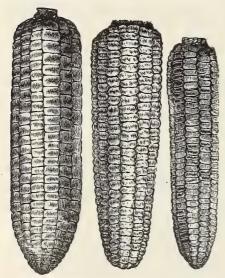

early varieties for market or family use to follow Barly Cory. Qt., 20c.; ½ bush, \$1; bu., \$3.50. Crosby's Early Sugar. An excellent second early variety. Pkt., luc; qt., 20c.; ½ bush., \$1;

bush., \$3.50.

Moore's Early. Second early to follow Crosby

Early. Qt., 20c.; pk., \$1; bush., \$3.50. Stowell's Evergreen. A late variety of excellent quality, remaining longer in the green state than other kinds. Qt., 20c.; 1/4 bu., \$1.00; bu., \$3.50.

Egyptian. Ears large: Ripening late, it is k sweet, prolific, and demands a high price in mar-

SWEET MAMMOTH.

STOWELL'S.

ket. Qt., 20c.; pk., \$1-Potter's Excelsior. This variety is considered the sweetest and richest flavored for table use. Matures after Minnesota. Pkt., 10c.; qt., 20c., pk., \$1.25.

Mammoth Sweet. Ears weighing between two and three pounds each. This is a very sweet corn

what three pounds each. This is a very sweet corn for family use. Pkt., 10c.; qt, 25c.; pk., \$1.00. White Early Cory. A selection of the Cory having white cob and kernel, equally as early and sweet. Pkt., 10c.; pt., 15c.; qt., 25c.; pk., \$1.50; bu., \$4.50.

Sweet Corn for Fodder. Per 1/4 bu., 60c.; per bu., \$2.00.

CORN for FIELD CULTURE.

Rice Pop Corn. This is grown from selected ears, and is entirely free from mixtures; one of th best varieties of pop corn. Price per ear, 5c.; 12 ears, 5c.; pkt., 10c.; qt., 35c.; 10 lbs. on the ear, selected, \$1.00. Holden's Early Field. The most popular among the farmers of the Connecticut Valley. Price per 12 ears, 40c.; 100 ears, \$2.50; qt., 15c.; pk., 75c; bu., \$2.00. Vermont grown.

Early Yellow Canada. Pkt., 5c.; qt., 15c.; pkt., 75c.

Early Yellow Flint. Pkt., 5c.; qt., 15c.; pk.,

A of Midnight. An early eight rowed variety, yellow flint with perfect ears; 12 to 14 inches long, and under good cultivation has yielded 100 to 160 bushels per acre. The seed offered has been grown in this section. Per qt., 15c.; pk., 75c.; bu., \$2.00.

CORN SALAD.

Seed sown in August, protected by leaves during the winter, can be used in the spring very early; a'so sown in spring. Sow in rows, as for lettuce. Per lb., \$1.00; oz., 10c.

ENSILAGE AND FODDER CORN.

Lindsay's Ensilage Corn.
Planted beside Blunt's Prolific, White Southern and others claimed to be better, has positively proved itself the most remarkable corn for ensilage of any yet known variety. It will certainly yield double the fodder of White Southern, one-third to one-fourth more than Rhunt's Prolitic. These who wish Blunt's Prolific. Those who wish to give it a trial and have not, I will send 1/4 bushel at bushel rates. all those who farm for profit I can with confidence recommend this variety to yield one-third more profit to the farmer for ensilage purposes than any other variety. Do not plant other kinds because cheap, when you can get the pure stock. purchase direct from the grower,

pure and tested, sure to germinate. All who tested the are very strongly in its favor as the best for silo purposes. A special corn circular with revised prices in April, mailed free. Qt., 15c.; pk., 75c.; ½ bu., \$1.25; bu., \$2.25. In 3 to 10 bu. lots, send for see july rates er ste ful rates

Blunt's Prolific. Yields about 1/8 less fodder in weight than Lindsay's. Qt., 15c.; pk., 90c.; bu., \$2.25.

White Southern. Qt., 15c.; pk., 45c.; bu., \$1.40.

Red Cob Ensilage. A pure white corn used by many for silo purposes. Peck, 50c.; bu., \$1.40. Sweet Corn for Fodder. Is much preferred to the yellow by our best farmers. Pk., 60c.; bu., \$2.00.

CELERY.

Sow seed in hot bed or boxes in March; when well up transplant in cold frame. In July transplant in shallow trenches or on level ground on highly manured soil, setting plants in rows four feet apart, and plants six inches apart. Or in a more mild climate, sow the seed in the open ground as soon as it is fit to work in April, and keep clear or weeds until the time of planting in June or July. About the middle of August begin the "carthing up" necessary for bleaching or whitening that which is wanted for use during the month of September, October and November.

The leading varieties now grown are Golden Dwarf, White Plume, and New Rose.

Golden Hearted Dwarf. A leading variety in all parts of the country; very solid, of the finest flavor, and the most free from rust; keeping in winter better than any other variety. Pkt., 5c.;

oz., 20c.; 1-4 lb., 60c.; lb., \$2.00.

Boston Market. A leading Celery in Boston and vicinity. It is dwarf, branching, remarkably fine flavored, crisp and tender. Pkt., 10c.; oz.,

30c.; 1.4 lb., \$1.00. Early Arlington. Pkt., 10c.; oz., 40c.; lb.,

White Solid. A variety raised in New York.

Pkt., 5c.; oz., 25c.; 1.4 lb., 75c.

Dwarf (rimson. Good flavor; of crimson color. Pkt., 5c.; oz., 25c.

Henderson's New White Plume. Choice

The inner stalks and leaves are naturally white and do not require earthing up like other varieties; tie the stalks together and draw a little earth about the plant is sufficient. It is a fair keeper, tender, good flavor and quite ornamental.

Pkt., 5c., oz., 30c.; 1.4 lb., \$1.00.; 1lb., \$3.50.

New Rose. One of the best of the red varieties, very hardy and very brittle when bleached, of the finest flavor. Pkt., 5c.; oz., 25c.; 4oz., 75c. Turnip-Rooted Celery. Large, smooth; tur-

nip shape; grown in nearly the same manner as celery. Pkt., 5c.; oz., 25c.

Celery Seed. For flavoring pickles, soups, etc.
Oz., 10c.; ib., 40c.

CELERY BLEACHING.

To store celery for winter, dig trenches eight inches wide, to admit of two rows, leaving tops after trenched about six inches below the top of the ground, cover the roots only a little, then cover with boards, then adding leaves and six inches of soil to keep out frost during the winter, or it can be stored in the cellar in the same way without covering the tops.

EGG PLANT.

The seed should be sown in hot beds the first week in April, care being taken to protect the young plants from cold at night. If no hot bed is at hand, sufficient plants may be raised for a small garden by sowing a few seeds in common flower pots or boxes in the house.

New York Improved. The leading market variety; excellent and very productive. Pkt., 10c.;

Long White. Ornamental variety of excellent

quality. Pkt., 10c.; oz., 30c.

ENDIVE.

Endive is one of the best salads for fall and winter Sow for an early supply about the middle of 1186. April.

Green Curled. Very hardy; leaves dark green, tender and crisp. Pkt., 5c.; oz., 20c.

HERBS.

No garden is complete without a few sweet or medicinal herbs, and pains should be taken to harvest them properly. This should be done on a dry day. Then dry quickly and pack closely, keeping them entirely excluded from the air. Sow in spring in shallow drills one foot apart. Anise. Pkt., 5c.; oz., 15c.

Anise Pkt., 5c.; oz., 15c.

Belladonna. Pkt., 5c.; oz., 10c.
(araway. Pkt., 5c.; oz., 10c.
bill. Pkt., 5c.; oz., 10c.
bill. Pkt., 5c.; oz., 10c.

Hoarhound. Pkt., 10c.; oz., 40c.

Lavender Pkt., 5c.; oz., 10c.

Marjoram. (Sweet.) Pkt., 5c.; oz., 30c.

Saffron. Pkt., 5c.; oz., 15c.
Sage. Pkt., 5c.; oz., 15c.
Summer Savory. Pkt., 5c.; oz., 20c.; ½lb., \$1.75.
Summer Savory. Pkt., 5c.; oz., 20c.; ½lb., 70c.

Thyme. Pkt., 10c.; oz., 40c. Wormwood. Oz., 40c.

LETTUCE.

For succession crops, sowing may be made in the open ground as early as spring opens until July, in boxes in the house or cold frame, transplanting in open ground as soon as the weather becomessettled.

Early Curled Simpson. This variety, properly speaking, does not head, but forms a compact, close mass of leaves; the earliest leading market sort, and one of the very best for family use, always crisp and tender. Pkt., 5c.; oz., 20c.; ½ lb., 40c.; lb., \$1.50.

Oak Leaved. New; deeply cut leaves. Pkt., 10c.;

oz., 25c.

EARLY CURLED SIMPSON.

Boston Curled. A standard in the Boston market. Pkt., 5c.; oz., 20c.; ¼ lb., 50c. Tennis Ball. Forms a close, hard head, with

few outer leaves; a favorite forcing variety. Pkt., 5c.; oz., 20c.; ½ 10., 40c

Paris White Cos. Of lighter color than the preceding; crisp and excellent. Pkt., 5c; oz., 20c.

Hanson. Heads of which grow to a remarkable size, and are deliciously tender and crisp. Pkt.,

5c., oz., 20c,; ¼ lb., 40c.

Buttercup. New for winter or summer, one of the best. Pkt., 10c.

Black Seeded Simpson. Larger than curled

Simpson, and a good summer variety. Pkt., 5c.;

oz., 20c.; ¼ lb., 60c.

Boston Market. Similar to Tennis Ball. Good for early forcing. Pkt., 5c.; oz., 20c.; ¼ lb., 40c.

Satisfaction. A new variety, very tender; remain in head a long time. Pkt., 5c.; oz., 20c.

New Perpetual. Forms compact; leaves 20 inches across, remaining tender several months. Pkt., 5c.; oz., 35c.

DANDELION.

The Dandelion resembles Endive, and is cultivated for spring greens or for blanching for salad. roots, when dried and roasted, are often employed as a substitute for coffee. The seed should be sown in May or June in drills halfan inch deep and one foot apart. The plants will be ready for use the following spring.

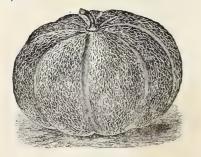

Improved French Broad Leaved. Leaves are fully double the size of the common Dandelion, and known to produce at the rate of 1,000 bushels per acre. It is a great advance over the old variety. Pkt., 10c; oz., 40c., 1/2 lb., \$1.25; lb., \$3.50.

KOHL RABI.

Intermediate between the cabbage and turnip. Sow in June, for succession, in rows 18 inches apart. thinning out to eight inches between the plants. Being difficult to transplant, is preferred to sow the whole crop from seed, and thin out where it stands.

Barly White Vienna. Flesh white and tender; the best sort; excellent for table use. Pkt., 5c.; oz., 25c.; ¼ 1b., 75c.; 1b., \$2.25.

Large Early Purple. Pkt., 5c.; oz., 15c.; ¼

MONTREAL MUSK.

MELON, (Musk.)

The hills should be six feet apart each way. Mix Large Yellow Cantaloupe. Flesh reddish

well with the soil in each hill about two shovel-fuls of thoroughly rotted manure. Plant about the 15th of May, and when well up thin out to three or four of the most promising plants. Pinch off the leading shoots as the growth becomes too luxuriant. Thin out when young, which will increase the size of those remaining, and cause them to ripen earlier. One ounce will plant 80 hills.

Add sixteen cents per pound if sent by mail.

Golden Gcm. Nearly round. Very thick flesh, light green; inside rich yellow; quality superior and the earliest to ripen. Pkt., 5c.; oz., 20c.; 1/2

lb., 30c.; lb., \$1.

Montreal Improved Green Nutmeg. Popular in northern latitudes with marketmen. Nearly round, growing large, about 25 pounds each; thick flesh, fine flavor Very attractive in market. Pkt., 5c.; oz., 15c.; ¼ lb., 25c.; lb., 90c.

HACKENSACK.

New Early Hackensack. Deeply netted and ribbed; flesh green; fine flavor and very productive; a favorite with market gardeners. Pkt., 5c.; oz.; 10c.; ½ lb., 25c.; lb., 80c.

Surprise. Thin skin, cream colored; thickly netted; the believer, fine flavor and prolife. Pkt.

Surprise. Thin skin, cream colored; thickly netted; flesh salmon; fine flavor and prolific. Pkt., 5c.; oz., 15c.; ¼ lb., 30c.; lb., \$1.

Nutmeg. Nutmeg shaped; skin deep green; finely netted; flesh greenish yellow, rich and sugary. Pkt., 5c.; oz., 10c.; ¼ lb., 20c.; lb., 75c.

Large Vellow Musk. A very large variety; deeply ribbed and thickly netted; flesh salmon yellow. Oz., 15c.; ¼ lb., 25c.; lb., 80c.

Banana Melon. By many though! to be an excellent melon; yellow flesh, thick meat, very solid, of fair qual tv. growing to resemble an overgrowd.

of fair qualty, growing to resemble an overgrown banana; when ripe, 18 to 24 inches long. Pkt., 10c.; oz., 20c.

Bay View. A large, prolific, and fine flavored

tay View. A large, prolific, and fine flavored green fleshed melon. Pkt., 5c.; oz., 15c.; 1-4 lb., 25c.; lb., 80c.

JENNY LIND.

Jeuny Lind, A very small early variety, flat-tened at the ends; of surpassing good quality; recommended for family garden or an early mar-ket melon. Pkt., 5e.; oz., 10e; 1-4 lb., 25e.; lb.,

orange, sweet and of good flavor; an early and productive variety. Oz., 10c.; 1.4 lb., 20c.; lb., 75c.

MELON, (Water.)

Cultivate the same as Musk Melon. One ounce will plant 60 hills.

Add sixteen cents per pound if sent by mail.

Cuban Queen. Its size, productiveness, color, flavor, thin skin, and superior shipping qualities, render it justly celebrated. Very solid and grows to a great size. Pkt., 5c.; oz., 10c.; 1-4 lb., 25c.;

Scaly Bark. A thin, strong rind, solid flesh melon, of a crimson color, tender, sweet and of excelent flavor; a valuable market variety, of medium size; excellent shipping melon. Pkt, 5c.; 1 zo. 15c.; 14 lb., 30c.; lb., \$1.00.

ICE CREAM OR PEERLESS.

The Boss. One of the finest watermellons yet introduced. Perfect in shape, color and size; flavor unsurpassed; flesh deep scarlet; ripens carly, and is enormously productive. The Rural New Yorker claims it best among 20 new varieties, tested by them. Pkt., 5c.; oz., 20c.; 1-4 lb., 25c.; lb., Other

Mountain Sprout. Large size; longish oval; green, marbled; flesh red, of excellent quality. Pkt., 5c; oz, 10c; 1.4 lb., 25c.; lb., 85c. Vick's Early. Of medium size, oblong and smooth; highly prized for its earliness; flesh bright pink, sweet und solid. Pkt., 5c.; oz., 10c.; 1.4 lb., 30c.; lb., \$1.10.

Mountain Sweet. Large size, longish oval; dark green, red fleshed, excellent quality. Pkt., 5c.; oz., 10c.; 1-4 lb., 20c.; lb., 75c.

VICK'S EARLY.

Ice Cream or Peerless. Form nearly round; ftesh white, sweet and tender; an excellent early variety. Pkt., 5c.; oz., 10c.; 1.4 lb., 20c.; lb., 7cc. Black Spanish. Skin dark green; ftesh red. Pkt., 5c; oz., 10c.; 1.4 lb., 20c.; lb., 70c. Citron. Round, of small size; used in making preserves. Pkt., 5c.; oz., 15c.; 1.4 lb., 30c.

Peerless. Same as Ice Cream. See price.

market; of large size and attractive. Pkt., 5c.; oz., 12c.; 1-4 lb., 35c.; lb., \$1.15.

My selection of 6 varieties Musk and Watermelon, 3 packages each for 25 cts. (6 in all.)

MUSTARD.

A salad used sometimes with cress. Sow thickly in rows, and cut when about two inches high. For a crop of seeds, sow in April, in drills a foot apart and thin out moderately when about three inches high.

White London. Best for salad. Pkt., 5c.; oz., 10c.; 14 lb., 20c.; lb., 40c.

GLOBE DANVERS ONION.

ONIONS.

Apply 8 to 12 cords of manure per acre; plow thoroughly about 5 inches deep, and work manure well into the soil. The Onion thrives best when cultivated on the same ground for successive years. As early in the spring as the ground is in working order, level with a rake and tread it firmly; sow in drills about a quarter of an inch deep and foot apart; cover, and press the soil with a light It requires four pounds of seed to sew an acre; one ounce will sow a bed 4 1-2 by 25 feet, in drills 9 inches apart. It is beneficial to spread broadeast over the onions while growing, a mix-ture of ashes and bone meal, five to ten hundred pounds per acre. One third more per acre and better onions for market can be grown by sowing thickly, never to thin out, leaving as close as one inch apart to mature. Experiments have proved that hard and firmly packed sandy soil will yield two-thirds more onions than loose, pulverized soil. Try it and you will be convinced.

Add 16 cents per pound if sent by mail.

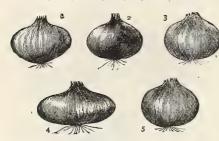

Yellow Globe Danvers. (True.) Grown for my trade in the onion district of Massachusetts, from relected onions. The illustration represents its true form. This is the most profitable variety to grow, yielding from six to eleven hundred bushels per acre; very early. Pkt., 5c.; oz., 20c.; 14 lb., 55c.; lb., \$2 00; 5 lb. lots \$9.00.

EXTRA EARLY PEARL.

Extra Early Pearl. The earliest of all: pearly white, growing almost as apidly as a radish; flat; mild flavor; good keeper. A remarkable onion. Pkt., 10c.; 2z., 30c.; 1-4 lb., 85c.; lb., \$3.00. Early Red Globe Danvers. One of the earli-

est and most productive of the red varieties. Pkt., 5e.; oz., 20c.; 1-4 lb., 55c.; lb., \$2.00.

No. 1, Early Red Globe.

No. 2, Southern Yellow Globe. No. 3, White Globe.

No. 4. Flat Mammoth. No. 5, New Queen.

Weathersfield Large Red. Of large size. Deep red in color and an excellent keeper. Pkt., 5 5c., oz., 20c.; 1-4 lb., 55c.; lb., \$1.85

White or Silver Skin. (True.) White, early, delicate; not a good keeper. Pkt., 10c.; oz., 30c.; 1-4 lb., 85c.; lb., \$3.00.

Yellow Dutch. A good keeper and well flavored. Pkt., 5c.; oz., 20c.; 1-4 lb., 50c.; lb., \$1.75.

White Globe. As large as Yellow Danvers; a good keeper and of fine flavor. Pkt., 10c., oz., 25c.; 1-4 lb., 75c.; lb., \$2.85.

New Queen. An excellent variety; is remarkable for its keeping qualities and rapidity of its growth. Pkt., 10c.; oz., 25c.; 1.4 lb., 75c.; lb., \$2.50.

Southport Yellow Globe. A little later than Globe Danvers; nearly round; mild and pleasant; a good keeper and very productive. A favorite in New York market. Pkt., 10c.; oz., 25c.; 1-4 lb., 70c.; lb., \$2.25.

Giant Globe Madeira. Grows to a large size; mild flavor. Pkt., 10c.; oz., 25c.; 1-4 lb., 75c.

Large Italian Tripoli Globe. Deep red; enormous size; mild flavor, of very rapid growth, often weighing two and a half pounds each. Pkt., 10c.; oz., 25c.; 1-4 lb., 75c.

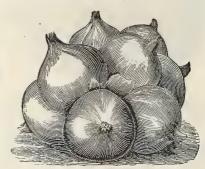

Tripoli White Flat Mammoth. (New.) Growing six to seven inches in diameter, or a cirsumference of about twenty inches; flat, silvery white, mild, fine flavor, a heavy cropper; largest onion in cultivation; fine for exhibition. Pkt., 10c.; oz., 30c.

ONION SETS.

The Potato and Top onions are grown only from bulbs. The Potato Onion is increased by the bulb splitting up and dividing itself into six or eight smaller bulbs, which in turn form the sets to plant for the next crop. The Top Onion forms clusters of small bulbs on the stem, which are broken apart and planted in the same manner as the sets above referred to.

Add 20 cents per quart if sent by mail.

Potato Onions. The earliest of all onions and the most profitable for the market gardener, being ready for market in 5 or 6 weeks from time of planting; to be tied in bunches in the green state; six weeks in advance of the top or white onion sets. Qt., 20c.; pk., \$1.00; bu., \$3.50. Potato Onion Seed. Pkt., 10c.; oz., 30c.

POTATO ONIONS.

Top or Button Onions. Maturing just after the Potato Onion has gone by; good size and keeps well. Qt., 20c.; pk., \$1.25.

OKRA, OR GOMBO.

The long pods of this vegetable, when young, are used in soups, stews, etc., and are believed to be very nutritious. Sow at the usual time of all tender vegetables, in drills two inches deep, in rows from two to three feet apart. Pkt., 5c.; oz., 10c.

Improved Dwarf Green. Early and productive. 1-4 lb., 25c.

Long Green. Long, ribbed pods. 1-4 lb., 25c.

PARSLEY.

Parsley succeeds best in a rich, mellow soil. As the seed germinates very slowly, it should be sown in spring, previously soaking the seed for a few hours in tepid water. Sow thickly in rows a foot apart, and half an inch deep. For winter use protect in a frame or light cellar.

Carter's Champion Moss Curled. The best for garnishing. Pkt., 5c.; oz., 10c.; 1-4 lb., 25c.

Double Curled. A finedwarf varie y; beautifully curled; excellent for garnishing. Pkt., 5c.; oz., 10c.; 1-4 lb., 25c.

PEAS.

Repeated sowings once in two weeks will insure a regular supply. For dwarf varieties requiring no stakes, sow in sincle rows about two inches deep and about one and a half (cet apart. For all varieties requiring no stakes, sow in double rows, about three to four feet apart, according to variety, and three inches deep.

Add 30 cents per quart if sent by mail.

For succession of crops sow Excelsior, American Wonder, Improved Gem. Dwarf Champion and Perpetual.

EXTRA EARLY.

Bliss' American Wonder. The earliest vorinkled Pea. For productiveness and flavor, it is unsurpassed. It grows teninches high; robust habit, and vines covered with a profusion of pods. Pkt., 10c.; qt., 30c.; pk., \$2.00; bu., \$7.00.

BLISS' AMERICAN WONDER.

EXCELSIOR

Excelsior. As an early market or family pea, this stands first among the early varieties. It grows about 24 inches high, producing large, well filled pods, from five to eight peas in a pod; when ripe are nearly round, of a yellowish white color, very sweet and fine flavored. For market gardens this is as early, if not the earliest and most productive, large podded variety of smooth peagrown. Sown on the 25th of April, usually are ready for market from the 9th to the 13th of June, from 6 to 10 days earlier than the American Wonder. This seed I grow myself largely for market gardener's trade. For family gardens it is also extensively planted. Being grown at the north on our Vermont hills, it should produce better results than seed sown farther south. Pkt., 10c.; pt., 15c.; qt., 33c.; pk., \$1.40; bu., \$5.00.

Improved Gem. To those who wish a variety more prolific than American Wonder, 3 to 5 days later, growing 5 inches taller, and equally as good flavor, I can recommend this as a variety that will please the family or market gardener, and no doubt one of the most productive early wrinkled pas now in cultivation. This strain is grown with care to meet the demand as a prolific, fine flavored, early wrinkled peg. 8 to 10 days later than Excelsior for market or family. Pkt., 10c.; qt., 30c.; pk., \$1.50; bu., \$5.50.

Hentish Invicta. A green, wrinkled, productive variety; very uniform in growth and yield; 2% feet high; much used for canning; a week to ten days later than Excelsior. My strain of this variety is superior. Pkt., 10c.; qt., 30c.; pk., \$1.50; bu., \$5.10.

Early Vermont. A new first-early pea originating from careful selections of Improved Dan O'Rourke and First and Best; of much promise for early market and family use. Pkt., 15c.; qt., 30c.; pk., \$1.50.

Improved Dan O'Rourke. A standard early variety for market or home use. Growing about 2 feet high; pods good size and well filled; pro-

ductive and of good quality. Pkt., 10c.; qt., 25c.; pk., \$1.50; bu., \$5.00.

First and Best. Very early, productive market or family pea. Pkt., luc.; qt,, 25c.; pk., \$1.40; bu,, \$4.50.

Express. This variety I imported from France, there claimed to be the best early pea in the French market; thinking favorably of it, I grew several bushels for seed. It germinates quickly and grows rapidly, coming into bloom with the first earlies, maturing its first pods before any other variety; pods larger than most early peas, and of the richest flavor; for family use I think it one of the best. Pkt., 10c.; qt., 25c.; pk., \$1.50.

Alpha. A wrinkled pea growing 2 feet high; a little earlier than Little Gem and much used as a market early variety. Pkt., 10c.; qt., 25c.: pk., \$1.50.; bu., \$5.00.

McLean's Little Gem. A dwarf, green, wrlnkled variety; very prolific; ripens a few days after Λmerican Wonder; 1 foot. Qt., 25c.; pk., \$1.50; bu., \$5.00.

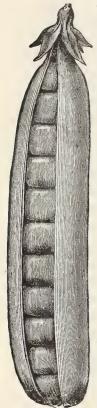

Alaska. Sent out as one of the first early. In growth, earliness, height, color of peas and general appearance, it resembles the Express, which I imported from France in 1884, and was first introduced in 1885 in this country. It so proved tested side by side. Pkt., 10c.; qt., 25c.; pk., \$1.75; bu., \$6.00.

SECOND EARLY VARIETIES.

Long Island Mammoth. A great favorite with market gardeners on Long Island. A green, wrinkled variety; 3½ feet high, producing unusually large crops. Pods and peas very large and well filled; of the best quality; matures a few days later than the Advancer; highly recommended. Pkt., 10c.; qt., 30c.; pk., \$2.00; bu., \$6.75.

Abundance. A branching variety, 15 in hes high; wrinkled; fit for the table two weeks later than American Wonder. Pkt., 10c.; qt., 30c.; pk., \$2.00.

Pride of the Market. A green pea earlier than Strategem; about 15 inches high; producing fine large, long pods 10 to 12 peas in each pod; maturing with the Telephone, and a good variety to take its place; prolific and fine flavor. Pkt., 10c.; qt., 35c.; pk., \$2.25.

Cleveland's Advancer. · This is an improved select strain of Mc. Leans' Advancer, recognized in New York and other markets as far superior to the ordinary variety. This follows the Improved Gem, in maturing for the table; wrinkled, growing about 21/2 feet high; a good and profitable second early variety. Pkt., 10c.; qt., 25c.; pk., \$1.75; bu., \$6.00.

Dwarf Champion of England. Popular on Long Island with gardeners. It resembles Yorkshire Hero, but has larger peas, and pods are much more prolific and earlier. Do not plant Yorkshire Hero or Old Tall Champion when you can obtain this. Very healthy and vigorous; a great cropper of the richest flavor; I think will produce more pods than any other second early variety. Pkt., 10c.; qt., 30c.; pk., \$1.75; bu., \$6.50.

Telephone. A second early, lårge podded, wrinkled variety; when first introduced, proved a very fine and profitable variety. For two years the season has been unfavorable for ripening good

PRIDE OF THE seed stock, to lower price, and we are unable to offer this MARKET. season only by packet quart and peck. Pkt , 10c.; qt., 40c.; pk., \$2.50.

FOR GENERAL CROP.

Perpetual. The best late variety on account of its continual bearing, maturing just after the Ad vancer, and continues growing and branching until out by frost. By planting at one time Excelsior, American Wonder, Improved Gem, Improved Champion, and Perpetual, you have green treat the whole consent from Unit of October, I peas the whole season, from June to October. was the first to introduce this from from England was the first to introduce this from from England in 1884; on my trial ground it proved distinct and superior to the Everbearing. It requires no bushing, growing about 24 inches high; of a branching habit; seed wrinkled; very desirable for family use. On account of its branching habit, thin to 12 inches and sow in rows 2½ feet apart. Pkt., 10c.; pt., 20c.; qt., 35c.; pk., \$2.50.

Stratagem. High flavored and esteemed by all

who have tested it; dwarf, wrinkled, hardy and prolific; large handsome pods, well filled; growing 15 inches high. Pkt., 10c.; qt., 30c.; pk.,

\$2.00; bu., \$7.75.

Bliss' Everbearing. A branching, everbearing variety to follow as a late pea. Pkt., 10c.;

qt., 30c.; pk., \$2.00. **Workshire Hero**. Half dwarf, wrinkled pea, highly valued for the garden; maturing for the table before the Champion; grows $2\frac{1}{2}$ feet high; pods large. Pkt., 10c.; qt., 25c.; pk., \$1.50; bu., \$5.00. Champion of England. An old variety and

highly valued. Many of the newer varieties now far surpass it in yield, flavor and growth; 5 feet.

Pkt., 10c.; qt 25c.; pk., \$1.25; bu., \$4.00. Dwarf Marrowfat. eved Marrowfat; a little carlier; equally as prolific; more desirable on account of its dwarf habit, requiring no bushing. Pkt., 10c.; qt., 20c.; pk.,

requiling no outsing. Pkt., tec.; qt., 20c.; pk., 90c.; bu., \$3.00.

Black Eyed Marrowfat. Very extensively grown as a field pea; hardy and productive; 4 feet. Pkt., 7c.; qt., 15c.; pk., 65c.; bu., \$2.20.

Dwarf Sugar. Edible pods; of good quality shelled: 3 feet. Pkt., 10c., qt., 50c.

PARSNIP.

Sow as early in spring as the weather will permit, in drills fifteen, inches apart, covering half an inch deep. Unlike carrots they are improved by frost, and it is usual to take up in the fall what is wanted for winter use, and leave the rest to be dug up as required in the spring.

Add 16 cents per lb. if sent by mail.

Long Smooth or Hollow Crown. Best for general use. Pkt., 5c.; oz., 10c.; 1-4 lb., 20c.; lb., 50c. The Student.

LONG SMOOTH PARSNIP. fine flavored variety. Pkt., 5c.; oz., 10c.; 1-4 lb., 2)c.; lb., 60c.

SWEET MOUNTAIN PEPPER.

PEPPER.

Grown largely for pickles. Sow in a hot bed 'in March or early in April, and transplant in the open ground when the weather is favorable. They should be planted in warm, mellow soil, in rows eighteen inches apart. They may also be sown in the open ground when all danger of frost is passed, and the soil is warm and settled.

Large Bell or Blue Nose. An early variety, of mild flavor; rich, thick and fleshy; a favorite sort for pickling. Pkt., 5c.; oz., 25c.; 14 lb., 75c.

75c.

Sweet Mountain or Mammoth. Similar to the preceeding in shape and color, but larger and milder; used for making stuffed pickles. Pkt., 5c.; oz., 25c.; 14 lb., \$1.00.

Long Cayenne. Best for seasoning pickles. Pkt., 5c.; oz., 25c.; 14 lb., \$1.00.

New Golden Dawn. Bright golden yellow; more productive than any other variety; free from fiery flavor. Pkt., 5c.; oz., 30c.

Ruby King. New. Pkt., 10c.; oz., 30c.

Childs Celestial. Pkt., 15c.

PUMPKIN.

They are usually planted in fields of corn or potatoes, but may be raised in fields by themselves. Sow the first of May in hills 8 feet apart.

Sow the first of May in hills 8 feet apart.

Cheese. The best variety for cooking purposes.

Pkt., 5c.; oz., 10c.; 1 4 lb., 20c.; lb., 70c.

Connecticut Field. Very productive and largely grown for feeding stock. Pkt., 5c.; oz., 10c.; 14 lb., 15c.; lb., 35c.; qt., 55c.

Mammoth Jumbo. Growing to an immense size, often w. ighing from 100 to 150 pounds.

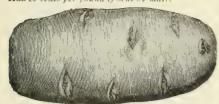

Pkt., 10c.; oz., 20c.; 14 lb., 50c.; lb., \$2.00.

Golden Marrow. A new variety much esteemed for pies. Pkt., 5c.; oz., 10c.; 1.4 lb., 80c.

POTATO.

It is well known by the best growers that potatoes grown at the north will produce earlier and better tubers than if grown in a southern climate. Most of the varleties following were grown on our Vermont hills, in soil that is well adapted to produce the most healthy tubers, and if my customers want truly northern grown potatoes for seed, they will be sure of getting here that which is pure and true to name.

Add 16 cents per found if sent by mail.

EARLY DURHAM.

Early Durham. Tested three years with Early Rose, Early Vermont, Beauty of Hebron, Clark's No. I, and others; as to yield and table use, it surpasses them all. Rather long, nearly white, and cooks very dry. Lb., 20c.; pk., 50c.; bu.,

EARLY BRAUTY OF HEBRON.

Early Beauty of Hebron. This somewhat resembles the Early Rose in shape; of a lighter red; earlier, and proved side by side, one-third more prolific, while its quelity is unsurpassed. The best reports are given in its favor from all actions; quoted in our large markets as a leading variety. My seed has been grown in a section of Northern Vermont best adapted to growing healthy tubers, and is very fine. Lb., 15c.; pk., 40c.; bu., \$1.50; bbl, \$3.90.

Empire State. This resembles the Beauty of

Hebron in shape and color; perhaps larger, white, and very smooth; shallow, strong eyes, growing very thrifty. Its season is medium, a seedling of the White Elephant. Yields unusually large crops and is one of the best cooking potatoes grown at all seasons. For dry, sandy, gravelly soil, it is recommended in preference to others on the list. It produces fine, large, smooth potatoes of most excellent quality when cooked. Lb., 15c.; pk., 50c.; bu., \$1.65; bbl., \$4.00.

Extra Early Vermont. One of the best standard very early potatoes, yielding one-third more than Early Rose, and about one week earlier; remarkably smooth and fine appearance; similar in

color to Early Rose; a favorite wherever tried. Lb., 15c.; pk., 50c.; bu., \$1.75; bbl., \$4.50. Early Rose. A standard variety for earliness, quality and productiveness. Lb., 15c.; pk., 40c.;

bu., \$1.50; bbl., \$3.90. Early Albino. Earlier than Early Rose, yielding much better. It originated in Northern Vermont; color white; skin of a rough, netted appearance, indicating its good cooking qualities. Of ordinary size. Tested beside others, as to yield, grounds, much preferred to Vick's Extra Early, Lb., 40c., by mail; express, 25c.; pk., \$1.00; bu., \$3.50.

Chas. Downing At the Ohio Experimental Station, tested beside Clark's No. 1, Boston Market and Burbank, it yielded at the rate of 375 bushels per acre; Clark's No. 1, 257; Boston Mar-ket, 330; Burbank 271. It is a long white potato of the finest quality, ripening five days before Clark's No. 1, and promises to become a very popular variety. Lb., 40c., by mail; 3 lbs., \$1.00; by express, lb., 25c.; 4 lbs., 60c.; pk., 75c.; bu., \$2.50

Early Essex. A standard early variety in Boston market. Resembles the Early Sunrise, but a stronger grower and better to yield; recommended for extra early field and table. Its cooking and

for extra early field and table. Its cooking and keeping qualities are among the best. Lb., by express, 20c.; 3 lbs., 50c.; pk., 60c.; bu., \$1.75.

Early Maine. A new variety, seedling of Early Rose; its combined earliness, yield and quality are among the very best, and resemble the Early Rose in appearance, yielding one-fourth more. Lb., 15c.; pk., 50c.; bu., \$1.75.

WHITE ELEPHANT.

White Elephant. Tubers large, long, mealy, white, and very produc ive; of the finest quality, ripessing just after Early Rose. In much demand in this section as a field and table potato. This seed was grown in Northern Vermont specially

to my trade. Lt., 120., pc., pc., pc., pc., pbl., \$4.00.

Clark's No. 1. Earlier than Early Rose; color a little darker; not quite as long, otherwise fully as large. It cooks very dry and mealy; flavor excellent. Lb., 150.; pk., 50c.; bu., \$1.65.

CHARLES DOWNING.

*earl of Savoy. A cross between Early Vermont and Clark's No. 1. From experiments in Pearl of Savoy. New England and Middle States, this variety has proved one of the most remarkable early potatoes. Planted here May 30th, in 60 days three potatoes were taken from one hill, all weighing one pound, cooking excellent. In color it is nearly like Early Rose; eyes not prominent; very uniform in size and shape; no very large or small potatoes. Lb., 15c.; pk., 50c.; bu.; \$1.75; bbl., \$4.50.

EARLY ALBINO.

Queen of the Valley. A very productive and excellent table variety. Lb., 15c.; pk., 50e.; bu., \$1.75.

Lees Favorite. Tested at experimental station, and claimed to be one of the best productive table varieties. Lb., 15c.; pk., 50c.; bu., \$1.75.

RADISH.

For a successive supply, sow from the middle of March until July, at intervals of two or three weeks. For an early supply they may be sown ia a gentle hot bed in March.

Long Scarlet Short Top. The standard vari-

Long Scarlet Short Top. The standard variety for market and private gardens. Pkt., 5c.; oz., 10c.; 1-4 lb., 20c.; lb., 60c.

French Breakfast. Of quick growth, very mild and tender; one of the best for forcing. Pkt., 5c.; oz., 10c.; 1-4 lb., 20c.; lb., 60c.

Olive Shaped Scarlet. Oblong shaped; flesh rose colored, tender and excellent. Pkt., 5c.; oz., 10c.; 1-4 lb., 20c.; lb., 60c.

Rose China Winter. Bright rose color; flesh firm and piquant; excellent for winter use. Pkt., 5c.; oz., 1:c.; 1-4 lb., 25c.; lb., 75c

California Mammoth White. A giant, white fleshed, fall radish, of excellent quality. Pkt.,

fleshed, fall radish, of excellent quality. Pkt., 10c.; oz., 15c.

Early Round Dark Red. A new variety of much value on account of its short top. Pkt., 5c.; oz., 10c.; 1.4 lb., 25c.; lb., 75c.

Beckett's Improved Chartler. New. One of the best long varieties. Pkt., 5c.; oz., 10c.; 1.4 lb., 25c.; lb., 75c.

Add 18 cents per pound if sent by mail.

SPINACH.

For summer use it may be sown at intervals of two or three weeks from April to August. Spinach is

best developed and most tender and succulent when grown in rich soil. Pkt., 5c.: oz., 10c.; axcept where noted.

Add16 cents per pound if sent by mail.

Long Standing. Remains a long time before running to seed; in other respects similar to Round Leaved. Pkt., 5o.; oz., 10c.; 14 lb., 15c.;

lb., 40c.

Round. The main market sort; quality good for spring or fall sowing. 1.4 lb., 20c.; lb., 35c.

Prickly. Stands well in winter, but less prolific bearer. 1.4 lb., 20c.; lb., 40c.

Improved Thick Leaved. Produces a large, thick leaf; stands a long time before running to seed. Oz., 10c.; l.2 lb., 15c.; lb., 40c.

New Zealand. Produces leaves throughout the summer; should be raised in heat and transplanted 3 feet anart each way in a light rich soil. Pkt., summer, should be also way in a light rich soil. Pkt., 5c.; oz , 1fc.; 14 lb., 40c.

Savoy Leaved. The most hardy of all varieties. Recommended for fall sowing in September for

early spring use. Pkt., 5c.; oz., 10c.; 1-4 lb., 15c.;

SEA-KALE.

Cultivated for its blanched shoots, which are cooked as Asparagus. Pkt., 10c.; oz., 30c.; 1.4 lb., \$1.00; lb., \$3.50.

SALSIFY, or OYSTER PLANTS.

Sow early in spring, in drills 15 inches apart; cover the seeds an inch and a half in depth, and when the plants are strong enough, thin out to six inches apart. Pkt. 5c.; oz., 15c.; 14 lb., 35c.; lb., \$1.25.

BUSH SUMMER CROOK

SOUASH.

Light soils are best suited for their growth. Prepare hills for seed in the ordinary manner, by mixing two or three shovelfuls of well rotted manure with the soil for each hill. For the bush varieties, from three to

four feet each way, and for the running sorts from 6 to 8 feet. After they have attained their rough leaves, thin out to 3 or 4 of the strongest

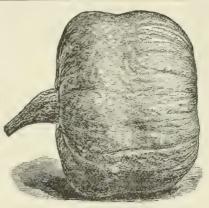

Add 16 cents per pound if sent by mail.

Bush Summer Crook Neck. Early, productive, and of good quality; color orange yellow. Pkt., 5c.; oz., 10c.; 1.4 lb., 20c.; lb., 70c.

Yellow Bush Scallop. A very early variety; excellent. Pkt., 5c.; oz., 10c.; 1-4 lb., 20c.; lb.,

Essex Hybrid. This is one of the richest flavored, finest grained, sweetest, most productive and best keeping squashes. Being very early, it may be planted as a second crop after early peas, pota. toes, or cabbage in June or early July; hard shell, and excellent keeper. Pkt., 5c.; oz., 10c.; 1-4 lb., 20c.; lb., 75c.

Boston Marrow. A much esteemed variety coming in about ten days later than the bush and crook neck sorts; a good keeper and of unsurpassed flavor. Pkt., 5c.; oz., 10c.; 1-4 lb., 20c.; Ib., 70c.

ESSEX HYBRID.

Winter Crook Neck. Flesh close grained, sweet, and good flavored. Pkt., 5c.; oz., 10c.; 1-4 lb., 20c.; lb., 70c.

HUBBARD SQUASH.

Hubbard. A general favorite, and more largely grown as a late sort than any other; of large size; flesh fine grained, dry, and of excellent flavor. Pkt., 5c.; oz., 15c.; 1-4 lb., 25c.; lb., 90c.

Marblehead. A good winter squash, resembling the Hubbard and equally as good. Pkt., 5c.; oz., 10c.; 1.41b., 25c.; 1b., 85c.

Mammoth Chili. Grows to a large size, often weighing over 200 pounds; excellent for feeding s.ock. Pkt., 10c.; oz., 20c.; 1-4 lb., 60c.; lb., \$2.00.

PERFECT GEM SQUASH.

Perfect Gem. Habit and growth like the Cocoanut, yielding two dozen squashes on one vine. They are about six inches in diameter, straw color, thin skin, flesh dry and very fine grained; ripens with Hubbard and keeps well in winter. Pkt., 5c.; oz., 15c.; ½ lb., 40c.; lb., \$1.20.

American Turban. Flesh, orange yellow, thick, fine grained and well flavored. Pkt., 5c.; oz., 10c.; ½ lb., 40c.; lb., 90c.

10c.; ¼ 1b., 40c.; 1b., 90c.

Yokahama. Thick, very dry, sweet and excellent, maturing earlier than the Hubbard, but not as desirable for winter. Pkt., 10c.; oz., 20c.

Pineapple. Pkt., 10c.; oz., 20c.

Bay State. New. (See cut in Novelties.) Pkt., 10c.; oz., 20c.; ½ | b., 40c.; | b., \$1.25.

Early Prolific Marrow. This is a remarkable

new squash, ten days earlier than Boston Marrow; attractive orange-red; of finest quality and very prolific; the earliest and most profitable early fall squash. Pkt., 10c.; oz., 25c.; ¼ lb., 40c.; lb.,

TURNIP.

It is one of the most wholesome roots for feeding stock, and extensively grown in market gardens. In England it is one of the staple products of the farm. For early use, sow as soon as the ground farm. For early use, sow as soon as the ground can be worked in the spring, in drills 15 inches apart, and thin to four or five inches in the row. New sod ground is the best. Where old ground is used, good top dressing of wood ashes is the surest method of obtaining good smooth roots. Unless so treated they are most sure to grow wormy if grown in old garden soil. If sown broadcast, from three to four pounds of seed is broadcast, from three to four pounds of seed is required, and in drills from one to two pounds. The latter is the usual method of sowing. Bone dust, superphosphate, plaster, salt, ashes, or a mixture, is much better to be sown broadcast before drills are made. Sprinkle plaster, lime, or ashes on your young plants when insects are troublesome.

For fall crop sow from the middle of July to the middle of August. Pkt., 5c., except where noted. Add 16 cents per pound if sent by mail.

EARLY VARIETIES.

Yellow Finland. A small early variety; flesh bright yellow. Oz., 10c.; ¼ lb., 20c.; lb., 50c.
Yellow Globe. One of the best American vari-

eties for a general crop. Oz., 10c.; 1/4 lb., 20c.;

lb., 50c.

Wellow Aberdeen. Very hard and productive; a good keeper; globe shape; color pale yellow with purple top. Oz., 10c.; ½ lb., 20c.; lb., 50c. Purple Top White Globe. An early variety; globe shape; in other respects similar to the Red Top Strap Leaf. Pkt., 5c.; oz., 10c.; ½ lb., 20c.;

Early Flat Dutch. An excellent garden variety, resembling White Strap Leaf; for spring or fall sowing. Oz., 10c.; ¼ lb., 20c.; lb., 50c.

Extra Early Munich. This occupies a place

among turnips that the Eclipse beet does in its the Purple Top Strap Leaf; flesh white; good size; excellent flavor. Pkt., 5c.; oz., 10c.; ¼ lb., 20c.; lb., 50c.

Earliest Red Top Strap Leaf. One of the

very earliest varieties; shape between flat and round; white flesh. Pkt., 5c.; oz., 10c.; 1/4 lb.,

18c.; lb., 45c.

Long White or Cow Horn. Matures quickly;

roots shaped like a carrot, about half of which is formed above ground. 1/2 lb., 20c.; lb., 40c. White Egg. A quick growing fall turnip, and often used as an early summer turnip for market; nearly round like a ball; flesh firm, fine grained; skin very smooth and thin; of a snowy whiteness;

a mild, sweet, table turnip, and attractive in market. - Pkt., 5c.; oz., 10c.; 10c.; 10c.; 20c.; lb., 50c.

EARLIEST RED TOP.

TURNIP, (Ruta Baga.)

The Ruta Baga, Sweedish, or Russian Turnip, known to many under the name of "French Turnip," forms a distinct class. The bulbs are close grained, very hard, and will endure a considerable degree of cold without injury. They keep well, stored in a cellar the whole winter, but are not in perfection for the table till toward spring. Extensively grown as a farm crop. The Sweeds at the north should be sown from the tenth of June till the first of July, in drills from two to three feet apart, and thinned from 10 to 12 inches apart, or they may be sown in a seed bed and afterwards transplanted. It is necessary that the

ground should be dry and made very rich.

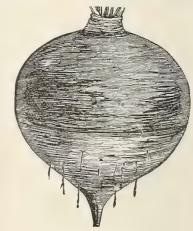

Improved American. This variety is largely grown in this country by many of the most prominent agriculturists, both for the table and for feeding stock; flesh very solid, yellow, of fine quality and keeps well until summer. Pkt., 5c.;

oz., 10c.; 1/4 lb., 20c.; lb., 45c

Sweet German or Russian. In good soils and favorable seasons, is comparatively smooth and regular, and under opposite conditions often un-regular, and under opposite conditions often un-even, neck two or three inches long; greenish brown above ground, white beneath; flesh pure white; solid; very sweet, mild and well flavored; retains its firmness till spring; as a table variety it must be classed among the first. Pkt., 5c.; oz.,

10c.; ¼ lb., 20c.; lb., 50c.

Carter's Improved. Has obtained many first class prizes at various exhibitions in England. Pkt., 5c.; oz., 10c.; 1/2 lb., 20c.; lb., 50c.

SKIRVING'S PURPLE TOP.

Skirving's Purple Top. An improved purple topped variety of very strong growth; large topped variety of very strong growth; large size. By its quick vegetation it generally escapes the ravages of the fly; suited to field culture and cattle feeding, and the best of the yellow flesh Ruta; Baga, Pkt., 5c.; oz., 10c.; 1/2 lb., 20c.; lb., 50c. 1b., 50c.

lb., 50c. **Improved. Of excellent quality; purple above and yellow underground; almost perfect globe shape when well grown, with a small top and tap root; yellow desh. Pkt., 5c.; oz., 10c.; ½ lb., 20c.; lo., 50c.

*Champion Purple Top. Hardy; heavy crop-2 per, yielding from 40 to 50 tons per acre; favorite English variety. Oz., 10c.; ½ lb., 20c.; lb., 50c.

TOMATO.

The seed should be sown in a hot bed or boxes in the house, in March or April, in drills five inches apart and half an inch deep. When three inches high, transplant to another hot bed two or three inches part. About the middle of May the plants may be set in the open ground in light, sandy soil, at a distance of three feet apart in hills in which a shovelful of well routed manure has been

mixed, if not already manured.

Beauty. The best early variety in the list for family or market. Good size, very solid, smooth, and few seed; bearing till killed by frost. A superior strain of my own saving from the earliest and smoothest selections only. Pkt., 5c.; oz 25c.; ¼ 1b., 75c.; lb., \$3.00.

Acme. One of the best early varieties; of good

Acme. One of the best early varieties; of good size, smooth and solid. Pkt., 5c.; oz., 25c.; ½ lb., 70c.; lb., \$2.25.

Favorite. A large, perfect shaped, very smooth variety; dark red; ripens evenly and very early, holding its size to the end of the season; solid; few seeds. Pkt., 5c.; oz., 25c.; ½ lb., 75c.; lb., \$2.25.

Cardinal. A very handsome variety, noted for its round, smooth form; few seeds; ripens uniformly; of a cardinal color; commences to ripen just after Acme. Pkt.. 5c.; oz., 25c.; 1-4 lb., 75c.

Essex Hybrid. This variety is receiving much praise wherever tried; smooth, solid, fine color; splendid for market or home use. Pkt., 5c.; oz., 25c.; 1-4 lb., 75c.

Paragon. Good size, perfectly smooth, very solid and productive: bright glossy crimson. Pkt., 5c; oz., 25c.; 14 lb., 75c.

Perfection. Almost round in shape, smooth and solid, larger in size than Acme, and a little smaller than the Paragon; quality very best and enormously productive, bearing all through the season until frost. Pkt., 5e.; oz., 20c.; 14 lb., 75c.

Trophy. Select stock; one of the finest tomatoes. It holds the highest rank for flavor, size and smoothness. Pkt., 5c.; oz., 25c.; 1.4 lb., 75c.; lb., \$2.75.

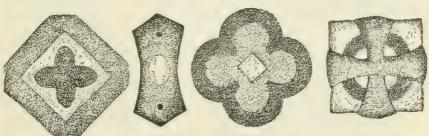

Yellow Plum. A beautiful variety, used prin-ing and preserving. Pkt., 10c.; cipally for pickling and preserving. oz., 30c.

Strawberry. Valuable for preserves and keeps a long time.

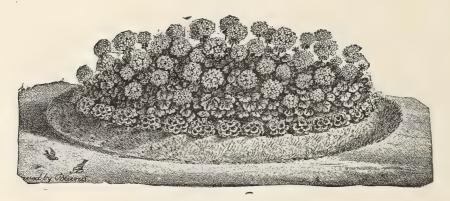

OXEVE SPRINKLER.

This helps wonderfully in successfully growing nis neips wonderfully in successfully growing plants in the house, throwing a fine spray upon the leaves, keeping them in a clean and healthy condition in winter. For bouquets and floral designs, spraying sick rooms and sprinkling clothes, it is one of the most useful and valuable articles for the house. Price 55 cents each by mail; large size, 75 cents.

FLOWER BED DESIGN.

BED OF GERANIUMS .- See page 64 and 65.

GREERHOUSE & BEDDING PLART

DEPARTMERT.

Weltoniensis. Flowers rich shade of pink.

Alba. Flowers white.

Gilsoni. New double. White shaded cardinal,

Rubra. Green leaves; scarlet flower. 10 and 20c. each.

Will furnish 12 varieties, my choice, strong blooming plants for \$2; 6 for \$1; small size, 12 sorts for \$1; 5 sorts for 50c.

CAR NATIONS, (Monthly.)

For the flower garden in summer, the greenhouse or parlor in winter, the Carnation is unequaled; the varieties with florists are very numerous, and nearly every shade of marking, and most of them exceedingly fragrant. As a winter bloomer for profit or pleasure, the Carnation excels all other plants; the flowers are of such a nature as to stand long exposure either for shipping or when made into bouquets. Its beautiful color, exquisite clove fragrance and abundance of bloom, rate it by all florists and bouquet makers among the first-class flowers, having always a ready demand in market, together with its hardy nature, render it one of the best blooming plants for com-

mercial florists, amateur or winter gardens. Some do not succeed with the carnation, owing generally to lack of moisture, syringing, or too dry an atmosphere, which encourage the red spider, causing the buds to blast, or the plant to die. The carnation likes a temperature of 50 to 60 degrees better than 70 to 80 degrees, with foliage moistened two or three times a week, both upper and lower parts of the leaves, never allowing the soil to get dry, keeping the plants clean and free from dust. The red spider feeds from the under side of the leaves, and increase rapidly in a high and dry atmosphere, while a cool, fresh, mild air, with plenty of water will destroy the insect. They can be as easily grown as geraniums when you once understand their culture. When set in the open ground, cut them well back; they will soon show new growth and bloom during the summer, and when lifted from the open ground will produce flowers for several months in the winter. The following are good winter In the winter. The following are good winter blooming sorts, which I can supply in quantities, growing them as I do for winter extensively. Price 20c each; \$2.00 per dozen; small plants, 12c each; \$1.25 per dozen; \$6.00 per 100. Adding 50c per 100 when sent by mail. Will send three varieties by mail, my cheice of varieties, for 30 cents; 16 for 50 cents; 12 for \$1.00. Large plants in 5 and 6 inch pots, 25 and 35 cents each; \$3.00 per dozen. Astoria. Yellow, striped carmine; one of the most popular in color. *Astoria.

most popular in color.

White, deeply fringed; fra-Bo ule de Neige.

*Crimson King. Exceedingly double; of a

beautiful velvet crimson maroon

*Grace Wilder. Delicate pink; flowers large, clove scented; blooms very freely; a most prolific variety of its color. *Peerless. Large, pure white; largely forced as

a winter bloomer.

President Degraw. Pure white; fragrant and

profuse bloomer

*La Purite. Rosy pink; profuse; much prized for winter.

*Miss Joliffe. A new color; a rich shade of blush; a delicate clove odor.w:.

*James A. Garfield. Strong, thrifty grower; color very bright, deep scarlet, with large flowers and long stems

American Wonder. Fine, large, beautiful, pink fringed, perfect form. 15 cents each. Snowdon. Very dwarf, pure white. Considered by some Boston florists an excellent winter With me Peerless is better.

*Variegata. Carmine, striped blush; the best of

Edwardii. Fine white. Hintz's White. La Large yellowish white;

fringed. 'Mrs. Garfield. A strong grower and free bloomer, never bursting. Golden yellow, fringed, spotted, and flaked with crimson; good size.

*Chester Pride. A valuable winter bloomer; white, dotted with striped carmine. One of the best variegated varieties

Grace Fardon. Beautiful bright pink.

Joseph Perkins. A new shade of delicate pearl pink, fragrant, fringed; one of the best of

COBCEA SCANDENS.

COBŒA SCANDENS.

One of the best climbing plants, being of remarkably rapid growth, producing abundantly, large, bell-shaped, purple flowers in great profusion. As a summer climbing plant for trellis or veranda, or to train in green-house or conservatory in winter, it ranks first. Price 20 cents each. 6 for \$1.00.

CHRYSANTHEMUM.

Their value for autumn and early winter flowers are not surpassed for fine display, variety of colors, and ease of cultivating, being hardy south of New York City, are largely used for decorating or bedding for fall display on the lawn or flower garden. In northern sections they require lifting in pots, and placed in a cool house, or room, where they will bloom for two months, from November to January, with a variety of early and late bloomers. January, with a variety of early and late bloomers. The progress in originating new varieties is extensive, and often a puzzle to many to really know which are the best to choose for contrast, color, and freeness to bloom, there are so many new varieties that are really valuable, but the list is large to choose from, and the classes now divided into five. The Chinese, Japanese and Pompon, are the most valuable. The list following comprise some of the most valuable varieties. ing comprise some of the most valuable varieties. The best time to purchase is in the spring, as they are rather large to send a distance in the fall. I mention below some of the best varieties I have tested for contrast of bloom. Price, small plants, 10c. each; \$1.00 per dozen; large plants, 15c. each; \$1.50 per dozen, unless noted.

My choice of 13 varieties small plants named, for

\$1.00.

Large Flowering Japanese, or Fringed.

My Japanese and Chinese varieties were personally selected from a large imported and American exhibition collection. The best 14 from the entire collection I have marked with a star, and will forward to one address for \$1.50 by mail or express.

40 other varieties at same price.

CALADIUM ESCULENTUM.

CALADIUM ESCULENTUM.

One of the most beautiful and attractive of the ornamental foliage plants. It will grow in any gar-den soil, of the easiest culture. When of full size it stands about five feet high; immense leaves, often measuring three feet in length and two in breadth, very smooth, of light green color, beautifully veined and variegated with dark green. 15 to 25 cents each; \$1.75 and \$2.50 per dozen. (See cut.)

CLEMATIS.

See Hardy Climbing Vines.

CYCLAMEN.

CYCLAMEN.

They are well adapted for house culture and give a great many flowers for little care. Place the bulbs in soil, just above the surface, in a four or five inch pot; keep the plants a little cool until leaves are well formed; when flower buds appear, give it a sunny window, where it will show flowers. My strain of Cyclamen is among the finest; remarkable for large size, form and brilliant colors; they are fine ornamental leaves, mottled with light and dark green; producing flowers during the winter in great profusion. Many improve-ments are yearly appearing in this class. Price, 25 cents each.

Cyclamen Persicum Album. White. Rubrum. Rose. Emperor William. 66 6.6

Dark crimson; fine.

Mt. Blanc. Pure white.

James' Prize. Remark-66 ably large flowers. 30 cents.

Gigantium. Flowers much larger than C. Persicum; finer in every respect; of rich, varied colors. 30c.
Rosy Morn. Bright delicate rose.

Atrorubrum. New, dark red. 30c.

DAISY.

Double White. The flowers are very double; pure white. An excellent plant for early spring planting, forcemeteries or garden culture, bloom-ing in May and June, mixed or separate colors. 10

ning in may and office, intered of separate colors. To cents each; 75c. per dozen.

Pouble Rose. Delicate rose color. 10 cents.

Double Red. Deep dark red, quilled fine and double. 10c. each; 75c. per dozen.

DAPHNE ODORATA.

A plant no collection should be without. green, growing two or three feet high, bearing clusters of small pinkish white flowers, extremely fragrant. 25 cents each.

DAHLIA.

The Dahlia succeeds best in a strong, loamy soil. Plants should be set four feet apart. One of the most attractive autumn flowers, blooming from August until killed by frost. Bulbs can be started in pots in March or April to be planted in the

open ground in May, when safe from frost, to encourage early blooming, or bulbs can be planted in the open ground in early May. Store bulbs in winter by packing in saw-dust or dry sand in a cel'ar free from frost. The following are selected from large collections as the best contrast in colors. Price 15c. each; \$1.50 per dozen.

Large Flowering.

FEVERFEW.

Little Gem. A dwarf and continual bloomer of the double feverfew, being constantly in bloom from May till frost in the fail. The flowers are pure white, very double, and compact habit; 20 inches high, flowering more free than the old variety; no plint with so little care gives such returns for white flowers. Price, 15c. each; 12 for \$1.50; small size 10c; 12 for \$1.00.

Golden. Used largely for massing or in ribbon planting and hanging haskets having no metits as Little Gem. A dwarf and continual bloomer of

planting and hanging baskets, having no merits as

a flowering plant; leaves of a golden yellow color. The flower shoots should be nipped off when they appear. 10 to 5 cents cach; \$1.00 to \$1.50 per dozen; \$6.00 to \$8.00 per 100.

FERN.

Their gracefulness of foliage makes them much val-

FUCHSIA.

The Fuchsia is much used for bedding in places partially shaded from the noonday sun, where it thrives luxuriantly. In a collection of house plants it certainly deserves a prominent place, where its graceful, beautiful form and delicate coloring are always admired, and is a favorite with all. If you wish to preserve for the winter, place in a 6 or 8 inch pot, plunge in the ground in the spring, two inches below the rim, in a shaded place. Just before frost. remove to the house, where it wil also bloom freely in winter. Price. 20 cents each; \$2. per dozen; second size, 15 cents each; \$1.50 per dozen. except where noted. Small size, \$1. per dozen, except where noted.

DOUBLE VARIETIES.

Storm King. The best and most admired of all fuchsias; remarkable for its free growth, weeping habit, and freeness to bloom. Its carmine buds are hung in great profusion among the green foliage. The blooms when open, are white with a delicate rose tint. No lover of plants should be without this valuable variety. Price, 20 cents each; 6 for \$1.; 12 for \$1.75. Extra strong plants, 30 cents each; 6 for \$1.50; 12 for \$2.50.

Emperor of Brazil. Corolla violet, flaked with rose; sepals crimson.

Bulgarie. Red sepals; large reddish violet cor-

Col. Desbordes. Salmon rose sepais; corolla globular, of pure violet.

lysee. Sepals coral red; corolla dark violet, in

Elysee. large clusters.

Telegraph. Sepals long, dark red; violet corrolla. Duke of Albany. Sepals red; corolla purplish

ZONALE GERANI-UMS.

It is truly wonderful to know the great improvement and number of varieties produced, embracing as they do great range of form and color, yearly adding to the number of new varieties, superior in most respects to the older ones. The foliage as well as the flower has been remarkably improved. As a house plant, the Geranium is cul-tivated more than any other plant, and for bedding purposes the number nearly equals the Verbena. A bed of fine Scarlet Geraniums is dazzling to the eye from June till frost; nothing more suitable and attractive on a lawn. If a border of Coleus, Alyssum, Golden Feverlew, Alternanthera, Centaurea or some other plants, can be ad ded; it is much more attractive, giving beautiful effect. Smal plants, 15c. each; \$1.50 per dozen. my choice of varieties, \$1.00 per dozen; Bedding Geraniums, \$7. to \$10. per 100. Large strong plants 20c. each; \$2. per dozen.

My stock of Geraniums will number many thousand plants, and parties wishing them in quantities will be supplied at liberal discount. Write for special prices on larger quantities.

red; free; a good market sort.

DOUBLE VARIETIES.

Price, 25 cents each except where noted; the set of ten, \$2.00.

Drame. Sepals reflexed bright red; corolla beautiful blue.

Dr. A. Watelle. Sepals scarlet; corolla striped blue and rose

A. Courbert. Tube and sepals red; enormous corolla, dep violet.

smeralda. Sepals red; tubes short; corolla very large; lilac changing to rose. amna. Sepals cherry; large full corolla; purple Esmeralda.

Jamna. marked with rose.

Le Progress. Sepals dark red; corolla blue.

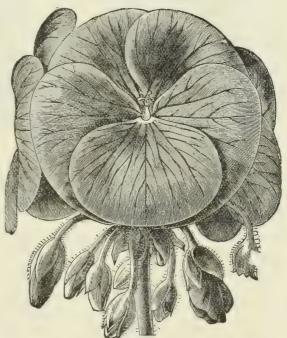

Mdm. Thibeaut. Sepals carmine; corolla car mine; edged white.

Pres. Grevy. Sepals carmine; corolla lilac and

violet; fine.

Perle Von Brunn. Schals clear red; corolla
very double; finmenes size; pure white; as large
as Storm King; very strong grower; a first class
new variety. 30 cents each.

Progress. New large double white; improvement of Snow White.

GERANIUM SINGLE.

Conference. Enormous trusses of large, purple

amaranth flowers, shaded with deep, velvety red.
Corigo. Fine rosy scarlet.

An improvement on Happy Freak of Nature. Thought, and very dwarf; its white variegation is most beautiful; one of the best ornamental foliage plants. 20c.; small size, 15c.

MDM. SOLLEBOL

GERA-GOLDEN BRONZE NIUMS.

This class of Geraniums are admired for purposes, bedding growing vigorously, succeeding best and assuming their brightest colors during the heat of summer. They are not only attractive in foliage but the beauty and variety of the flowers add additional value [to them. 20c. each ; \$2.

per dozen. Second size, 15c. each; \$1.50 per dozen. Purchasers selection, prepaid by mail. Bed-

en. Furchasers selection, prepain by mail. Bedding plants, \$8. to \$10. per 100.

Black Douglass. Foliage yellow, broad chocoolate zone; different from other sorts in having bright pink flowers.

Black Prince. Leaves large, with a beautiful dark zone, vices and earner the behit producing dark zone, vices and earner the behit producing the producing and control of the producing dark zone, vices and earner the behit producing the produ

dark zone; vigorous and compact habit, producing

fine large trusses of scarlet blooms.

Crystal Gcm. An excellent bedding variety, leaf disk bright green, broadly margined golden

Earl Roslyn. Broad band of rich bronzy red, the old leaves becoming golden yellow.

Exquisite. Large chocolate zone with large yellow center, edges variegated; flowers salmon.

ohn Offin. Leaf has a broad band of chocolate,

John Offin. Leaf has a broad band of chocolate, similar to Marshal McMahon, but a stronger grower and excellent bedder.

Golden Banner. A golden leaf without green or the slightest trace of a zone, and if the flowers be removed, it forms a mass of pure gold.

Kentish Hero. Bright gold leaf and rich bronze zone, being very distinct.
 Marshal McMahon. Leaves golden yellow

Leaves golden yellow marked with a deep, broad, chocolate ring.

Model. Flowers bright salmon; finely shaped zone

wery near the margin of the leaf; a large bright golden disk.

Prince Bismarck. Foliage yellowish green with narrow zone of very deep chocolate; flowers salmon, tipped white; fine.

Plutus. First class every way; yellow leaf, very high-colored red brown zone, rich salmon colored flowers.

Richard Thornton. Center clear yellow; zone brilliant maroon red; flowers salmon; shaded white.

Above set of 13 sorts for \$2.

GOLDEN VA-RIEGATE D GERANIUM

This selection of Geraniums are very popular. Mrs. Pollock is the type of this class, but some of the varieties enumerated excel it in beauty. 25c. each; \$2.50 per dozen.

Crown Jewel. Large yellow leaf with narrow bronze ring finely marked with flame color; good grower.

Goldfinch. Yellow. green and bronze leaf: excellent grower; dis tinet from any of this

Lady Cullum. Rich crimson bronze zone and brilliant flame col-.ored flowers.

Louisa Smith. A vigorous grower with a

distinct zone of bright red and black.

Mrs. Turner. A quick growing variety, posessing exceedingly vivid colors.

Mrs. Pollock. This is a type of Golden Tricolor

Geraniums, and is still a good standard variety; excellent grower, and high colored scarlet bronze, yellow and green foliage; first class. (See cut.)

Sir Robert Napier. Zone very dark and broad, indented with bright scarlet Van Dyke blotches; salmon colored flowers; 30c. each.

A beautiful kind, with very bright colors; of free growth and good habit.

Sophia Damaresque. Golden Margin, dark zone with scarlet tinge; a free grower. John Downie. Leaf yellow with distinct zone

of dark chocolate flamed scarlet. 30c.

Mdm. Dannette. A new variety similar to Sunset, with distinct zone and brilliant markings. 30

SILVER VARIEGATED and SILVER EDGED GE-RANIUMS.

Very handsome and useful Geraniums; the Silver Tricolors are remarkable for their silvery leaf margins and delicate pink, rose and scarlet zones.

25c. each; \$2. per dozen, unless noted.

Albion Cliffs. Delicate green leaf with a broad margin of the purest white.

Argus. Chocolate, white and green.

Bijou. Flowers dazzling scarlet; leaves bordered white and yellow.

Caroline Longfield. Silver Tricolor, very beautiful broad white margin with a bright pink astle of Milk. The white is very pure, cover-

Castle of Milk. ing half the leaf.

Charming Bride. Silver Tricolor, very dis-tinct, having large reflexed leaves and very bright scarlet wone.

Excellent. A splendid tricolor, having very high

colored carmine scarlet zone.

Italia Unita. Silver Tricolor; an old favorite; very high colored zone when well grown. Should be in all collections.

May Queen. Silver margin; this has the largest and flattest leaf of any sent out.

Miss Burdette Coutts. Silver tricolor; a most beautiful variety, having a creamy white leaf margin and a very bright lake crimson zone; good habit and a free grower.

Mrs. Laing. New and attractive, Mrs. Maxwell. White, bronze and scarlet, Stanstead Beauty. Silver edged with distinct zone of bronze and rose tint.

Dolly Varden. One of the finest of its class. 30 cents.

Mountain of Snow. Good grower; an abundant bloomer, and for ribbon lines or massing, is one of the best. The center of the leaf is bright green, the outer margin broadly marked with silvery white. One of the whitest leaved sorts; flowers bright scarlet. 10, 15, and 20 cents each; \$1.50 to \$2. per dozen; \$8. to \$10. per 100.

Stella. Green, dark zone, bordered bronze and

silvery white.

IVY-LEAFED GERANIUM.

This class is adapted for hanging baskets and trailing or trellis work, etc. 10 and 15 cents each; \$1. and \$1.50 per dozen.

L'Elegante. The foliage of a bright green with broad bands of creamy white, often margined with pink. Its pure white blossoms are produced in dense clusters. (See cut.)

L'ELEGANTE.

DOUBLE IVY GERANIUMS.

A. T. Simmons. White, flushed with lavender, upper petals marked with purplish black; blooms the whole season.

Anna Pfitzer. Extra large flowers; color salmon pink; distinct and fine.

Faustein Helie. Large and fine; flowers deep,

rosy carmine. King Albert. Beautiful mauve, suffused with violet and very double.

Lucy Lemoine. White, tinged with rosy lilac.

M. Dubus. Deepest rose pink, same shade as double zonale variety, Mdm. Thibeaut; a fine and distinct variety.

Prince of Novelties. A new and desirable variety; white, blush and dark spots.

Robert Fortune. A grand variety, with fine large, carmine shaded pink flowers; trusses large and freely produced; habit compact.

Scepter. Finc, large, rosy lilac.

Vista. Large flowers; very delicate blush pink.

Price, 3 sizes, 10, 15 and 20 cents each.

SCENTED SWEET GERA-NIUMS.

First size, 20c. each; \$2. per dozen. Second size, 10 and 15 cents each; \$1. and \$1.50 per dozen.

Rose.

GLOXINIA.

Are summer blooming bulbs for the house or contre summer blooming bulbs for the house or conservatory; always greatly admired by all, and no lover of plants should be without one or more. They are among our best ornaments, blooming freely from May to September. Their rich, velvety green foliage, graceful, delicate and rare tints of violet, rose, white, crimson and scarlet flowers, have gained for them prominent places among our very choicest plants. To grow Gloxinis well, give them a rich, porous soil, in warm moist atmosphere, shaded from the sun. When they are done blooming, dry them off gradually. they are done blooming, dry them off gradually, and keep free from moisture until they begin to grow again in the spring. Avoid having the earth too firm around them, and wetting the leaves sometimes causes them to decay if much exposed to the sun. My collection embraces many hundred fine plants in splendid colors of the finest French and English seedlings, surpassing really many of the finest named varieties. Price 25c. each; \$2.25 per dozen. Extra strong bulbs, 35c each.

GLOXINIA.

HELIOTROPES.

One of the most fragrant and easily cultivated of all house plants; a single plant will often fill a

room with its fragrance.

Purple Gold. Foliage yellow, flowers large, purple, giving a fine contrast with the leaves. Purple Gold.

Swanley Giant. A rosy purple; immense truss. Chieftain. Rich shade of violet; the standard variety for bedding or winter blooming.

The Standard. Deep purple. Star. One of the darkest varieties, with an immense truss. Etoille de Marseilles. Very dark purple;

large white eye. Juliette. Strong grower; truss very large, color

dark violet.

Snow Wreath. White; truss large; fragrant.
Peruvianium. Nearly white; truss large; first
class every way; strong grower and free bloomer.
The Queen. Royal purple; superior to Reo des

Price, 20 cents each; \$2. per dozen. Small plants, 15 cents each; \$1.50 per dozen. My choice, 12 plants, by mail, \$1.

HIBISCUS, (Chinese.)

Are quite popular as bedding plants in many places, and valuable for winter blooming. Six best varieties double and single, price 15 to 20c. each.

HOLLYHOCK, (Double.)

I offer a fine assortment of this showy plant, seedlings from choice strain, ranging through all shades of yellow, crimson, rose, violet, lilac, etc. 20 cents each; \$1.50 and \$2.00 per dozen. Small size, 10c.; \$1. per dozen.

For Hardy Shrubs, Hardy Roots and Bulbs, and Hardy Climbing Vines, see Index.

DOUBLE HOLLYHOCK.

HANGING BASKETS AND VASES.

The following plants are used. See special descriptions. 10 to 25 cents each; 75c., \$1.00, \$1.50 and \$2.00 per dozen.

Alyssum, Agave, Alternanthera, Achyranthes. Begonia, Centaurea. Coleus, Cobæa, Cuphea Dracæna, Feverfew. Ferns, Geraniums. Ice Plant.

Ivy, English, Ivy, German, Lobelia, Mahernia, Smilax. Trandescantia, Oxalis, Palm, Pilea, Petunia, Passion Flower, Sedum, Vincas.

ENGLISH IVY.

IVY, (English.)

Several varieties, including English, Irish and Scotch. For indoor decoration, baskets, etc., the Ivy is unsurpassed. Price, 25c. to \$1.00 each. Small plants, 10 and 15 cents each; \$1. to \$1.50 per dozen. (See cut.)

IVY: (German.)

Alplant of rapidigrowth, with dark green, glossy

foliage, used for covering walls, arbors, and hanging baskets. Price, 10 to 15c. each.

HYDRANGEA.

Variegata. Green and white leaves, beautifully variegated. As a house plant, or for bedding purposes in a shaded situation, it is one of the best plants grown. 25c. each.

Plants glown. 2000 changing to blush purple. Plants bloom when quite small. 250. each. Hortensis. The old hardy variety, growing about two feet high; one or two feet in diameter. Flow-

ers same as Otaska.

Thomas Hogg. See Hardy Shrubs.

Paniculata Grandiflora. See Hardy Shrubs.

JASMINUM GRANDIFLORUM.

JASMINUM GRANDIFLO-RUM.

(Catalonian Jessamine.)

A winter flowering plant, either for parlor or greenhouse; blooming from October to May. The flowers of pure white; deliciously fragrant. 15 to 20 cents each.

JESSAMINE, (Cape.)

Highly perfumed, pure white flowers; half hardy, blooming in June. Can be kept cool during the winter. 25, 35 and 50 cents each.

DAY LILY.

The popular white Day Lily or Funkia; flowers somewhat trumpet shaped; 25c. each.

DAY LILY, (Variegated.)

Similar to common Day Lily, but more beautiful, having variegated foliage; very showy. Price, strong plants in pots, 25c. each.

LILY OF THE VALLEY.

A plant extensively grown for forcing in winter and early spring, the fragrance of its pure white flower spikes being much prized in the construction of the most valuable bouquets and baskets. It is entirely hardy, preferring a slightly shaded posi-tion. Price, large clumps, 25 cents each; \$2.00 per dozen. Smaller clumps, 15 cents each; \$1.50 per dozen.

JAPAN LILIES.

Their ease of culture and hardiness are inducements to those unacquainted with their habits to give them a trial. Millions are sold for bedding

and forcing, where but few, comparatively, were sold a few years ago. They thrive best in a light, rich soil, partially in the shade, and remain undisturbed a number of years, frequent removals being injurious by destroying the roots. Once planted, they continue to increase in beauty from year to year. They should be planted 6 to 10 inches deep, according to the size of the bulb, and given winter protection by covering 2 inches deep with straw, coarse manure or leaves. They all succeed well grown in pots, Longistorum, Candidum, and Harrisil being much forced in winter.

LILIUM AURATUM.

Lilium Auratum. The Golden Japan Lily. White, with gold band through center of petals; spotted with crimson. Extra strong California bulbs. My bulbs of this noble lily are very large and fine; 35c. each; \$3.50 per dozen. Strong flowering bulbs, 25c. each; \$2.50 per dozen.

Excelsum. It grows from 5 to 6 feet high, ducing 8 to 12 drooping lilies of delicate buff; fragrant and a great favorite. 50c. each.

*Lily Harristi, or Bermuda Easter Lily.

The most popular lily now grown. It has large, waxy-white, trumpet shaped flowers, with re-curved petals. After blooming, it will often throw up a second or third stem of flowers, and is sometimes called Perpetual Blooming. It will produce from 5 to 20 flowers or more on a stalk, and in its native country has been known to produce 145 flowers at one time on a stalk. It is hardy, and can be planted in spring or fall, and should be in all collections of plants. It blooms in July; is easily forced into bloom in winter having flowers during holidays by starting in pots in August and September; flowers selling for 50c. Adjust and September; nowers selling for 50c. and \$1. each. For Easter, quantilies of these flowers are readily sold at 25 to 50 cents cach. Price, 25c.; \$2. per dozen. Extra size selected bulbs, 35c. each; \$3. per dozen.

*Longiflorum. Large trumpet shaped flowers, and the shaped flowers.

snow white and fragrant, used for forcing. This lily is largely grown, perfectly bardy, and used much as a forcing lily for winter. Makes a fine appearance planted in groups in the garden or lawn; blooming in July in the open ground.

LILY HARRISH OR BERMUDA EASTER LILY.

Price, 15c. each; \$1.50 per dozen.

Candidum. Pure white, bell-shape, from five to twenty flowers on a stalk, blooming in June; one of the most hardy and useful lilies. This can be planted in spring or fall, but will yield more flowers when planted in August or September. Is largely used for forcing in winter, blooming when in August or September. Price, large, strong flowering bulbs, 15c. each; \$1.50 per dozen; \$10 per 100.

*Speciosum Album. One of the best white Japan varieties. 40c. each.
 *Speciosum Rubrum. Similar to above, being of a deeper rose, and crimson. 20c each.

Speciosum Roseum. One of the best Japan varieties of its color, white spotted rose. 20c. each.

Speciosum Monstrosum Album. B flat stems; color pure white; flowers freely. *Speciosum Rubrum Monstrosum. flat stems, flowering more freely than Rubrum, to which color it is similar. 30c. each.

Superbum. It yields from 20 to 50 flowers in a

pyramidal form of yellowish red color, in July. lác, each.

*Tigrinum. (Tiger Lily.) Orange salmon, spotted black. 15c. each.

*Tigrinum, Flora Pleno. (Double Tiger Lily.) Same as the preceding except in form of flowers, which are double. 30c. each.

*Umbelatum Erectum. Yellow, with brown and dark orange spots. 15c. each.

Chalcedonicum. Flowers bright coral red; wetals releved a producing from 4 to 15 blooms; do

petals reflexed, producing from 4 to 15 blooms; do best when bulbs remain undisturbed for several years. 50c. each.

Tenifolium. Produces from 3 to 25 flowers of a brilliant vermillion scarlet. It blooms carly in June, and can be early forced in the house; plant where well drained; will surely rot if in wet soil. 30c. each.

Pulchellum. Handsome and quite rare; flowers upright, of a vermillion scarlet, having a star-like

appearance. 40c. each. I have marked with (*) the varieties most hardy and easily cultivated in the common way of hardy garden lilies.

LEMON VERBENA.

A well-known shrub, indispensable for the delightful fragrance of its leaf. 15 and 20c. each.

LANTANAS.

Are exceedingly handsome and easy of cultivation; blooming abundantly eight months in the year, and are never attacked by insects.

Adolph Avis. Canary, dark center.
Alba Perfecta. Pure white, very fine.

Aurantiacum.

Flora. Orange and pink.
Flava Lilacina. Lilac and orange.
Harket's Perfection. Foliage variegated with vellow: flowers lilac.

Monfeck. Crimson, compact habit.

Mdm. Carlotte. Orange red, yellow centre.

Pluie d'Or. Pure yellow. Richmond Gem.

Price, 10, 15, and 20 cents each.

LOBELIA.

Avery useful plant for hanging baskets or for rib-bon beds; flowers of all shades from white to the deepest blue. 10 to 15c. each; \$1 to \$1.50 per

MYOSOTIS, (Forget-Me-Not.)

When in bloom is about nine inches high; it is covered with rich blue flowers, each flower having a white spot in the center. 10 and 15c. each.

MADEIRA VINE.

The Madeira Vine is a beautiful climber, with thick, glossy, light green, almost transparent leaves, and climbing habit. Bulbs, 10c. each; \$1 per dozen.

MYRSIPHYLLUM ASPARAGOIDES, (Smilax.) There is no climbing plant in cultivation that sur. Minona. Turple and crimson, mottled white. Minona. Turple and crimson, edged white. Irene. Mottled crimson and white. Oracle. Rosy carmine, edged white. Ralph. Fine deep rose crimson.

passes this in the graceful beauty of its foliage, and its peculiar wavy formation renders it one of the most valuable of all plants for vares or hanging baskets, as it can be made to either climb or droop as required; in cut flowers it is considered indispensable. 20 cents each. Small bulbs, 15c. each; \$1.50 per dozen.

PETUNIAS, (Single.)

From seed, varying through all the shades of crimson and rose, to purest white, striped, mottled and self-colored; from superb strain of Hybrida Grandiflora. Price, 10 cents each; \$1 per dozen.

DOUBLE PETUNIA.

PETUNIAS, (Dcuble.)

The list below, I think, will be found to be one of the finest collections yet sent out. They are all very double, beautifully marked, and many of them finely fringed. Price, 20 cents each; \$2 per

dozen, except where noted.

Attraction. White, rosy carmine and purple.

Argus. Rosy purple, slashed white.
Charming. White, veined with carmine, double, compact and free.

J. G. Draton. The best and most distinct purple fringed variety; deeply fringed, and very double. Exquisite. Beautiful pink, veined with a fine

line of purple.

Longstreet. Carmine and white.

Model. Mottled, marble white, crimson and purple maroon.

Mrs. Coleman. Dwarf, compact; very free bloomer; very double, pure white, and deeply frinzed; certainly the finest double white ever offered. 25c. each.

Monarch. Dwarf, bushy; very free bloomer;

flowers, large, crimson and white.

Silver Queen. Beautiful white, sometimes marked with a faint rose tint. White, with large rosy crimson Volunteer. blotches.

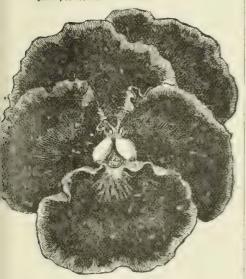

CHINESE PRIMROSE.

PRIMROSE, (Chinese Single.)

One of the finest of our winter blooming plants, producing flowers in great profusion. Make splendid plants for the parlor in winter, and are very easy of culture.

My plants are from the improved strain of large flowering, and comprise all shades of red, white, striped and spotted, with fringed petals and com-pact growth. Price, 15 and 20c. each; \$1.50 to \$2.00 per dozen.

PANSY.

PANSY.

The wonderful improvement made in the varieties of Pansies has rendered them extremely popular plants for early spring, summer and autumn flow-ering. For massing in flower beds, no plant is more essential. Plants from my improved large flowering strain, 6 cents each; 60 cents per dozen; \$4 per 100. Ordinary pansies, 50 cents per dozen; \$3 per 100.

My plants are seedlings from the very choicest seed that can be procured.

PHLOX, HARDY PEREN-NIAL.

As these plants bloom well in partial shade they are valuable for city gardens or shrubberies. They are entirely hardy in all sections of the country, growing two to three feet high; blooming late in summer; increasing by division of roots. each; 6 for \$1.00; \$2.00 per dozen.

Alburtus. Crimson majenta.

Buffoon.

La Promise. White, purple center.

Lothair. Rosy sulmon.
Peleton. Magenta, white centre, violet tint.
Rio des Rois. Deep rose, crimson centre.

Reve d'Or. Dazzling carmine. Surprise. Purple, mottled white. York of Lancaster. Lilac, striped white.

Snowbank. Pure white; fine for cemetery.

TUBEROSE, (Double.)

Grow on long stems three feet high, and produce the most beautiful, waxy-white, sweet-scented flowers of any bulb in cultivation, having from 20 to 30 flowers on each stalk. Price, 8 cents each; 60 cents per dozen. \$3.50 per 100. Started in pots. 25 cents each; \$2.25 per dozen.

TURBROSE-" PEARL."

DOUBLE TUBEROSE.

(" Pearl.")

This is more dwarf than the preceding variety; its flowers are much larger and imbricated like a rose. Is much better in every respect than the old variety. Price, first quality bulbs, 7 cents each; 60 cents per dozen; \$3 per 100. My tuberose bulbs are the best that can be obtained; not one in a hundred will fail to produce flowers if properly treated.

Double Tuberose Excelsior Pearl. An improved strain of the Pearl variety, with large flowers more dwarf, blooming as free. Price, 8c.

each; 75c. per dozen; \$3.50 per 100.

PRIMROSE, (Double White Chinese.)

One of the most popular plants cultivated for win-ter flowers, well grown specimens often yielding 500 flowers during the winter. Always very scarce. Price, 40 aud 50 cents each.

DOUBLE WHITE HARDY PRIMROSE

One of the earliest of spring flowers. It is hardy, and is much used as a spring flower in cemeteries. 20 cents each.

GLADIOLUS.

GLADIOLUS.

They are remarkable for easy culture, fine habit, in-tense beauty of coloring in the flowers, varying from the most brillant scarlet to pure white, rose to pure yellow and purple, striped and flaked in the most beautiful manner with very delicate tints. The flowers are produced 20 to 30 in a cluster, on flower spikes about 3 feet high. The great improvements among the French and American Hybrids is astonishing, yearly producing many new and very valuable varieties. A succession of bloom may be had from July to September, by planting at intervals from April to June, reserv-ing the strongest bulbs for the last planting. The bulbs should be taken up in the fall and placed in a dry cellar, protected from the frost. I keep in stock a large collection of named varieties, and have selected the following, which are the most distinct in color, and among the best, showing good spikes. No class of bulbs require so little labor

and expense for the amount of beauty and please ure returned, being exceedingly popular in alparts of the world. I omit many of the high priced varieties, knowing that in the list below a selection can be made equal to most of the expensive sorts. Some of the costly bulbs are put in collections of 12 distinct colors, ranging from \$1.50 to \$3 per dozen. Where the selection is left with me, care will be given in selecting a good contrast of colors, parties stating price per one-half dozen or dozen they wish to pay.

Addison. Dark amaranth with white lines, large flowers. 10 cents.

*African. Brown or scarlet African. Brown or scarlet ground streaked with white and scarlet, one of the darkest and most novel varieties; dense spikes. 25 cents.

Aristotle. Light flesh, spotted red, lower petals

striped carmine and purple. 10 cents.

Antonius. Cherry tinted with orange, blazed

carmine. 10 cents.

Amalthier. Deep rosy carmine, white blotches, yellow throat. 10 cents.

Angele. White, very showy. 10 cents.

Arlequin. Salmon rose, striped carmine, large blotch on yellow ground. 30 cents.

Bijou. Lilac, shaded lavender white. 10 cents.

Benard de Jussiuss. Violet, shaded cherry and purple; purple blotch on white ground. 10 cents. Brenchleyensis. Rich, dark scarlet; very bril-

liant; fine for massing. 10 cents. 75 cents per doz-

B. Rabourdin. White, large carmine blotch. 25 cents.

*Cameleon. Magenta, lilac shaded towards the center; flamed with dark lilac. 25 cents. Canary. Light yellow streaked with rose. 15

cents. Ceres. Pure white, flamed lilac. 10 cents.

Robert Fortune. Orange lake shaded to crimson, veined white. 15 cents.

Romulus. Intense dark red, blotched with pure white. 10 cents.

*Sultana. Satin rose, flamed carmine blotch on

white ground. 25 cents. Sylphide. Long spike, color fine white, flamed carmine. 10 cents.

*Shakespeare. White, rosy blotch. One of the earliest to bloom, and much used for forcing; fine

earliest to bloom, and much used for forcing, the graceful form. 20 cents.

Vesta. Pure white, with purplish carmine blotch ton yellow ground. 10 cents.

Vulcan. Velvety scarlet: purple, shaded violet purple in center. 15 cents.

*Zenobia. Rose tinted violet, flamed dark car-

mine, large blotch flamed crimson. 15 cents.

The Bride Pure white, 25 cents. One dozen choice named from above list amounting to \$2, your selection, will be forwarded for \$1.50.

Extra choice selection Gladiola, \$2.00 and \$3.00 per dozen.

The mixtures, separate colors and seedlings below will be found to contain some of the very finest named sorts from many hundred varieties. The bulbs will be found equal to any offered by other leading florists, and the price exceedingly low, considering the varieties the mixtures contain.

The below prices are when ordered by express; add 15c. per dozen when ordered by mail.

Very fine mixed varieties, PER DOZ. Various shades of red and scarlet, \$ pink and scarlet, light colors and 66 .70 white, 66 vellow, .75 Seedlings, extra choice mixtures, .75 All shades and colors, per 100, \$3, .35 Extra choice, all shades and colors,

per 100, \$4, For named varieties, those marked with a star are among the best in contrast of color, fine habit and beautiful markings. The set of 12 for \$1.75; by mail, for \$2.00.

REGAL PELARGONIUMS.

This type are the most beautiful colored flowers, large, very rich and showy; although they are not really double, yet from their fullness of form and the extra number of petals, they have the ap-

pearance of being so.

Beauty of Oxton. Upper petals maroon, dark blotch; under petals crimson, shaded maroon; margined white fringed. 40c.; small size, 30c.

Queen Victoria. A rich vermillion, petals broadly margined with white, upper ones blotched ma-

roon Mm. Thibeaut. Among the finest of pelargoniums. Truss and flowers large, deeply frilled. White, blotched and marbled with rose; upper petals marked dark maroon blotches; center white. 35 and 50c.

Triumph de St. Maude. Rich coloring, one of the very best. Habit dwarf, short jointed and free; excellent market variety. 40 cents each.

FRENCH ODIER PELAR (+ONIUMS.

FANCY PELARGONIUMS.

Black Prince. Chocolate maroon, circle of white on the outer edge. 40 cents each.

Gambetta. Purplish crimson, rich and velvety

frilled. Each 40c.

Count de Flanders. White ground shaded crimson, frilled; 50c. each.

Dr. Keith. A beautiful rosy crimson, edged

white, maroon blotched with white center, frilled, 40c. each. Madon's Victor. Large, light scarlet flower,

maroon blotch, white center. 35c. each.

Dr. Mastiers. Dark maroon, with maroon mar-

gin of crimson. 35c.

Digby Grand. Crimson veins and blotch on up-

per petals, fringed. 35c Kingston Beauty. White with a dark purple

STANDARD SPOTTED AND SHOW PELARGONIUMS.

I offer a carefully selected collection from the best English and French varieties, which can be highly recommended to all lovers of these rich and showy flowering plants, sometimes known as the Lady Washington or Pansy Geranium. Princess Teck. White rose, maroon.

Belle of Paris. Carmine rose, blotched maroon.

ROSES.

EVER-BLOOMING ROSES

Are the only continual bloomers, commencing early in the season, giving an abundance of bloom through the summer and autumn until checked by freezing weather. The Tea Rose buds are the freezing weather. most beautiful of all, although the Bourbon, China, and Noisette, are more hardy and bloom as freely, they give better satisfaction than any other class of roses. Many of the Noisette, China and Bourbon do well when left in the open ground during the winter, with slight protection. When the tops are killed to the ground, they start vigorously in the spring from the root, and continue to grow and bloom nearly the entire summer. The old wood should be cut out as soon as the new

growth appears. Should the roses be entirely destroyed, it is of no serious matter, as they can be replaced with trifling expense. Verbenas, Gerantiuns, Foliage, and many other plants, are destroyed by frost annually, and replaced in the spring with new. The rose is no more expensive, and generally young plants will do the best. No plant will better repay their cost than a bed of EVER-BLOOMING ROSES.

The dead branches should be cut back to the live wood. If the plants are lifted in the fall into boxes of earth, cut back, and kept in a cool cellar, giving water enough to keep the bark from drying, they can be planted out early in the spring, and will start into bloom in a very short time. If wanted for winter blooming, they should be kept in pots during the summer, keeping the buds picked off, plunging the pot in the open ground to the rim, shifting as it grows to a larger size, once or twice during the summer.

To those who are not acquainted with the varieties, and stating what colors they prefer, or whether for pot culture, bedding out, or climbing, and when left with us, we will guarantee to select varieties that will please you, always sending named varieties and labeled.

I grow Roses in large quantities, and our system of packing is so complete, that I safely send roses

or packing is so complete, that I sarely send roses and all other plants to all parts of the United States by mail or express with perfect safety, and GUARANTEE them to reach the purchaser in good growing condition. They are all grown in pots on their own roots, are fine, strong, healthy plants, equal to any roses grown in this country of the same size and price.

If good strong blooming plants are wanted, it is best to order the large size. If not particular about blooms until late, the smaller size will answer, if you can wait two or three months for them to

I send by mail, with cash orders, postage prepaid, or by express, paid by the purchaser, at the following rates, each variety labeled and guaranteed to arrive safely, purchaser's choice of varicties.

For \$1. will send Seven Roses.

For \$2. will send Sixteen Roses.

For \$3. will send Twenty-four Roses.

For \$4. will send Thirty-two Roses.

For \$5. will send Forty Roses.

For \$6. will send Fifty Roses.

For \$10. will send One Hundred Roses.

I can also send a smaller size by mail or express for \$1. per dozen; \$2. for twenty-live; \$3. for fifty; \$5. per one hundred. My selection of varieties \$5. for 100.

ABOVE PRICES DO NOT INCLUDE MOSS ROSES.

My roses are wintered in cool houses, and are in condition to give the very best results for summer blooming. Remember, these Roses are not forced, but grown at the north in cool houses, and generally give my customers better satisfaction than those grown in a warmer climate.

grower and blooming profuse in large clusters. *White Daily. White; free bloomer.

HYBRID TEA ROSES.

This class combines the free flowering qualities of the Tea Rose, the hardiness of the Hybrid Perpetual, and is inclined to render them a valuable class of roses for the amateur and florist. For out-of-door planting they are desirable on account of their hardy constitution, producing flowers of the rich colors and delicious fragrance of the Hybrid Perpetual. They are considered hardy, but if protection is given them north of New York they will make better growth and bloom more freely.

DUKE OF CONNAUGHT. Crimson, the flowers large, full and fragrant; the buds are long

HYBRID TEA ROSE.

and finely formed; glowing crimson. Price, 20

Beauty of Stapleford. Flowers and petals large, of the finest form; of a fine light pink. 30

Duchesse of Westminster. Large, formed, fragrant; bright red. 20 cents each.

VISCOUNTESS FALMOUTH, Flowers large and of beautiful form; color, pinkish rose; back petals are of a bright pink, giving it a fine appearance. 20 cents each.

PEARLE. Flowers not of the largest size; color white, tinted flesh; is perfect in form, full and double; highly scented. 20 cents each.

LA FRANCE. A splendid variety; beautiful pale peach, changing to deep rose, shaded center; very large and full; free bloomer; delicious tea fragrance; one of the best for open ground or in pots. 15 cents each; large plants from 4, 5 and 6 inch pots, 25, 35 and 50 cents each.

Lady Mary Fitzwilliams. Delicate flesh; large, globular, full and fragrant. A beautiful rose. 20 cents.

Reine Maria Henriette. One of the finest in the list of hybrid teas. Its buds are long, pointed, large, of a beautiful light, soft crimson; very double when open, blooming in clusters. Is very hardy, standing the winter here without protection; blooming profusely in June, and continuing during summer. 20 and 25 cents. Price, 15c. each; strong plants

PIERRE GUILLOTT. Large, beautiful buds on strong, upright stems; color, bright crimson, with rich Hybrid Perpetual fragrance.

Queen of Bedders. Deep crimson; 20c.

Bennett. Deep, bright crimson, very large, long buds, desirable only as a forcing rose for florists, on a large scale under special treatment; 20c.

Puritan. A new, large, pure white forcing rose, similar to Mabel Morrison, its parent, but more free in blooming; very fragrant; \$1.00 each.

HYBRID PERPETUAL.

HYBRID PERPETUAL ROSES.

They are valuable for general collection, having a hardy constitution, vigorous in growth, and bear-ing throughout the summer and autumn, flowers of elegant beauty and delightful fragrance. They grow best in a rich, stiff, loamy soil, and should be carefully top dressed with stable manure in the fall. They may be massed in permanent beds, and in the spring and fall will make a gorgeous display of their rich bloom.

Do not prune in the fail, but on the approach of winter cover your plants with light straw or hay. This will protect them not only from the cold but from the intense heat of the sun, which, striking the stem when the sap is down, is very injurious. After the frost is over in the spring, remove the straw, and prune down to within two or three eyes of the ground, manure liberally, and an abundant crop of roses throughout the summer and full will be the result. Price small plants, 15 cents each; 7 for \$1; 15 for \$2; also see index for club rates. 32 for \$4, except where noted.

Extra large plants from 4, 5 and 6 inch pots, 30 to 50 cents each; \$3, and \$4 per dozen; \$15 to \$25 per

The varieties in bold type I grow in large quantities and are considered the best for all purposes in this class of Roses.

· ROSE CHRISTMAS. (Helleborus Niger.)

A plant of the easiest culture, blooming several months in the winter with double white flowers two to three inches in diameter, somewhat resembling a rose; is hardy and will bloom very early in spring in the open ground. In the Southern states will bloom at Christmas and continue for two months. Valuable for green house or house culture. 15 and 20 cents each.

SALVIA.

Splendens. A most gorgeous, fall flowering plant, growing from three to four feet in height, forming a beautiful bush, which is covered with spikes of bright scarlet flowers. 10 to 15c. each; \$1. and \$1.50 per dozen

White variety of the same Splendens Alba. habit of the preceeding.

Patens. Deep blue color; of good habit and forms

a beautiful contrast with Splendens Alba.

SEDUMS.

Valuable plants for hanging baskets, vases, rock work, or any dry place where other plants would perish for want of water. The flowers embrace different shades of carmine, orange, pink, white. Sedum Carneium Variegatum. One of the most useful; excellent for hanging baskets. Blooms in October and November. 15c. cach. Sedum Seboldi. Dwarf habit; leaves a light

green, flowers pink; a pretty plant for baskets or rock work. Blooming in autumn. 15c. each.

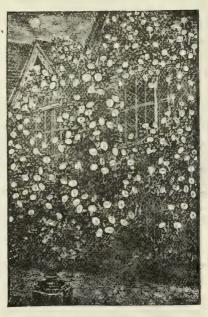

HELIANTHUS, (Dwarf Double Sunflower.)

(Hardy Perennial.)

Helianthus, Dwarf Double. A valuable addition to our hardy plants. It grows three to four feet high, giving an abundance of double yellow feet high, giving an abundance of the flowers about three to four inches in diameter, which last a long time, and are much in demand where known. It does not seed, but is increased by division of roots in the spring, living in open ground all winter for years, coming up every spring. It is really new, rare and beautiful; ar

ranged in groups in the garden or lawn, or for cut flowers in autumn it is highly prized. 20c. each; \$2. per dozen.

MOON FLOWER, OR EVENING GLORY.

MOON FLOWER, OR EVEN-ING GLORY.

Few plants, as a climber, give so much satisfaction as this. It can be trained on string, wire, or any screen, growing 15 to 25 feet in one season, bloomscreen, growing to to 25 feet in one season, blooming from August to November, covered with flowers in the evening, moon like in appearance, white, 5 to 6 inches in diameter, quite fragrant and very attractive. All who have a piace for vines ought to try it. It is also much used for covering stumps, walls, fences, arbors, summerhouses, etc. 20c. each; \$2. per dozen.

VERBENAS.

Having made a specialty of Verbeuas for over 17 years, I have selected the following, which combine free growth, good blooms and greatest variety of colors. Purchaser's choice, 8c. each; 75c. per dozen. Our choice, 6c each; 60c. per dozen; 25 for \$1.; \$3. per 100; \$13. per 500; \$25. per 1000, in one order.

Alert. Fine scarlet.

Aimee. Lavender and purple marbled.

Black Hawk. Dark maroon.

Beauty of Sherwood. Searlet, white eye. Bismarck. Cherry crimson, distinct, dark eye.

Beauty of Chastwood. Deep crimson, dark. Banner. Light pink and white, striped in dis-

tinct lines. Corkhill. Purple, white eye.

Cass. Magenta crimson.

Diana. Maroon, white eye.
Eclipse. Cherry scarlet.
Emily Dale. Fine pink.
Flirt. White: often striped pink.

Gleam. Dazzling scarlet, white eye. Geo. Maybe. Dark velvety purple, white eye. Jennie. Scarlet, white eye.

King of Scarlet. Clear scarlet, lemon eye. King of White. One of the best white.

Lavender Queen. Fine lavender. Lincoln. Pink, often striped. Mayflower. White, edged pink. Mozart. Pink and white striped.

Mrs. Willard. Large, deep pink; white eye. Miss Arthur. Dazzling scarlet; larger than Defiance.

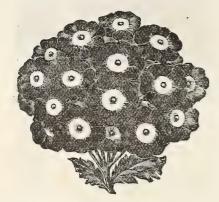

Velvet black. Negro.

Purple King. Very dark purple. Panyon. Pink, maroon eye. Queen of White. White. Ralph. Cherry red. Ruby. Magenta.

Rosea. Pink, white eye. Rosy Morn. Pink, white eye. Star of the West. Dark pink.

Sanguinea. Blood red. Silver Star. Dark maroon, lemon eye.

Silver Star. Dark maroon, lemon eye.
Surprise. Large, rosy pink.
Vulcan. Large, dark scarlet.
White Bedder. Pure white, fragrant.
Waterloo. Scarlet, velvet eye.
Zulu King. Fine dark purple.
The above set of 40 varieties, \$2. In ordering verbenas, it will be for the interest of the purchaser to leave the varieties to us. Knowing their habits enables us to select the best bedders, and in nine cases out of ten is certain to give better satisfaction.

NEW LARGE FLOWERING MAMMOTH VERBENA.

(1-2 Natural Size,)

This collection was first offered in 1886, to which I have added three new varieties and discarded five, now making a set of 12 distinct colors. Sc. each; the set of 12 varieties, 75c; by mail or ex'press, 20 for \$1., or 100 for \$3.50.

Crystal. Pure white.

.Damson. Rich mauve purple, white eye.

Edith: Salmon shaded carmine, white eye.
Emily. Royal purple, clear white eye.
Emerity. Large brilliant scarlet, maroon eye.
Beauty. Deep beautiful pink.
Fanny. Velvet rose, white eye.
Glow Worm. Brilliant scarlet.
Galetea. The finest striped; Scarlet striped

white.

Miss Massey. Salmon pink with white center. Marion. Mauve, white eye. Mikado. Large, deep salmon.

LEMON VERBENAS.

A well known shrub, indispensable for the fragrance of its leaves in bouquet making. 20 cents each; small size, 15c. each; \$1.50 per dozen.

SWANLEY WHITE VIOLET.

VIOLETS, (Sweet Scented.)

The varieties named below are the leading ones used for forcing during the winter months. violet forms one of the principal items in the for-

mation of bouquets, baskets, etc., of cut flowers. 15c. each; \$1.50 per dozen.

Double Blue Neapolitan. Dark blue.

Swanley White. Double white, very fine large flowers.

VERONICA.

A class of plants blooming during the summer months. The flowers are borne on spikes from 4 to 6 inches in length, and are produced in great abundance; the foliage is variegated green and white; fine for filling stumps, urns, etc. 10 to 20 cents each; \$1. to \$1.50 per dozen.

VINCA, (Periwinkle.)

Variegata. Pea green leaves edged with white; excellent for baskets, vases, urns, stumps and rock work. 15 to 25 cents each; \$1.50 to \$2. per dozen.

Major. Rich, glossy, green leaf, flowering pro-fusely the whole winter; fine for baskets. 15 to 25 cents each.

Elegans. A variegated variety of the same habit as the above. 15 to 25 cents each.

CUT FLOWERS.

I give special attention to furnishing and arranging Flowers, Designs, Bouquets, etc., for Weddings, Par-ties, Funerals, Decorations for Churches, and

other occasions; at all seasons; neatly and promptly executed at reasonable rates. C.E. ALLEN, Brattleboro, Vt.

Hardy Ornamental Flowering Shrubs.

The following are the finest hardy ornamental flowering shrubs. Strong, robust growers, thriving in all ordinary situations, and requiring but little attention; are very desirable in all kinds of ornamental planting, whether in door yard, lawn, park or cemetery, may be planted singly, or in groups, or clumps, as occasion or taste may suggest. Their season of bloom lasts from May until November.

HYDRANGEA PANI-CULATA GRANDI-FLORA.

The finest hardy flowering shrub in cultivation. The flowers are white, and borne in immense pyramidal trusses a foot in length, and 8 to 10 inches in diameter. It flowers in August and remains in bloom two or three months, attracting much attention. The plant attaining a height of three or four feet; very bushy and compact. It needs no protection, being hardy in all parts of the country. No one who has a lawn or garden should be without this beautiful shrub. (See illustration.)

To make compact plants and bloom more freely, cut 1-3 of last year's growth away in the spring; manure and loosen the earth around them,

as the largest and finest flowers are given from new, strong, vigorous growth. 25c. each; \$2. per dozen. Large, extra strong, two-year old plants, 50c. each; \$4. per dozen.

Hydrangea Thomas Hogg. Of low bushy growth, producing in July immense clusters of pure white flowers, often measuring 15 inches in diameter. It is equally as hardy as the old garden Hydrangea, and will be found a valuable plant for cemetery decoration. 20c. each; \$2.00 per dozen; large plants, 50c. each.

Hydrangea Otaska. Another splendid variety; heads of very large flowers, light rosy pink, contrasting beautifully with the other sorts. One of the finest of its class. Small plants, 20c. each; strong blooming plants, 50c. each.

H. Hortensis, or Garden. Frequently grown in pots or boxes; flowers are borne in large panicles, or heads, at first white, sometimes changing to light blue, and finally to a pink. 20c. and 50c. each.

Hydrangea Variegata. A beautiful and attractive foliage variety for house, garden or border culture. Leaves variegated, pure white mottled with light green. (See illustration.) An excellent selling plant during spring and summer, when grown in pots; not hardy. Price, 25c. each; \$2.50 per dozen.

HYDRANGEA PANICULATA GRANDIFLOBA.

Almond Alba. Dwarf, double, white flowering. 50c. each.

Almond Communis. A beautiful tree with double rose colored flowers in April. 50c. each. Althea, or Rose of Sharon. A splendid large growing shrub of easy cultivation, producing in mid-summer a great profusion of bell-shaped flowers, very showy, and of various colors. I offer four kinds, double white, double blue, single white and single blue. 25c. each; strong plants,

50c. each.

Althea Variegated Leaved. A very beautiful and distinct variety; regular and compact growth. Half of each leaf is green and half pure white. Large, very double, bright pink flowers. 25c. each.

Buraing Bush, or Strawberry Tree. (Eunoymus.) An ornamental showy shrub, whose beauty consists in its brilliant berries, which are produced in clusters, from the branches, until winter: of a rose color. Soc. each.

winter; of arose color. 50c. each.

Barberry, Purple Leaved. This beautiful shrub is one of the finest on the list. Its regular and symmetrical form, dark purple leaves and pretty yellow flowers, make it very attractive. 25c. each; strong plants, 50c. each.

Cydonia, Japonica. (fue Japan Quince)

HYDRANGLA VARIEGATA.

Blooms early in May, with single, scarlet flowers; very desirable. 25c. each; strong plants, 50c. each.

Calycanthus, (Florida) Sweet Scented Shrub. Flowers purple, very double and deliciously fragrant. Blooms at intervals during the season; old and much esteemed. 25c. each; strong plants, 50c. each.

DEUTZIA GRACILIS.

Deutzia Gracilis. Height, 2 feet; very bushy; used for forcing in winter; flowers pure white; blooms profusely; very hardy; flowers bell-shape, resembling Lily of the Valley. 20c.

Deutzia Crenata. Height, 4 feet; flowers

double white, tinged with rose; hardy and fine.

20c. each. Deutzia Fortunii. Height, 2 to 3 feet; one of the most beautiful and profuse flowering varieties; pure white; perfectly hardy. 25c. each.
Forsythia. Height, 3 to 4 feet; beautiful, bright

yellow flowers. Blooms early and profusely. 20c.

each; strong plants, 40c each.

Lonicera. (The Upright Honeysuckle.) Are
valuable, fragrant shrubs, and assume a handsome compact form, without much pruning; bloom early and thrive in any soil. Two varieties, white and pink, 20c. each; strong plants, 40c. each.

Lilac. New purple; immense heads of beautiful purple flowers; very sweet and much esteemed.

5c. each; strong plants, 50c. each. ilac Alba Grandiflora. Very large, pure white trusses of flowers; the best white lilac. Lilac Alba Grandiflora.

25c. each; strong plants, 50c. each. Mock Orange, or Syringa. A rapid growing, medium sized shrub, with very fragrant white flowers. 25c. each; strong plants, 50c. each.

Spirea Prunifolia. Heicht 4 feet; very beautiful; flowers perfectly double, like white daisies, bloome in Mock back.

blooms in May; hardy. 20c. each; strong plants, 50c. each.

50c. each.

The St. Peter's Wort, or Snowberry. A
very popular plant; bears branches of conspicuous
white berries. 20c. each; strong plants, 40c. each.
Weigela Rosea. The old, well known variety;
of compact, vigorous growth. has fine foliage,
and in June is literally covered with blossoms of clear pink, fading to flesh color. 20c. each; strong plants, 40c. each.

WEIGELA VARIEGATA.

Weigela Variegated Leaved. Deep green leaves, with a broad margin of pure white around very striking and pretty; rose colored flowers, same as above, but of smaller growth. 25c. each; strong plants, 50c. each. White Fringe. A small ornamental tree, bearing

pure white flowers resembling elegant fringe. 25c.

each; strong plants, 50c. each.

Purple Fringe. (Smoke tree.) A beautiful hardy shrub, with feathery blossoms of a purplish hue, having the appearance of smoke. It keeps in bloom from June to September. A fine shrub.

25c. each; large plants, 50c. each.

Viburum Opulus. (Snow Ball.) A hardy, strong growing shrub, with large balls of pure white flowers, really resembling balls of snow.

white flowers, really resembling balls of show. 20c. each.; strong plants, 50c. each.

White Thorn, or English Hawthorn.
(Crataegus Oxyacantha.) A beautiful hardy shrub, growing 5 to 8 feet high, with small double white flowers, in clusters; blooming abundantly about three or four weeks in May and early June.

Double Rose Thorn, or English Double Red Flowering Hawthorn. Similar to the white variety, but grows larger, making a bet ter shaped bush and flowering much more freely. 75 cents each.

Above collection of 32 varieties hardy shrubs, \$6.00.

A selection of 12 shrubs, my choice, that will bloom in succession from June to October, \$2, or 6 for \$1; extra strong plants, \$4 per dozen

HARDY CLIMBING VINES.

Hardy Climbling Vines are among the most desirable ornamental plants. No others produce more beautiful effects, whether climbing over the veranda, or clinging fast to house walls. They are used profusely in decorating the finest suburban residences. parks, cemeteries, and churches.

Akebia Quinata, Japan Akebia. A twining climber, suitable for pillar or trellis; handsome and distinct foliage, and chocolate colored, fragrant flowers. 20c. each.

JAPANESE OR BOSTON IVY, OR AMPELOPSIS VEITCHII.

Ampelopsis Quinquefolia, American Ivy or Virginia Creeper. A strong, rapid grower, clinging firmly to stone, brick or wooden walls; suitable also for verandas, porches, trunks of trees, etc. Large, dark green foliage, changing in autumn to bright crimson; much esteemed. 20c. each; 6 for \$1; 12 for \$2.

each; 6 for \$1; 12 for \$2.

*Ampelopsis Veitchii. Also known as Japan Ese or Boston Ivy. The most beautiful climb ing vme in the list. Smaller and more delicate than the preceeding, but very hardy; much used for covering brick buildings, churches, wood, or stone walls, and suitable for trellis; unsurpassed for rock work, baskets and vases; leaves turn brilliant in fall. 20c. each; 6 for \$1; \$2 per dozen.

Bignonia Grandiflora—Trumpet Creeper.
A hardy, fast grower, suitable for covering dead walls, back buildings, fences, etc Produce in August large, orange-red, trumpet-shaped flowers, in clusters. 25c. cach.

CLEMATIS.

One of the most attractive climbing vines of the times, rapidly becoming more popular every season. They produce a profusion of flowers during summer, of the deepest purple, lavender, white, etc. Trained on screen, twine, trellis, over stone, old walls, stumps, rock work, in tubs or pots, it has no equal among strong growing, blooming

vines. It likes deep, rich, sandy soil; an eastern exposure is best partial shade and a liberal supply of water. There are many varieties, but the few following are among the best large flowering; flowers ranging from 3 to 6 inches across; all hardy, but a covering of straw in winter is a benefit. They will grow from 5 to 13 feet in one season. The collection of the following 5 varieties, \$2; or 50c. each for less than 5.

CLEMATIS JACKMANII.

Clematis Jackmanii. An English hybrid; flowers large, intense violet purple, and from 4 to 6 inches in diameter. This has proved itself to be trellis, veranda and pillar work. Flowers are pure white, star shaped and very fragrant. 20c. each.

Clematis Fortunii. Flowers double white, peculiarly formed, large and quite fragrant. Blooms from June to July. 50c. each.

Clematis Standishii. A vigorous, hardy sort, blooming early in the season in great profusion; flowers dark blue. 50c. each.

Clematis Lanuginosa Candida. white, with delicate rose tint; the finest white. 50c. each.

Clematis, the Gem. Flowers large; delicate lavender blue; blooming early; the best of its color. Blooms from June to October. 50c. each. The above set of 5, \$2., or \$5. per doz. The follow-

ing are small flowering varieties:

Clematis Coccinea. Blooming from June till frost; flowers of a brilliant scarlet color; hardy. 25c. each.

Clematis Flammula. An elegant slenderbranched climbing vine, particularly valuable for

oranched climbing vine, particularly valuable for low; very fragrant. Good for trellis or pillar. 20c. each; 6 for \$1.

Clematis Viticella. Blue Bells. A strong, hardy grower, with pretty green leaves, and a profusion of dark blue and purple flowers. Suitable for trellis. 20c. each; \$2. per doz.

Clematis Virginiana-Virginia Clematis. A hardy, rapid growing vine, that will cover unsightly objects effectually; mist-like, pure white fragrant flowers; green foliage, with curious ornamental seed-vessels. 25c. each.

Louis Van Houtte. Violet purple; free flowering. Blooms from June to October, 50c. each.

Prince of Wales. Deep purple; free. Blooms from July to October. 50c. each.

Velutina Purpurea. Blackish mulberry. Blooms from July to October. 50c. each.

Mdm. Van Houtte. Large size; white; blooms from June to October. 50c. each.

The 4 above Clematis \$1.75.

Pipe Vine. (Aristolochia.) Sometimes called Dutchman's Pipe from the curious form of the flowers, resembling an old fashioned pipe; a strong, twining vine, with large leaves; suitable for porches, screens, etc. 50c. Small plants, 30c.

Wistaria, Chinese. A hardy, strong growing, twining vine, of large growth; producing in mid summer large clusters of beautiful, pale blue, fragrant flowers; much used for high verandas, balconies, etc.

Wistaria, Magnifica. Similar to above, but

PIPE VINE. darker blue flowers; pro-fuse bloomer; splendid. The Wistarias are rec-ommeuded for high verandas, porches, balconies, etc., as the very best plants for the purpose. Not always hardy north of 42°. 25c. each.

WATER LILIES.

Nymphoea Odorata. This is, perhaps, the best of our native Water Lilies. It is usually as white as snow—but occasionally tinted with pink—and fragrant, Good roots, 25c. each; \$2.50 per dozen, prepaid by mail.

HONEYSUCKLE.

Honeysuckles There is nothing more de-irable than sweetscented Honeysuckles; the foliage is pretty, neat, and clean; the flowers almost continuous and their fra-grance delicious. The varieties described be low are the very best

Evergreen Sweet-Scented Honey-A hardy, Suckle.

vigorous grower; it blooms nearly all the season; delisionsly fragrant. Flowers buff, yellow and white; very desirable for veranda and trellis work. 20c. each; 6 for \$1.

work. 20c. each; 6 for \$1. **Curopean Sweet - Scented, (Belgian,) Honeysuckle.** A fine, hardy grower; flowers large and exceedingly sweet. Colors buff, yellow, and red; a constant bloomer. The finest honeysuckle; suitable for trellis or pillar. 20c.; 6 for European

Golden Leaved Honeysuckle. An elegant and very desirable variety, of moderate growth; leaves beautifully veined and netted with clear yellow, so that the prevailing color of the foliage is bright yellow. Flowers yellow and fragrant. Admirable for pillar and trellis work. 25 cents each.

Hilliana Honeysuckle. A variety introduced from Japan. It is evergreen, and a constant bloomer. Flowers pure white, changing to yelthe best, most attractive and showy of all the hardy climbing clematis, old plants being literally covered with flowers. Blooms from July to October. 50c. each; 6 for \$2.50.

Red Coral Honeysuckle. A hardy, rapid grower; suitable for rockwork, etc. Bright red, trumpet shaped flowers. 20c. each; 6 for \$1.

ties, for \$2.

HARDY BULBS.

Astilbe Japonica, (Spiræa.) The Astilbe or Spiræa, is a pretty dwarf plant, with delicate, feathery trusses of very small flowers that are really elegant and exceedingly useful for all kinds of ornamental work. It is an excellent house of ornamental work. It is an excellent house plant and one of the best to force for winter flowers. White. 25c. each.

Dicentra Spectabilis. Sometimes Bleeding Heart.) Bears heart shaped, deep pink flowers, a dezen or more being borne on a graceful, drooping raceme, a foot or more in length. 25c. each.

Daisy. See page 63.

Day Lily. The Funkia, called the Day Lily, is a broad foliage, prettily veined. Flowers are of the purest white, trumpet shaped, in clusters. The

blue variety has smaller flowers; stems taller.
White. 25c. each; \$2.50 per dozen.
Lily of the Valley. See page 70. Lilies, Japan. See page 70.

Perennial Phlox. See page 73. Primrose, Hardy Double White. See page

Pæonies. The Pæonies are perfectly hardy, and they will succeed in any ground unless water lies on the surface or n ar the roots in winter. They may be planted in the autumn or spring. Southern countries the Pæony grows well, but the buds often blast unless grown in partial shade and liberally supplied with water. The engraving shows a plant in flower. Plants, 25c. each; \$2.50 per dozen. The colors are pink, white, rose, salmon, dark red.

PÆONY.

Yam. The Chinese Yam is hardy, and makes a very pretty running vine, often called Cinnamon Vine. The tubers may remain in the ground for several years. Tubers, 20c. cach; \$1.50 per doz. ucca. The Yuccas are a striking class of plants,

with long, narrow, strong, sharp pointed leaves, with a peculiar tropical aspect.

Filamentosa. Shown in the engraving, is the hardiest, and I think will endure almost any of our northern winters. It sends up a strong flower stem in the middle of the summer, bearing a large stalk of whitish flowers. Price, strong, one-year.

old roots, 30c. each; strong, two-year-old roots, 50c. each

Collection of Hardy Bulbs and Roots, 14 varieties, by mail, \$2.25; by express, \$2.

SMALL FRUITS.

THE STRAWBERRY.

Our first fruit in the year to ripen is the strawber ry, and is considered the best as well as first of all fruits. Not only is it cultivated largely for market, but is growing more important yearly in the private garden. It is the most productive of small fruits, as well as the most important kind sent into market, and without comparition of the sent into market, and without competition of other fruits, being consumed more than three times as much as any other kind of berry; and yet there is room for thousands of acres in many sections for more strawberries to supply the demand. Notwithstanding the large supply of last year, and the low prices generally obtained, the sale of plants will be in large demand. By planting strawberries you add value to your home and property, which is an inexpensive luxury and really a benefit to your whole system in preserving.

Health, which the change to fruit is of much benefit. Since 1869 I have cultivated the strawberry for home and distant markets more or less extensively, usually with excellent success. Of course it has its failures in some years, like all crops, and some seasons very severely, requiring an immense amount of labor in large beds to carry them through in a good fruiting condition for the following season. I have personally given the strawberry my attention in cultivating, adding and testing

New Varieties, and discarding them when they do not prove suitable, or of more value for some purposes than others already in cultivation. I have at present in strawberries, several acres planted on soil well adapted to growing strong, healthy plants, with plenty of roots. I purchase from the originator all new sorts, planting them on my trial grounds; that I may be able to personally judge their merits, 1 almost daily

Examine them, throwing out all plants which do not look true to character and name. With such care of growing I can give my customers much stronger plants and better than are offered by some parties who give them no care whatever, but allow them to be smothered with weeds, offering the plants at prices that are a damage to themselves and to the parties who plant them, and would advise all who wish to plant for profit to use care in buying and

Planting strawberry plants, not to purchase because they are offered cheap, as hey more times prove expensive than profitable. Sometimes I am compelled to buy plants; in such cases I order from reliable parties only, but generally keep a sufficient stock for the general demand of all varieties offered. In any case where plants purchased of me do not prove to please, notify me at once and I will endeavor to give the purchaser satisfaction as far as I am able to do so, as I intend to work for the best interest of the purchaser, as far as practicable, in Belling

Good Stock, true to name, such as I would like to plant for myself. In our haste in the packing season, when two months' work must be done in one, errors and delays will sometimes occur. To those I would say, be patient as possible, and forward orders early to avoid delays as much as possible, as the earlier you can get your plants in the ground af-ter the frost is out, the better success you will have. We are doing our best to serve you all. The plant trade which is now quite extensive in the eastern. middle and western states, crowds additional work upon our packers, who work early and late to serve

New Varieties. In order to know what kinds succeed best with you, try a few new varieties, as what do well in one place will not always in another, and in order to know, you can better judge which are the best with you.

Plants Grown at the North are more hardy, and it is the general opinion of most fruit growers, that the plants grown at the north and planted south are usually more vigorous and hardy. Plants grown on the warm, light soil of Delaware and New Jersey and carried north, will not, as a general rule, thrive as well as northern grown plants carried south, when both are thriftily grown.

CULTURE OF THE STRAWBERRY.

Soil. They are successfully cultivated upon a great variety of soils, one kind not being adapted to all varieties, although some kinds succeed well in almost any land; however, should never be planted in a very dry or very wet situation. A good sandy loam with a clay subsoil seems best suited to most varieties. Many of the latest and best flavored sorts thrive best on heavy clay soil, while those grown upon sandy soil ripen their fruit early, extending the fruiting season from one to two weeks, by planting both early and late varieties upon early and late soil. Soil, locality and climate make more difference with the strawberry than most other kinds of small fruits. The only certain method of success is for each one to try several varieties of early, medium and late sorts, and cultivate those that give the best results.

the best results.

Manure. Well rotted stable manure applied broadcast, two or three inches thick on the surface, thoroughly mixing the soil with harrow, rake or digging fork, is the most beneficial. When these cannot be had, guano, bone, super-phosphate and ashes can be used with best results, applying broadcast, mixing well with the soil with rake or har-

Cultivation. Spring and fall are the times for planting. For field culture, land that has been cultivated one year with corn is best. Sod ground freshly turned is not as good, but if turned early in the fall and well manured, will answer for spring planting. As soon as the plants are received, unpack and plant out at once. If the ground is not ready, loosen the bundles and heel in, in some shaded place. For garden culture, make the rows 18 inches apart, and set the plants 12 inches apart in the rows, leaving two feet every founth row. For field culture, make the rows 3 feet apart, and set the plants 12 inches apart in the rows, so they can be cultivated with a horse. In planting, mark out into rows, get a small boy to drop the plants, then, with your trowel in your right hand, make a hole large enough to admit all the roots of the plant without crowding or bending them, covering the roots carefully and pressing the earth very firmly around

Roots, which if set in dry weather, is the most important part in planting, being careful not to plant them so deeply as to cover the crown. To secure a good yield, and have large, healthy plants the year after planting, they should not be allowed to bear the first season, cutting off all runners before the tips take root and keeping the ground loose and free from weeds. As soon as the ground commences to freeze in the fall, they should be covered with straw or coarse liter. Only a very light covering is necessary to shade the plants from the sun, as continual thawing and freezing is very injurious to the fruit bud. In the spring remove the straw from the vines into the rows, leaving it for mulch, and it is also beneficial in keeping down the weeds. After the last picking, remove the straw altogether and fork or cultivate the beds. Strawberries managed in the above manner will last from three to four years. In order to secure a full crop every year, a new bed should be set out every second year.

The Hill and Matted Row System. If you wish to grow the largest and finest fruit, keep all the runners cut off and let them form large stools. If choice fruit is no object, the runners may be allowed to grow at will. The hill system is considered best by nearly all growers, as they can be easily cultivated and kept in bearing a year longger. It is best to renew beds every two or three years.

Pure Varieties. I exercise special care in keeping my stock pure, renewing each year all the beds which I send my stock from, keeping each va-

riety by itself, so there is no possible way for them to become mixed. I send out nothing but strong, stocky plants, well rooted, and are sure to live when transplanted under favorable circumstances. The fibers are tied in bundles and packed specially to endure long transportation. The plants are one year old, pure and true to name.

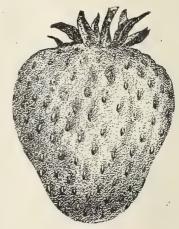

Potted Plants. July, August and September are the months for planting potted plants, being the safest method in dry, hot weather, while the purchaser is sure to realize nearly a full crop within ten months from the time of planting. Those who are obliged to delay spring planting, remember and send for strawberry circular of potted plants in July. All who purchase goods of any kind this spring will receive it as soon as ready for mailing, and need not write for it.

BELMOT.

NEW VARIETIES.

Belmot. For the new varieties this has won more first prizes than any one variety. Fruit large, oblong, dark crimson, firm and sweet. Plants are vigorous and productive, perfect flowers, ripening medium. For family use a very promising variety. 35c. per dozen; \$1.50 per 100.

MONMOUTH.

Moumouth. This is said to be the earliest of strawberries. Perfect blossom; berries large, bright crimson, uniform, regular, holding out well to the end, firm, and quality superior. Plant vigorous, healthy, standing much endurance in extreme weather, even excelling the Crescent Tested in many sections, it has proved a variety that all should try, either for house or market, 75c. per dozen; \$4.00 per 100.

Crimson Cluster. Unusually productive, of a rich crimson color, ripening early and continues to very late, quality among the best. 75c. per dozen;

\$5.00 per 100.

Jessie. Introduced last spring. A good grower, productive and of good flavor. 75c. per doz.; \$5.00

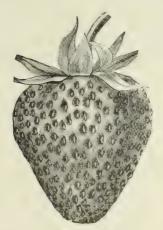

per 100.

Lida. Said to be the most prolific of all strawberries; good grower, but better on strong soil than light. Berry above medium size, moderately firm, and fair quality. 50c. per doz.; \$2.50 per 100.

STANDARD VARIETIES.

Chas. Downing. This variety is a general favorite, well known and a fine variety for all purposes. Its size, flavor and productiveness are among the best, succeeds well on all soils and ripens medium to very late; very valuable for home use or for market. 25c. per doz.; 75c. per 100; \$5.00 per 1000.

*Jersey Queen. The growth is much more thrifty than most varieties; fruit, medium size, of a dark crimson color; flavor, very sweet, quite firm, remaining on the vine longer than most varieties without injury; prolific and quite late; good for home or market. 25c. per doz.; 75c. per 100; \$5.00 per 1000.

CRESCENT.

**Crescent. One of the most hardy and productive varieties. Among the first to ripen and continues quite late; astrong grower, taking possession of the ground to the exclusion of weeds. Profitable for home market, and valuable for private use, seldom winter-kills and the late frosts seldom injure the flowers. 20c. per dozen; 75c. per 100; \$4.00 per 1000.

Sharpless. Requires good culture, ripens medium. Late spring frosts injure the blooms for fruiting more than most other varieties; yielding favorable in a good season. 25c. per doz.; \$1.00 per 1000.

100; \$5. per 1000.

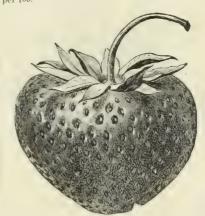

Henderson. Unexcelled in flavor, and seems adapted to all soils; strong, vigorous, and attractive

foliage; perfect flowering; not productive. 25c. per doz.; \$1.00 per 100.

Parry. seedling of the Jersey Queen. Flowers are perfect and plant very strong and vigorous, bearing large, high colored, uniform berries on strong, upright fruit-stalks; very productive. 25c.

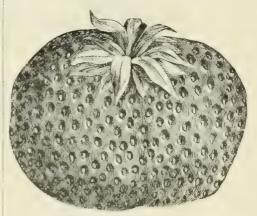

per doz; \$1.00 per 100.

Piper. This yields heavy crops of large, attractive berries; valuable for market, or home use. Plant, strong and free in growth; medium early, and valuable in any collection. 25c. per doz.; \$1. per 100.

MANCHESTER

*Manchester. As a late berry, one of the most valuable for all purposes; of large size, good color, not quite as firm as the Wilson but larger and much more prolific. Its vigorous growth, luxuriant foliage, are all that can be desired. 20c. per doz.; 75c. per 100; \$5. per 1000.

WINDSOR CHIEF.

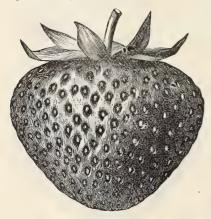

Windsor Chief. A strong, vigorous grower. Fruit is above medium in size, perfect in form; color, bright deep scarlet. Not as firm as the Wilson, but brighter color. Nearly as productive as the Crescent. Ripens above medium, holding out very late; is a little tart, but when fully ripe it has a sweet and rich flavor. Among our medium and late

varieties it will be found a profitable one. 20c. per doz.; 75c. per 100; \$5. per 1000.

Daniel Boone. An excellent berry for family

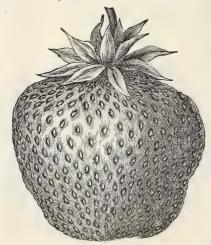

Daniel Boone. An excettent corry for faminy or market; very prolific; large size; color, shining bright red. 25c per doz.; \$1. per 100.

Capt. Jack. A profitable variety on light soil, throwing runners freely, with small foliage, yields more berries than the Wilson, and suffers less with drouth. In picking it separates from the hull, but can be avoided by careful handling; 25c. per doz.; \$1. per 100. \$5. per 1000.

MAY KING.

May King. This resembles the Crescent in fruit but more attractive foliage, equally as strong in growth. Some think will supercede it for general culture. 25c. per doz. Layers, \$1. per 100.

GARRETSON.

Garretson. Fruit uniform, globular, large, good quality, firm, late, prolific. 25c. per doz.; \$1. per 100.

Jewell. As to yield and growth, it is certainly the poorest I have tested for ten years. Large leaves, large berries of good flavor. Should have heavy soil. 40c. per doz.; \$3.70 per 100.

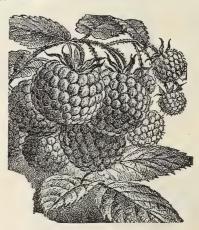

*Wilson's Albany. This is extensively known as a market berry in all sections. As a shipping variety it stands among the best and, with high culture, it yields good crops of solid, rich flavored frutt, when fully ripe; matures a few days later than the Crescent. 20c. per doz.; 75c. per 100; \$5. per 1000.

Longfellow. Resembles Sharpless in flavor, but more firm, productive and hardy; berries darker red, of the finest flavor among the whole class of strawberries; large and very attractive. Perfect flowering. Layers, 25c. per doz.; \$1. per 100; \$5. per

When ordered by mail, add 25 cents per 100 for layers to pay postage.

The above varieties marked * are standard sorts which I have selected as the best in productiveness, size, flavor and time of ripening, for home garden, and will send

6 Layers of each 6 sorts, by mail or exp. for .65 15 Or the 6 standard varieties not marked with * at the same rates.

RED RASPBERRIES.

RASPBERRIES.

Cultivation. Soil that will grow Strawberries will grow Raspberries, but are more benefitted by shade than the former, if not too dense. For garden culture, plant the red varieties four feet by three; for field culture, to admit the cultivator, set in rows five feet apart and three feet in the row. Set plants about three inches deep; avoid a dry, windy panuls about three inches deep; avoid a dry, which day if possible, setting when the soil is moist, and press firmly about the roots. Hoe often, keeping the ground free from weeds, hoeing off all suckers when three to four feet high, nip the ends, which will cause them to furn rows similar to heden and will cause them to form rows similar to a hedge, and produce more fruit.

Red Varieties.

Cuthbert. This is a very hardy, strong grower. Adapts itself to a large extent of country. The fruit is very large, bright red; one of the best in quality; productive, continuing a long time in bearing. Should be planted largely. 50c. per dozen; \$2. per 100: \$1.75 per 1000. 100: \$1.75 per 1000.

Hansel. A new variety, said to be of much

promise; early, productive, firm; perfectly hardy, good size and prolific. 50c. per doz.; \$3. per 100.

Turner. One of the best car/v Red Raspber-

ries. Strong, vigorous growth, hardy, prolific. Very sweet and rich. Among the first to ripen, and invaluable for home use or market. 50c. per doz.; \$1.75 per 100.

doz.; \$1.75 per 100.

Crimson Beauty. Early, large size, quite productive, and hardy. 50c. per doz.; \$2. per 100.

Brandywine. Of fair quality, good size, productive and hardy. 50c. per dozen; \$2. per 100.

Marlboro. Large, productive variety; of superior quality; vigorous and very hardy. 50c. per dozen; \$2 per 100.

Black Varieties.

Mammoth Cluster. One of the largest and best Black Raspberries. 50c. per dozen; \$2 per

Souhegan. A new, superb, extra early variety,

and cannot be recommended too highly; hardy, and enormously productive; ten days earlier than any other black variety; a strong and vigorous grower. 50c. per dozen; \$1.75 per 100.

Gregg. Larger than the Mammoth Cluster, excellent quality, a good Black Cap Raspberry on account of its excellent shipping qualities; the latest of the Black varieties. 50c. per dozen; \$1.75 per

Ohio. Second early; very productive and hardy, and much prized for drying. 50c. per dozen; \$2

Shaffer's Colossal. Of a brownish red color; propagating from tip plants; large, vigorous canes; very hardy and productive. 50c. per dozen; \$2 per

Brinckle's Orange. (Yellow.) Large, sweet and delicious.

Earhart. An everbearing Black Cap. A strong, vigorous grower, bearing from June to October, large berries, very prolific. \$2.00. per dozen.

Culture. The same as Raspberries, do best in a cool situation. Plant in rows, in open ground, four feet by three; give good culture and rich soil if you wish good crops, keeping clear from grass and weeds, mulching during June and July will be beneficial; as soon as the fruit is gathered, cut out the old dry wood. If current worms attack them, sprinkle with white hellebore (obtained at druggists) in the morning, or dissolve half an ounce in one gallon of water and apply with a syringe.

Fay's New Prolific. It originated from a seedling of the Cherry and Victoria Currants. During the past thirty years the originator endeavored to produce a Red Currant which would combine the size of the Cherry Currant with the prolific bearing qualities of the Red Dutch, it being a fact that the Cherry Currant heretofore has grown the largest, and though bringing more money per quart, its bearing qualities have not made it profitable for the fruit grower. In obtaining size and prolificacy in Fay's Prolific, he obtained a SPICY FLAVOR with MUCH LESS ACID than the Cherry Currant. I have grown and fruited this variety on my grounds and find it to be a strong, thrifty grower, producing more than double the amount of fruit of the Cherry or Versailles; flavor much better and superior in every respect. Should by all means plant it in preference to Cherry Currant. Price, 1 year, 20c. each, \$2.00 per dozen; \$12 per 100; 2 years, 30 cents each, \$2.50 per dozen, \$16 per 100.

Black Naples. Valuable for jams and jellies. 10c. cach; \$1 per dozen.

Large; best for market. 10c. Cherry. each; \$1 per dozen; \$6 per 100.

Red Dutch. Strong grower and abundant bearer: fruit of medium size, yielding more than the large varieties. \$1 per dozen; \$5 per

Versailles. Very large; best for table. 10c. each; \$1 per dozen; \$6 per 100.
White (rape. Very large; the best white.

White Crape. 10c. each; \$1 per dozen.

Victoria. Next to Fay's; one of the mest prolific; good size berry, deep red.

GOOSEBERRIES.

F Downing Larger fruit than Houghton's \$1,25 per dozen.

Houghton's Seedling. Very prolific; free from mildew. 15c. each; \$1. per dozen.

BLACKBERRIES.

Kittatinny. The best for general cultivation. 50c. per dozen.

Snyler. Excellent quality, rich and sweet; ripens early. 50c. per doz.; \$2 per 100.
Taylor's Prolific. Hardy, prolific, and one of the best. 50c. per dozen.
Wachusetts Thornless. Hardy, prolific, second early. 50c. per dozen; \$2. per 100.

Culture. Plant 6 feet apart and the vines 8 feet apart in the rows. Dig holes 15 inches deep and large enough to accommodate the roots. should then be filled within 6 or 8 inches of the top with fine, rich soil, throwing in a few bones or wood ashes. Cut back I-year vines to two eyes, placing the lower one beow the surface; 2-year ines to three or four yes, planting one or two yes below the surface. Spread out the roots, place the stock of the vine at one side of the hole and fill with fine soil, pressing it firmly. Set a stake at the stock, (to which the vine should be kept tied,) which will

support for two years. Keep old wood trimmed off, growing fruit on new canes. Any manner of pruning that will admit the sun to the fruit will insure a good

Eaton Grape. This valuable new black grape, originating in Concord, N. H., which is about thirty-five miles farther north than Brattleboro, growing and fruiting a succession of years since 1868, alone warrants its hardiness. At Massachusetts Horticultural society of Borton, 1886, two of its largest bunches weighed 29 and 30 ounces each, and a bronze medal with two first class certifications of the control of the co cates of merit were awarded it by this society, while at the Bay State fair in Boston the same year it was also awarded a first prize. These critical tests alone warrants its critical tests alone warrants its ties. The EATON has been watched with much interest for several years beside the Worden, Moore's Early and Concord. It is as realthy as the latter, more vigorous, qually as productive and hardy, ripening a few days earlier. fruit has larger bunches and berries of better quality and more attractive. Its color is very dark purple with a fine bloom, bunches

very large, double shouldered, compact berries, often one inch in diameter. This is one of the most valuable, prolific, fine flavored, early new grapes intoduced for years, and should have a place with all fruit growers. Clusters are double shouldered, which the cut does not represent.

Price 1-year vines, \$1 00 each; 2-year vines, \$1.25 each.
FOR \$1.40 I will send one each, EATON, NIAGARA, EMPIRE STATE, 1 year.
FOR \$1.90I will send one each, 2 years.

Moore's Diamond. This is as superior to all other white grapes as the Brighton is to the Conall other white grapes as the Brighton is to the concord. No other white grape combines the desirable good qualities of earliness, hardiness, or healthy growth. A pure native cross between the Concord and Iona. A prolific, large, handsome, compact, bunch shouldered berry, the size of Concord; color, delicate, greenish white tinged yellow, when fully the above transparent; awayet, yery julicy, few

ripe almost transparent; sweet, very juicy, few seed. Price, 1 year, 75c.; 2 year, \$1.

Niagara. A cross between Concord and Cassady. Vine entirely hardy and strong grower; bunches large and compact, often weighing 15 to bunches large and compact, often weighing to to 20 ounces each; berries large, of greenish white, skin thin and tough; keeps well; quality good; ripens before Concord; enormously productive. Price, 30c. each; \$3 per dozen; 2 yr. vines, 50c. each; \$5 per dozen.

Empire State. This new white grape ripens the productive of the productive

with the earliest, and is a remarkably good keeper, while its quality is excellent; heavy bearer and growth very rapid. It has been widely tested and proved hardy and free from mildew or disease. Price, 1 year vines, 40c. each; 2 year vines, 60c. each.

Brighton. Cluster long and well shouldered; amber colored; ripens earlier than the Concord; as for quality there are none better; requires a little

more protection than some other varieties. I year, 20c. each; 2 years, 25c. each; \$2.50 per dozen.

Moore's Early. One of the best early black grapes; now much planted in place of Concord; quality better than Concord, of which it is a seeding; proved entirely hardy in all sections when fully exposed to 20 degrees below zero, and entirely free from any disease; bunch and berry very large; color, black, with a heavy bloom, ripening from ten to 14 days earlier. 1 yr., 25c. each; \$2.50 per dozen. 2 yrs., 30c. each; \$3.00 per dozen. Worden. Resembles Concord, but earlier; is the

very best quality. 1 yr., 20c. each: 2 yr., 25c. Golden Pocklington. Large, golden yellow; bunches very large, sometimes shouldered; berries large, and thickly set on the bunch; quality better than the Concord; ripens at same time. 1 yr. 20c. each; 2 yrs. 25c. each.

Jefferson. Bunch very large, often double shouldered, and very compact; berries large, light red, with a whitish bloom, solid and sweet; vigorous, hardy and very productive. 1 yr., 25c. each;

2 yrs., 30c. Vergennes. Clusters and berries large; light amber, ripening as early as the Hartford, its keeping qualities superior. 1 yr. 20c. each; 2 yr. 30c.

For \$1.00 I will send by Mail 1 Worden, 1 Niagara, 2 yrs., 1 Agawam, 1 Brighton, black, white and red varieties.

For \$1.00 I will send 1 each, 2 yrs., Empire State, Moore's Early, Salem, Wilder.

For \$1.50 I will send 1 Eaton, 1 Moore's Diamond, 1 year, or 1 each 2 year old for \$2.

STANDARD VARIETIES.

Agawam. (Rogers' No. 15.) Large, red grape; cluster good size; excellent quality; vine is a strong grower, productive and good foliage; ripens early.

2 yr. vines, 25c. each. Wilder. (Rogers (Rogers' No. 4.) One of the finest in quality of all the hardy black grapes. Vine a good quanty or at the nardy black grapes. Vine a good grower; productive; bunch and berries large; pulp soft and tender; rich and superior quality; ripens early. 1 yr. vines, 25c. each.

Concord. The old standard Black grape for general cultivation. 15c each; \$1.50 per dozeu.

Hartford Prolific. Black. Very early and

sweet. 15c. each; \$1.50 per dozen.

Delaware. Red. Sweet and delicious. 25c.

each; \$2 per dozen.

Eumelean. BLACK. Rich and excellent flavor.

25c. each. Isabella. BLACK. Well known standard vari-20c. each.

Salem. (Rogers' No. 53.) LARGE RED. 25c. each.

Lady. An excellent white grape. 2 yrs. 25c. each.

Rogers. Nos. 1, 2, 3, 4, 15, 19. 2 yrs, 25c. each. \$2 per dozen.

\$3.00, or over the purchaser can select, from single rates only, \$3.60 worth for \$3.00. Also see second page of cover.

ASPARAGUS ROOTS.

Conover's and Moore's New Cross Bred. 1 yr. old roots, 75c. per 100; by mail, \$1. 2 yr. old roots, \$1 per 100; by mail, \$1.50.

RHUBARB PLANTS.

Price, 15c. each; \$1.50 per dozen.

FRUIT AND ORNAMENTAL TREES.

Apples. 6 to 8 ft., 25c. each; \$2.50 per dozen. Pears. 5 to 7 ft., \$1 each; \$9 per dozen.

Cherries. Standard and dwarf; 75c. each.

Plums. 6 to 7 feet, \$1 each.

Peaches. 4 1-2 to 6 ft., 25c. each; \$2 per dozen. Quinces. Orange, 30c. each; \$3 per dozen.

Champion, 50c. each; \$4 per dozen.

Evergreens. Norway Spruce, 25 to 75c. each.

Arbor Vitæ, 25 to 50c. each.

Ornamental. In variety, \$1 to \$2 each. Black walnut, 4 ft. fine trees, 50c. each. \$4 per dozen.

EVERGREEN TREES.

Norway Spruce, 12 to 18 inches, for hedging, 20c. each; \$16 per 100 Norway Spruce, 18 to 24 inches, 15c. each; \$20

per 100.

Norway Spruce, 3 to 4 feet, 50 cents each; \$5. per dozen.

Norway Spruce, 4 to 5 feet, 75c. each; \$7.50 per

VEGETABLE PLANTS.

CABBAGE PLANTS, Early From Cold Frame. Early Wakefield, Henderson's Summer, Early Winningstadt, Fottler's Early Drumhead, 65c. per 100; 12c. per dozen; \$5. per 1000.

CABBAGE PLANTS, Late. Excelsior, Large Flat Dutch, Stone Mason, Drumhead Savoy, Marblehead, Mammoth, Flat Dutch, Red Drum-head, Winningstadt, Fottler's Drumhead, and thero-leading sorts. 35c. per 100; \$2.50 per 1000; \$10. per

CAULIFLOWER PLANTS. Early Erfurt, Early Paris, Early Snowball. In hot bed, 20c. per doz,; \$1. per 100. Late, ready in July, 10c. per doz; 60c. per 100.

CELERY. Boston Market, Early Arlington and White Plume, Golden Dwarf, Dwarf White; ready in July, transplanted; 75c. per 100; \$6. per 1000.

EGG PLANT. New York Improved Purple, 5c. each; 50c. per doz.

TOMATO PLANTS. Beauty, Trophy, Acme, Perfection, Cardinal, Essex Hybrid, Favorite, Yellow Plum; 40c. per doz.; \$2. per 100.

PEPPER PLANTS. Large Sweet Mountain Bell and Cayenne; 25 cents per dozen; \$1.50 per

SWEET POTATO PLANTS. 75c. per 100; \$5. per 1000. ASPARAGUS ROOTS. See page 38.

RHUBARB. Victoria and Linnæus; 15c. each; \$1.50 per doz.

LETTUCE PLANTS. 75c. per 100; 12c. per

Vegetable Plants by Mail.

Tomato, Cabbage, Pepper, Cauliflower and Sweet Potato plants, can safely be sent by mail at dozen rates. If ordered by the 100, add 25c. per 100 to pay postage, unless otherwise noted.

Yellow Globe Danver's Onion, Field Culture. The above illustration represents the true Yellow Globe Danvers, as grown in this section last year, from my seed. Price, one pound, \$2.00. Five pound lots, \$9.00.

TESTIMONIALS.

C. E. ALLEN: Dear Sir:—Please forward this collection immediately. I send you my little orders, not because I cannot get them nearer, but the plants you send are in the best of shape, and your improvements are splendid.

Respectfully,
MRS. S. W. LEWIS.

ALTAMONTE STATION, Fla. C. E. ALLEN; Dear Sir :- The last order was filled to my satisfaction, and peas are four inches high in the garden; thermometer 80° in the shade.

Yours. F. A. COFRAN.

PORT TOWNSEND, W. T. C. E. ALLEN: Dear sir:—The bulbs and plants I got of you last fall have done finely. I have the finest display of flowers in the city. Those Hyacinths est display of flowers in the city. Those Hyacinths and Tulips were admired by every one. I live in the suburbs, and every day people come as far as my house to see those flowers and turn back.

Respectfully, J. N. LAUBACH.

SAN FRANCISCO, CAL., Marquand Hall. MR. ALLEN: Dear Sir:—The lovely flowers were received at the right time, and were exactly what I Yours Respectfully, HARRIE HOOK. wanted.

KNOXVILLE, Tenn. The packages of seed sent by you to me have come to hand in good order, and some have already been sown in my garden. I expect to have my early vegetables from "Northern grown seed."
Yours truly,
A. A. BARNES.

SAN JOSE, CAL.

C. E. Allen: Dear Sir:—Our plants arrived in good condition last Tuesday. We, all are much pleased with them.

Respectfully,
MRS. A. OVES.

WEST BUTTE, SUTTER Co., CAL. C. E. Allen: Dear Sir:—Plants arrived yesterday in excelent condition. Very good plants.

Thanks for the extra ones. Respectfully, NANNIE SANTEE
